## Lauriola awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA – 8 June 2015 – Daniel Lauriola has been awarded a 2015 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics for his potential contributions to the field of optics, photonics or related field.

Lauriola is rising junior at Rose-Hulman Institute of Technology (USA) double majoring in engineering Physics and Optical Engineering. He has been researching the optical properties of aluminum doped Zinc Oxide thin films. This summer he will be working at Spectral Energies as a research intern. "I am extremely grateful to SPIE for this award as well as its continued support throughout my college studies," said Lauriola. He plans to use the award to travel to SPIE meetings and to develop some new and exciting ideas to further his research.

In 2015 SPIE awarded \$353,000 in education and travel scholarships to 126 outstanding individuals, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected and approved by the SPIE Scholarship Committee, Chaired by SPIE volunteer Cristina Solano.

Through 2014, SPIE has distributed over \$4.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

[SPIE is the international society for optics and photonics](#), a not-for-profit organization founded in 1955 to advance light-based technologies. The Society serves nearly 264,000 constituents from approximately 166 countries, offering conferences, continuing education, books, journals, and a digital library in support of interdisciplinary information exchange, professional networking, and patent precedent. SPIE provided more than \$4 million in support of education and outreach programs in 2014.
