Volume 5408 Technologies for Synthetic Environments: Hardware-in-the-Loop Testing IX

Chair/Editor: Robert Lee Murrer, Jr.

Conference Committee

SESSION 1
JOINT SESSION WITH CONFERENCE 5431

- **Scalable hardbody and plume optical signatures [5408-1]**
  D. Crow, F. Hawes, M. Braunstein, C. Coker, T. Smith

- **Validation and acceptance of synthetic infrared imagery [5408-2]**
  M. Smith, M. Bernhardt, C. Angell, D. Hickman, P. Whitehead, D. Patel

SESSION 2
HWIL APPLICATIONS I

- **Multispectral target simulation dome for hardware-in-the-loop simulation of fire control and optronic seeker systems [5408-3]**
  J. Muellner

- **Improving real-time communication between host and motion system in an HWIL simulation [5408-4]**
  H. Havlicsek, L. Zana

- **Selection criteria for hydraulic and electric motion simulators [5408-5]**
  R. Mitchell

- **High-level modeling notations for HWIL applications: is it still a dream or already the reality? Using UML2.0 as a feasible and cost saving approach for the development of HWIL applications [5408-6]**
  J. Tomaszunas

- **Broadband zoom collimator for installation on a flight motion simulator at the KHILS facility [5408-7]**
  J. Arendt, G. Binduga

- **Air Force Electronic Warfare Evaluation Simulator (AFEWES) infrared test and evaluation capabilities [5408-26]**
  H. Jackson II, S. Shepherd

SESSION 3
HWIL APPLICATIONS II

- **Implementation of scene simulation technologies in the AEDC space chambers [5408-8]**
  H. Lowry III, D. Crider, W. Goethert, W. Bertrand

- **Cold background, flight motion simulator mounted, infrared scene projectors developed for use in AMRDEC Hardware-in-the-Loop facilities [5408-9]**
  T. Cantey, D. Beasley, M. Bender, T. Messer, D. Saylor, J. Buford, Jr.

- **Advances in cryo-vacuum test capabilities for dual-band sensors at the kinetic kill vehicle hardware-in-the-loop simulation (KHILS) facility [5408-10]**
  R. Thompson, W. Herald, T. Bergin, S. Marlow, E. Glattke
SESSION 4
IR PROJECTION: ENABLING TECHNOLOGIES

**Synthetic IR signature control using emissivity enhancement techniques [5408-11]**
V. Malyutenko, O. Malyutenko, V. Bogatyrenko, S. Chyrchyk, J. Kircher, R. Murrer, Jr., D. Snyder

**Continuing adventures in high-temperature resistive emitter physics and materials [5408-12]**
S. Solomon, G. Goldsmith II, M. Hawkins

**Design and fabrication of 2xD light emitting device arrays for IR scene projection [5408-27]**
N. Das, G. Simonis, J. Bradshaw, A. Goldberg, N. Gupta

**Characterization of quantum well laser diodes for application within the AMRDEC HWIL facilities [5408-13]**
D. Saylor, M. Bender, T. Cantey, D. Beasley, J. Buford, Jr.

SESSION 5
REAL-TIME SCENE GENERATION

**Software-only IR image generation and reticle simulation for the HWIL testing of a single detector frequency modulated reticle seeker [5408-14]**
J. Delport, F. le Roux, M. du Plooy, H. Theron, L. Annamalai

**Using programmable graphics to improve zoom window anti-aliasing [5408-16]**
E. Olson, T. Bergin

SESSION 6
SENSOR STIMULATION: METHODS AND TECHNOLOGIES

**MIRAGE: developments in IRSP system development, RIIC design, emitter fabrication, and performance [5408-17]**
P. Bryant, J. Oleson, J. James, B. Lindberg, J. Lannon, D. Vellenga, S. Goodwin, A. Huffman, C. Pace, S. Solomon

**Adaptive multispectral stimulator providing registered IR and RF data in a closed-loop environment [5408-18]**
S. Jones, R. Hall

**DMD-based infrared scene projection: A comparison of MWIR and LWIR modulation transfer function [5408-19]**
W. Folks, D. Mullally, G. Zummo, A. Weeks, G. Boreman

**AMRDEC’s HWIL synthetic environment development efforts for ladar sensors [5408-20]**
H. Kim, M. Cornell, C. Naumann

SESSION 7
IR PROJECTION: PERFORMANCE CHARACTERIZATION

**Emissive infrared projector real-time scene data pixel processing [5408-22]**
O. Williams, L. Świerkowski, A. Huber, J. Norman, G. Goldsmith II, W. Herald

**Emissive infrared projector temperature resolution limiting factors [5408-23]**
L. Świerkowski, R. Joyce, O. Williams

**Formalization and real-time implementation of spatial calibration for a projection system [5408-24]**
B. Sieglinger, D. Flynn, W. Herald, R. Thompson

**Combined calibration and nonuniformity correction of a sensor for improved projector nonuniformity correction [5408-25]**
B. Sieglinger, D. Flynn, R. Sisko, G. Goldsmith II, R. Thompson, W. Meshell, J. Norman
Volume 5420 Modeling, Simulation, and Calibration of Space-based Systems

Chair/Editor: Pejmun Motaghedi

Conference Committee

Introduction

SESSION 1
ISS-RELATED ANALYSIS AND MODELING

Centrifuge rotor integrated analysis [5420-1]
K. Ohtomi, T. Kanzawa, R. Hampton, O. Kawamoto

International Space Station rate gyro alignment estimation [5420-2]
D. Anderson

SESSION 2
DEFENSE APPLICATIONS

Requirements for modeling and simulation of space RSTA assets [5420-5]
R. Livingston, Jr.

Space-based radar representation in the advanced warfighting simulation (AWARS) [5420-6]
A. Phend, K. Buckley, S. Elliott, P. Stanley, P. Shea, J. Rutland

SimBox: a simulation-based scalable architecture for distributed command and control of spaceport and service constellations [5420-7]
G. Prasad, S. Jayaram, J. Ward, P. Gupta

Coulomb repulsion and the electron beam directed energy weapon [5420-8]
M. Retsky

Re-entry plasma induced pseudorange and attenuation effects in a GPS simulator [5420-9]
D. Frankel, P. Nebolsine, M. Miller, J. Glynn

SESSION 3
MODELING METHODOLOGIES AND APPLICATIONS

Toolkit for remote-sensing analysis, design, evaluation, and simulation [5420-11]
B. McComas

Space-based optical system performance evaluation with integrated modeling tools [5420-12]
M. Lieber

Dynamic simulation of ray tracing for jitter and drift analysis [5420-13]
S. Wassom, B. Crowther

End-to-end modeling of the ozone mapping and profiler suite [5420-14]
B. McComas, C. Seftor, Q. Remund, J. Larsen, C. Wright, E. Raine

Automated rendezvous and capture system development and simulation for NASA [5420-15]
F. Roe, R. Howard, L. Murphy

Human health risk assessment simulations in a distributed environment for shuttle launch [5420-18]
R. Thirumalainambi, J. Bardina

Web-based toxic gas dispersion model for shuttle launch operations [5420-19]
J. Bardina, R. Thirumalainambi
SESSION 1
NAVIGATION AND PERCEPTION I

Multiperspective mosaics for under-vehicle inspection [5422-1]
A. Koschan, J. Ng, M. Abidi

FLEXnav: a fuzzy logic expert dead-reckoning system for the Segway RMP [5422-2]
L. Ojeda, M. Raju, J. Borenstein

Enhancement of stereo at range discontinuities [5422-4]
A. Ansar, A. Huertas, L. Matthis, S. Goldberg

Registering multisensor datasets from a robotic inspection platform [5422-5]
F. Boughorbel, A. Koschan, M. Abidi

SESSION 2
NAVIGATION AND PERCEPTION II

Toward fusion of camera-based egomotion and inertial navigation for a UGV (unmanned ground vehicle) traversing natural terrain [5422-8]
G. Haas, W. Oberle

Robust perception algorithms for road and track autonomous following [5422-9]
V. Marion, O. Lecointe, C. Lewandowski, J. Morillon, R. Aufrère, B. Marcotegui, R. Chapuis, S. Beucher

Adaptive representation for dynamic environment, vehicle, and mission complexity [5422-10]
J. Collier, B. Ricard, B. Digney, D. Cheng, M. Trentini, B. Beckman

3D scene reconstruction: why, when, and how? [5422-11]

SESSION 3
BIOLOGICALLY INSPIRED ROBOTS

A principled approach to bio-inspired design of legged locomotion systems [5422-13]
D. Koditschek, R. Full, M. Buehler

Future technology vision for unmanned ground vehicles (UGVs) [5422-14]
M. Stone, J. Blitch, A. Rudolph

The VIPER project (Visualization Integration Platform for Exploration Research): A biologically inspired autonomous reconfigurable robotic platform for diverse unstructured environments [5422-15]
O. Schubert, C. Tolle

Improved mobility in a multi-degree-of-freedom unmanned ground vehicle [5422-16]
M. Blackburn, R. Bailey, B. Lytle

Series elastic actuators for legged robots [5422-17]
J. Pratt, B. Krupp

The development of a lightweight modular compliant surface bio-inspired robot [5422-18]
D. Stone, J. Cranney
SESSION 4
NAVIGATION AND PERCEPTION III

PRIMUS: autonomous navigation in open terrain with a tracked vehicle [5422-20]
G. Schaub, A. Pfaendner, C. Schaefer

Active vision and image/video understanding systems for UGV based on network-symbolic models [5422-21]
G. Kuvich

vSLAM: vision-based SLAM for autonomous vehicle navigation [5422-22]

Intelligent onboard TV system TELAN [5422-23]
A. Antonov

SESSION 5
HUMAN-MACHINE INTERFACE I

UGV technology for urban navigation [5422-24]
H. Christensen, J. Folkesson, A. Hedström, C. Lundberg

Agent-based human-robot interaction of a combat bulldozer [5422-25]
R. Granot, M. Feldman

Navigation supervisory control for small UGVs [5422-26]
G. Witus

A framework for the natural-language-perception-based creative control of unmanned ground vehicles [5422-27]
M. Ghaffari, X. Liao, E. Hall

SESSION 6
SMALL ROBOTS

PackBot: a versatile platform for military robotics [5422-29]
B. Yamauchi

RSTA sensor integration onto PackBot for urban operations [5422-30]
S. Young, P. Martin

Next-generation emergency response robots [5422-31]
F. Buzan, G. Paul, S. Dunten, W. Kennedy, J. Dietsch

TACOM-USU intelligent mobility program [5422-32]
K. Moore, G. Gerhart

Collaborative robot sniper detection demonstration in an urban environment [5422-33]
P. Martin, S. Young

Application of radio control cars as intelligent unmanned ground vehicles with collaborative and independent behavior [5422-35]
S. Wasson, J. Kouns, S. Bruder, K. Wedeward, A. El-Osery

SESSION 7
FCS AND OBJECTIVE FORCE WARRIOR

UGVs in future combat systems [5422-37]
S. Fish

Future combat systems armed robotic vehicle [5422-38]
J. Larson, L. McTamaney

Technology readiness level six and autonomous mobility [5422-43]
B. Bodt, R. Camden
SESSION 8
HUMAN-MACHINE INTERFACE II

Controlling the autonomy of a reconnaissance robot [5422-45]
A. Dalgalarrondo, D. Dufourd, D. Filliat

Leader-follower function for autonomous military convoys [5422-46]
L. Vasseur, O. Lecointe, J. Dento, N. Cherfaoui, V. Marion, J. Morillon

JAUS Operator Control Unit (OCU) interoperability experiment: preparation and results [5422-47]
S. Gray, J. Harrison, B. Smith

SESSION 9
JOINT ROBOTICS PROGRAM

Tactical force protection [5422-48]
E. Stockel, J. Moneyhun

Enhancing functionality and autonomy in man-portable robots [5422-49]
E. Pacis, H. Everett, N. Farrington, D. Bruemmer

Unmanned ground vehicles for integrated force protection [5422-50]
D. Carroll, K. Mikell, T. Denewiler

Robotics for port security [5422-51]
W. Smuda, L. Freiburger, G. Gerhart, L. Mallon

Specifying autonomy levels for unmanned systems: interim report [5422-52]
H. Huang, J. Albuis, E. Messina, R. Wade, R. English

Collaborative engagement [5422-53]
R. Wade, J. Reames

Modular mission payload architecture [5422-54]
C. Armstrong

Project Stork UAV/UGV collaborative initiative [5422-55]
T. Schulteis, J. Price

Shaping future Naval warfare with unmanned systems, the impact across the fleet, and joint considerations [5422-56]
E. Hudson, G. Johnson, D. Summey, H. Portmann, Jr.

SESSION 11
ROUGH TERRAIN MOBILITY

High-speed hazard avoidance for mobile robots in rough terrain [5422-58]
M. Spenko, K. Iagnemma, S. Dubowsky

Novel mobility platforms utilizing intelligent algorithms [5422-59]
M. Trentini, B. Beckman, B. Digney, J. Collier

Multihorizon reactive and deliberative path planning for autonomous cross-country navigation [5422-60]
K. Kluge, M. Morgenthaler

T-transformation: traversability analysis for navigation on rugged terrain [5422-61]
C. Ye, J. Borenstein

On-the-fly assessment of terrain effects on UGV handling [5422-63]
R. Karlsen, G. Witus, J. Overholt

Defence R&D Canada’s autonomous intelligent systems program [5422-64]
Applications suitable for unmanned and autonomous missions utilizing the Tactical Amphibious Ground Support (TAGS) platform [5422-65]
P. Lewis, M. Torrie, P. Omilon

A vehicle-terrain system modeling and simulation approach to mobility analysis of vehicles on soft terrain [5422-66]
W. Pan, Y. Papelis, Y. He

POSTER SESSION

Reflection shearography for nondestructive evaluation [5422-67]

Triple-lines approach to calibration of a camera mounted in an intelligent vehicle [5422-68]
Q. Li, N. Zheng, X. Zhang

SAFER vehicle inspection: a multimodal robotic sensing platform [5422-69]

Developing detailed a priori 3D models of large environments to aid in robotic navigation tasks [5422-70]
B. Grinstead, A. Koschan, M. Abidi

Stereo-camera-based automatic target tracking system in the unmanned ground vehicle [5422-71]
J. Lee, J. Ko, K. Lee, J. Jang, E. Kim

Development of a virtual mobile robot laboratory [5422-73]
H. Singh, H. Singh, J. Raj, G. Gerhart

Autonomous vehicle platforms from modular robotic components [5422-75]
W. Schonlau

Control system and laser-based sensor design of an autonomous vehicle for industrial environments [5422-76]
J. Sanchiz, J. Badenas, F. Pla

Volume 5423 Enabling Technologies for Simulation Science VIII

Chairs/Editors: Dawn A. Trevisani, Alex F. Sisti

Conference Committee

SESSION 1

MODEL COMPOSABILITY: PROBLEMS, PROGRESS, AND PROSPECTS

Prospects for composability of models and simulations [5423-1]
P. Davis, R. Anderson

A methodology for integrative multimodeling: connecting dynamic and geometry models [5423-2]
M. Park, P. Fishwick

Rethinking families of models and games for new circumstances [5423-3]
P. Davis
SESSION 2
M&S FOR COURSE-OF-ACTION GENERATION AND ASSESSMENT

Mining simulation data for insights about a decision space: application to an urban combat COA [5423-4]
B. Chandrasekaran, J. Josephson, J. O'May, E. Heilman, R. Kaste

An approach to effects-based modeling for wargaming [5423-5]
W. Mckeever, Jr., D. Gilmour, R. Hillman

Simulation-based planning for theater air warfare [5423-6]
D. Popken, L. Cox, Jr.

Dynamic course-of-action analysis [5423-7]
M. Curry, J. Stucklen, B. Sexton

Constructing adversarial models for threat/enemy intent prediction and inferencing [5423-8]
E. Santos, Jr., A. Negri

SESSION 3
COGNITIVE INFLUENCES AND EFFECTS IN DECISION-MAKING

Toward a synthesis of paradigms for decision support [5423-9]
M. Egner, P. Davis

Cognitive architectures, rationality, and next-generation AI: a prolegomenon [5423-12]
P. Bello, S. Bringsjord, Y. Yang

Cognitive/emotional models for human behavior representation in 3D avatar simulations [5423-13]
J. Peterson

SESSION 4
MODELING AND DETECTING DECEPTIVE INFORMATION

Advances in automated deception detection in text-based computer-mediated communication [5423-15]
M. Adkins, D. Twitchell, J. Burgoon, J. Nunamaker, Jr.

Toward detecting deception in intelligent systems [5423-17]
E. Santos, Jr., G. Johnson, Jr.

Cognitive hacking and intelligence and security informatics [5423-18]
P. Thompson

SESSION 5
M&S FOR NATIONAL DEFENSE: REQUIREMENTS, ISSUES, AND CAPABILITIES

Maritime homeland security modeling: Coast Guard issues and perspective [5423-19]
T. Girton, K. Downer

SESSION 6
TECHNOLOGY FOR WARGAMING SUPPORT

The road ahead for wargaming: the why and how of achieving the next generation of wargaming [5423-22]
M. Caffrey, Jr.

Theoretical foundations for rational agency in third-generation wargames [5423-23]
P. Bello

Warcon: a wargame construction toolset for military simulations [5423-24]
D. Fu, R. Houlette

The implementation of AI technologies in computer wargames [5423-25]
J. Tiller

Cyberwar XXI: quantifying the unquantifiable: adaptive AI for next-generation conflict simulations [5423-26]
J. Miranda, P. von Kleinsmid, T. Zalewski
SESSION 7
DEALING WITH COMPLEXITY IN SIMULATION

XML-based resources for simulation [5423-27]
R. Kelsey, J. Riese, G. Young

An automated parallel simulation execution and analysis approach [5423-28]
J. Dallaire, D. Green, J. Reaper

Multiple strategy generation for wargaming [5423-29]
T. Revello, R. McCartney, E. Santos, Jr.

Integrated development of light armored vehicles based on wargaming simulators [5423-30]
M. Palmarini, J. Rapanotti

SESSION 8
HIGH-PERFORMANCE COMPUTING APPLICATIONS FOR M&S

Toward accelerated line-of-sight intervisibility calculations using clusters of GPUs [5423-31]
G. Schiavone, J. Tracy, E. Woodruff, M. Gerber, T. Dere, J. de la Cruz

SIMPAR: a portable object-oriented simulation-science-based metamodel framework for performance modeling, prediction, and evaluation of HPC systems [5423-32]
G. Prasad, P. Gupta

Spatial multibody modeling and vehicle dynamics analysis of advanced vehicle technologies [5423-33]
M. Letherwood, D. Gunter, D. Gorsich, T. Udvare

SESSION 9
M&S VALIDATION AND TESTING

Creating a flexible environment for testing scientific software [5423-35]
M. Smith, R. Kelsey, J. Riese, G. Young

SESSION 10
JOINT SYNTHETIC BATTLESPACE (JSB)

Analysis of technical alternative technologies for the development of context-driven composable environmental representations for JSB [5423-37]
J. Hummel, J. Bergenthal, W. Seng, J. Moulton, S. Prager

JSB composability and web services interoperability via extensible modeling and simulation framework (XMSF) and model driven architecture (MDA) [5423-38]
D. Brutzman, A. Tolk

A flexible simulation environment for command and control [5423-39]
D. Trevisani, T. Busch, A. Sisti

Full-spectrum CSE prototype for sensor analysis [5423-40]
J. Kester

Complex simulation system infrastructure supporting composability and performance [5423-41]
M. Dorsch, B. Hannibal, V. Skowronski, J. Wallace
SESSION 11
COLLABORATIVE DECISION SUPPORT SYSTEMS AND ENVIRONMENTS

The collaboration grid: trends for next-generation distributed collaborative environments [5423-42]
W. McQuay

Multidomain operations science and technology [5423-43]
M. Kochan, T. Farrell

Architecture for a simulation assembly language supporting sequential, distributed, and hardware operational modes [5423-44]
J. Lee, P. Fishwick

Virtual collaboration: face-to-face versus videoconference, audioconference, and computer-mediated communications [5423-45]
L. Wainfan, P. Davis

Collaborative effects-based planning using adversary models and target set optimization [5423-46]
N. Pioch, T. Daniels, B. Pielech

An application of JBI technology to distributed simulation [5423-47]
T. Broadstock

SESSION 12
ENTERPRISE MODELING APPLICATIONS AND TECHNIQUES

End-to-end network models encompassing terrestrial, wireless, and satellite components [5423-48]
C. Boyarko, J. Britton, P. Flores, C. Lambert, J. Pendzick, C. Ryan, G. Shankman, R. Williams

Using detailed inter-network simulation and model abstraction to investigate and evaluate joint battlespace infosphere (JBI) support technologies [5423-49]
D. Green, J. Dallaire, J. Reaper

SimBOX: a scalable architecture for aggregate distributed command and control of spaceport and service constellation [5423-50]
G. Prasad, S. Jayaram, J. Ward, P. Gupta

SESSION 13
SIMULATION ENVIRONMENTS AND FRAMEWORKS

A customizable approach to visual programming using dynamic multimodeling [5423-51]
H. Shim, P. Fishwick

Integration and cooperation of Army logistics simulations for multiphased military deployments [5423-52]

Software framework in support of dynamic situation assessment and predictive capabilities for JSB-RD [5423-55]
R. McGraw, C. Lammers, J. Steinman
Volume 5424 Enhanced and Synthetic Vision 2004

Chair/Editor: Jacques G. Verly

Conference Committee

Introduction

SESSION 1
ENHANCED AND SYNTHETIC VISION I

World-wide precision airports for SVS [5424-1]
J. Schiefele, B. Lugsch, M. Launer, D. Baca

Pathway concepts experiment for head-down synthetic vision displays [5424-2]
L. Prinzel III, J. Arthur III, L. Kramer, R. Bailey

Radar PAPIs: human factor issues of EVS landing aids [5424-3]
B. Korn, B. Lorenz, H. Többen, H. Döhler, P. Hecker

PC-based generation of real-time realistic synthetic scenes for low-altitude flights [5424-5]
E. Yilmaz, H. Maras, Y. Yardimci

SESSION 2
ENHANCED AND SYNTHETIC VISION II

Transferring color to single-band intensified night vision images [5424-6]
A. Toet

Human factors flight trial analysis for 2D/3D SVS [5424-7]
J. Schiefele, D. Howland, J. Maris, P. Wipflinger

Pathway design effects on synthetic vision head-up displays [5424-8]
L. Kramer, L. Prinzel III, J. Arthur III, R. Bailey

A new color, IR, and radar data fusion for obstacle detection and collision warning [5424-9]
N. Yonemoto, K. Yamamoto, K. Yamada

SESSION 3
ENHANCED AND SYNTHETIC VISION III

Experienced pilot flight tests comparing conventional instrumentation and a synthetic vision display for precision approaches [5424-11]
R. Davis, D. Wilt, J. Herion, K. Alter, P. Snow, C. Jennings, A. Barrows

Crew coordination issues of EVS approaches [5424-12]
B. Lorenz, B. Korn

Latency requirements for head-worn display S/EVS applications [5424-13]
R. Bailey, J. Arthur III, S. Williams

S. Young, M. Uijt de Haag, J. Campbell
SESSION 4
ENHANCED AND SYNTHETIC VISION IV

Enhancing pilot situation awareness by using an onboard taxi guidance system: an empirical study [5424-16]
B. Lorenz, M. Biella, J. Jakobi

A video-based system and method for improving aircraft security [5424-17]
S. Ebenstein, G. Smith, N. Zorka, Y. Rodin, T. Meitzler

Autonomous infrared-based guidance system for approach and landing [5424-18]
H. Döhler, B. Korn

Multisensor image fusion and mining: learning targets across extended operating conditions [5424-19]
D. Fay, A. Waxman, R. Ivey, N. Bomberger, M. Chiarella

Processing system for an enhanced vision system [5424-20]
D. Yelton, K. Bernier, J. Sanders-Reed

Computationally efficient contrast enhancement algorithm suitable for real-time digital hardware [5424-22]
D. Droege, J. Forsthofel, R. Hardie

POSTER SESSION

Computer simulator for training operators of thermal cameras [5424-10]
K. Chrzanowski, M. Krupski

Volume 5430 Acquisition, Tracking, and Pointing XVIII

Chairs/Editors: Michael K. Masten, Larry A. Stockum

Conference Committee

Introduction

SESSION 1
SYSTEM DESIGN, STABILIZATION, AND CONTROL TECHNIQUES

Development of a feed-forward controller for a tracking telescope [5430-1]
J. Allen, J. Stufflebeam, D. Feller

A comparison of inertial line-of-sight stabilization techniques using mirrors [5430-2]
J. Hilkert

Tracking and interception of ground-based RF sources using autonomous guided munitions with passive bearings-only sensors and tracking algorithms [5430-3]
K. Ezal, C. Agate

Integration, alignment, testing, and field support of a multisensor system [5430-4]
S. Hall

New Ball Aerospace star tracker achieves high tracking accuracy for a moving star field [5430-5]
D. Michaels, J. Speed
SESSION 2
TARGET ACQUISITION AND TRACKING

Empirical comparison of two least-squares methods for computing image shift with application to correlation tracking [5430-7]
J. Albus, P. Hoang

Detection and tracking with a hemispherical optical sensor tracker (HOST) [5430-23]
J. Sanders-Reed, T. Kreifels, L. Mueller, K. Patrick

Tomographic scanning imaging seeker [5430-10]
H. Hovland

SESSION 3
TARGET TRACKING CONTROL LAWS

A comparison of particle filters and multiple-hypothesis extended Kalman filters for bearings-only tracking [5430-11]
D. Zaugg, A. Samuel, D. Waagen, H. Schmitt

Multitarget multisensor closed-loop tracking [5430-12]
J. Sanders-Reed

A methodology for adaptive scheduling of radar intervals based on a cost-function methodology [5430-13]
J. Gray, A. Smith-Carroll, C. Zaffram

Using prior information to enhance tracking [5430-14]
P. Day, P. Bladon

A PMHT algorithm for active sonar [5430-15]
C. Hempel, S. Doran

On the performance and consistency of a noninteractive multiple-model filter [5430-16]
A. Alouani, J. Gray

Scene-dependent harmonization of aircraft vision systems [5430-18]
B. Lambert, J. Ralph, S. Sims, L. Wren, D. Dwyer

Multiscale differential fractal feature with application to target detection [5430-20]
Z. Shi, Y. Wei, S. Huang

Sensor management in RADAR/IRST track fusion [5430-21]
S. Hu, Z. Jing
Volume 5442 Helmet- and Head-Mounted Displays IX: Technologies and Applications

Chairs/Editors: Clarence E. Rash, Colin E. Reese

Conference Committee

SESSION 1
NVG-I

Aircrew visual acuity viewing with different night vision goggle eyepiece diopter settings [5442-1]
S. Angel, J. Baldwin

Psychophysical measurement of night vision goggle noise using a binocular display [5442-2]
G. Reis, P. Marasco, P. Havig, E. Heft

Validation of synthetic imagery for night vision devices [5442-3]

Detection of motion-defined form under simulated night vision conditions [5442-4]
T. Macuda, R. Allison, P. Thomas, G. Craig, S. Jennings

Effects of saturation contrast on color recognition in night vision goggles [5442-5]
P. Havig, P. Marasco, D. Post, H. Ellwanger, G. Reis

SESSION 2
NVG-II

Night vision goggle luminance disparity and the Pulfrich phenomenon [5442-6]
A. Pinkus, H. Task

The impact of changing night vision goggle spectral response on night vision imaging system lighting compatibility [5442-7]
H. Task, P. Marasco

Comparison of Topas cyclic olefin copolymers to BK7 glass in night vision goggle objectives [5442-8]
J. Stevens

AMOLED image source for use in integrated panoramic night vision goggle (IPNVG) [5442-9]
J. Ross, V. Parisi

SESSION 3
HMD APPLICATIONS

Helmet-mounted displays for unmanned aerial vehicle control [5442-10]
M. Morphem, J. Shively, D. Casey

Projection-based head-mounted displays for wearable computers [5442-11]
R. Martins, V. Shaoulov, Y. Ha, J. Rolland

Helmet-mounted sensor fusion ATR for the dismounted soldier [5442-12]
P. Topiwala, D. Casasent

Near-to-eye display concepts for air traffic controllers [5442-13]
J. Ruffner, J. Fulbrook, M. Foglia

Safe-to-fly determination for the helmet-mounted little high-end airborne laptop (Lil HAL) system [5442-14]
M. Simpson, D. Franck

Lil HAL: digital kneeboard for ejection seat aircraft [5442-15]
V. Parisi
SESSION 4
HMD ISSUES: HEAD TRACKING, SYMBOLOGY, AND USER ACCEPTANCE

Adaptive magnetic tracker: a revolution in electromagnetic tracker technology [5442-16]
Y. Kranz, G. Kornblau, S. Stokar

Helmet-mounted tracker system accuracy measurements [5442-17]
V. Parisi

Helmet-mounted display symbology for enhanced trend and attitude awareness [5442-18]
J. Jenkins, D. Sheesley, F. Bivetto

AH-64 IHADSS aviator vision experiences in Operation Iraqi Freedom [5442-19]
K. Hiatt, C. Rash, E. Harris, W. McGilberry

SESSION 5
TEST AND EVALUATION

Quantification of parallax in dual-sensor systems [5442-20]
S. Moore

Laboratory system for the evaluation of helmet-mounted displays [5442-21]
H. Beasley, T. Harding, J. Martin, C. Rash

Flight simulator evaluation of display media devices for synthetic vision concepts [5442-22]
J. Arthur III, S. Williams, L. Prinzel III, L. Kramer, R. Bailey

Day/night ANVIS/HUD-24 (day HUD) flight test and pilot evaluations [5442-24]
Z. Yona, B. Weiser, O. Hamburger

SESSION 6
DISPLAYS-OPTICS

Methods for eliminating bright point emissions from liquid crystal microdisplays [5442-25]
P. Marasco

Magnifying miniature displays with microlenslet arrays [5442-26]
V. Shaoulov, R. Martins, J. Rolland

Optical modeling of a holographic single-element head-mounted display [5442-27]
Y. Ha, V. Smirnov, L. Glebov, J. Rolland

Partial-overlap biocular image misalignment tolerance [5442-28]
M. Kalich, L. Lont, C. van de Pol, C. Rash

Potential see-through performance deficits in U.S. Army developmental helmet-mounted displays [5442-29]
T. Harding, C. Rash

Active matrix OLED for rugged HMD and viewfinder applications [5442-30]
K. Low, S. Jones, O. Prache, D. Fellowes

CRTs: electrostatic focusing systems for performing Laminar electron gun [5442-31]
A. Abgarian

A new normally black high-contrast wide symmetrical viewing angle AMLCD for military head-mounted displays (HMDs) and other viewer applications [5442-32]
H. Ong, O. Woodard, N. Cheong, C. Reese
SESSION 1
DISPLAYS TRACK KEYNOTE PAPERS

Challenges and considerations for the design and production of a purpose-optimized body-worn wrist-watch computer [5443-1]
C. Narayanaswami, M. Raghunath

Preproduction display R&D facility: a framework for developing flexible display systems reducing the war-fighters' load [5443-3]
F. Zenhausern, G. Raupp

Roadmap for implementing network-centric capability for military aircrews [5443-2]
E. Hitt

Macroelectronics: large-area flexible electronics for sensors, displays, and other applications [5443-31]
A. Firester

SESSION 2
PERFORMANCE ISSUES IN DISPLAY SYSTEMS

Warfighter feedback on large-area displays in C2 environments [5443-4]
R. Alvarez, P. Jedrysik, F. Parada

A new approach to display quality assurance [5443-5]
J. Harshbarger

AFRL battlespace visualization branch display characterization facility [5443-6]
S. Fullenkamp, D. Aleva, F. Meyer, R. Schwartz, T. Trissell

Mobile visual communications and displays [5443-7]
G. Valliath

SESSION 3
AIRCRAFT COCKPIT INSTRUMENT PANEL APPLICATIONS

8×10 Advanced Multipurpose Display: lessons learned from integrating a large-area display into a fighter aircraft [5443-9]
R. Carter, R. Warden

Military applications of a cockpit-integrated electronic flight bag [5443-10]
R. Herman, R. Seinfeld

Military display market segment: helicopters [5443-11]
D. Desjardins, D. Hopper
SESSION 4
DEFENSE DISPLAY INTEGRATION AND MANUFACTURING

*Custom AMLCD with integrated heater, EMI shield, temperature sensors for avionics, ground vehicle, and automotive applications [5443-12]*
J. Niemczyk

**OLED displays in military applications [5443-14]**

*A large-area integrated display solution for the expeditionary fighting vehicle [5443-38]*
J. Thomas, B. Fava

SESSION 5
AIRCRAFT COCKPIT HEAD UP DISPLAYS (HUDS)

*Rugate coatings for an avionics head-up display [5443-15]*
S. Allan, B. Herrington, C. Cole, K. Mackrodt, T. Slim, D. Lingwood

**Calibration process for head-up display: test set-up [5443-16]**
R. Mishra

**Performance assessment of an LCOS-based head-up display [5443-17]**
R. Brown, D. Modro, G. Quast, D. Wallace, M. Vancleef, R. Wood

*A laser-illuminated head-up display [5443-18]*
C. Bartlett

SESSION 6
FUTURE DIRECTIONS FOR DISPLAY RESEARCH

*AM OLED using a-Si TFT backplane on flexible plastic substrate [5443-23]*
K. Sarma, J. Schmidt, J. Roush, C. Chanley, S. Dodd

**Applications and status of OLED technology relative to mobile product requirements [5443-19]**
M. Hack, A. Chwang, M. Lu, R. Kwong, M. Weaver, Y. Tung, J. Brown

**Low-power cholesteric LCDs and electronic books [5443-20]**
A. Khan, X. Huang, J. Doane

SESSION 7
VISUALIZATION ENABLING TECHNOLOGY

*Polymer light guide arrays for tiling large-scale displays [5443-26]*
M. Lamvik, S. Grego, R. LaBennett, D. Temple

**D-ILA technology for simulator applications [5443-28]**
F. Gruendell, W. Bleha, R. Sterling

**Ultraresolution display systems for computational science and engineering [5443-29]**
B. Pailthorpe, N. Bordes

**Phase space and radiometric ray tracing [5443-27]**
T. Jannson, M. Bennahmias
SESSION 8
NOVEL DISPLAY TECHNOLOGY

Advanced metrics-based design methodology for multilayer 3D displays [5443-21]
G. Bell

Optical implementation of real-time incoherent 3D imaging and display system using modified triangular interferometer [5443-22]
S. Kim, S. Lee, E. Kim

Wrist display concept demonstration based on 2-in. color AMOLED [5443-36]
F. Meyer, S. Longo, D. Hopper

Tactile displays for enhanced performance and safety [5443-41]
H. Castle, T. Dobbins

Personal viewer: a wide-field low-profile see-through eyewear display [5443-42]
W. Schonlau

SESSION 9
ADVANCED AVIONICS, MODELING, AND MEASUREMENT TECHNOLOGY

Extending MIL-STD-1553 bandwidth: a study of impairments, EMI, and channel capacity [5443-24]
M. Hegarty

Use of computer-modeling to minimize the testing of HUDs for birdstrikes [5443-34]
C. Constantinou

Methods for assessing display measurement capabilities [5443-40]
P. Boynton
