2. ACTIVITIES

= photonica.ru web-site. An online resource devoted to optics and photonics in Russia. Joint project with OSA/BMSTU Student Chapter.

= SPIE/RUS Chapter web-site.

= Chapter's library.

= Student optical laboratory, jointly with OSA/BMSTU. The project was started long ago but is still in its infancy. There was a problem with the place for the lab, which we have recently received.

Now we have three optical table tops to be mounted on some bases, which must be ordered and manufactured and assembled. This is another headache. Hopefully, Max Frolov who is very energetic and who now heads the technical activities of the chapter will be able to cope with it. Our administration is much interested in this lab, but no one cares to help us, and everybody sends Max from one staff member to another. And since BMSTU is very large indeed this takes a lot of time to find someone.

Please address questions on this activity (if any) to Maxim Frolov with CC to me.

= Members participation in conferences. This year one member went to SPIE AM (Oleg Olkhovets) and four people went to Applied Optics 2004 conference in St.-Petersburg (Natalia Lisitsyna, Maxim Frolov, Victor Tolstoguzov and Vasily Grigoriev). Also 5 people (Natalia Lisitsyna, Valentina Koshechkina, Maxim Frolov, Oleg Olkhovets and Konstantin Karapetyan) participated in the meeting with Richard Hoover organized by MIIT Student Chapter
