

**Donald A. Reago, Jr.**

Director, U.S. Army Night Vision & Electronic Sensors Directorate

**Dr. Donald Reago, Jr.** is the Director of the Communications-Electronics Research, Development and Engineering Center (CERDEC) Night Vision and Electronic Sensors Directorate (NVESD), in Fort Belvoir, Va. In this capacity he is responsible for planning and executing the Army's science and technology investments in Electro-Optical/Infrared (EO/IR) and Countermine/Counter-Improvised Explosive Devices sensors and signal processing. He is responsible for the technical direction of a science and technology program with a \$200 million annual budget, a staff of approximately 470, and a technical scope comprised of in-house research, contract research and development, and support to various Program Executive Offices and Program Managers across the Army and Joint Service acquisition communities.

Dr. Reago is an internationally recognized authority in night vision and countermine technology, and has served on numerous Joint, National, and International coordinating activities. He is currently the Chairman of the Office of Secretary of Defense (OSD) Sensors and Processing Community of Interest and the Army representative to the North Atlantic Treaty Organization (NATO) Sensors and Electronics Technology Panel. He is a fellow and member of the Executive Committee for the Military Sensing Symposium.

Dr. Reago received a Bachelor of Science in physics from the University of Missouri-Rolla, Mo., 1983 and a Doctor of Philosophy in physics from the University of Missouri-Rolla in 1986.
