Vladimir Borisov awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA – 27 May 2015 – Vladimir Borisov has been awarded a 2015 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics for his potential contributions to the field of optics, photonics or related field.

Vladimir is a first-year graduate student pursuing his Master's in the Photonics and Optical Information Technologies Department at ITMO University (Russian Federation). His research focuses on investigations of properties of holograms recorded in polymer materials and crystals for their further application as metamaterials for transformation optics in THz frequency range. "It's a great honor to receive this scholarship. I truly believe that it will help me to start reaching my goals in the field of optics and photonics," said Vladimir.

In 2015 SPIE awarded \$353,000 in education and travel scholarships to 126 outstanding individuals, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected and approved by the SPIE Scholarship Committee, Chaired by SPIE volunteer Cristina Solano.

Through 2014, SPIE has distributed over \$4.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

[SPIE is the international society for optics and photonics](#), a not-for-profit organization founded in 1955 to advance light-based technologies. The Society serves nearly 264,000 constituents from approximately 166 countries, offering conferences, continuing education, books, journals, and a digital library in support of interdisciplinary information exchange, professional networking, and patent precedent. SPIE provided more than \$4 million in support of education and outreach programs in 2014.
