Volume 4379 Automatic Target Recognition XI

SESSION 1
LADAR ATR SYSTEMS AND PERFORMANCE

Asymptotic target recognition performance for FLIR and ladar systems [4379-2]
B. Yen, J. Shapiro

Automatically scoring ladar detectors using target descriptors [4379-3]
A. Bergman, D. DeKruger

Detection and recognition in ladar with invariants and covariants [4379-4]
D. Arnold, K. Sturtz, I. Weiss

Mobile target ladar ATR system [4379-5]
J. Hodge, D. DeKruger, A. Park

SESSION 2
LADAR ALGORITHMS

Three-dimensional correlation filters for orientation invariant recognition [4379-6]
A. Mahalanobis, B. Kumar, A. Van Nevel

Sequential correlation [4379-7]
K. Schweiker, M. Mayercik

Hybrid fuzzy-neural classifier for feature level data fusion in ladar autonomous target recognition
S. Soliday, M. Perona, D. McCauley

Results of ladar ATR captive flight testing experiments [4379-10]
T. Cook

SESSION 3
LADAR PREPROCESSING

Coding theoretic approach to segmentation and robust CFAR-detection for ladar images [4379-13]
U. Ndili, R. Baraniuk, H. Choi, R. Nowak, M. Figueiredo

Benchtop methodology for evaluating the automatic segmentation of ladar images [4379-14]
G. Power

Automatic registration of sequential ladar imagery [4379-15]
A. Van Nevel

SESSION 4
ADAPTATION AND LEARNING TECHNIQUES IN ATR SYSTEMS

Multisensor target detection using adaptive feature-based fusion [4379-18]
H. Kwon, S. Der, N. Nasrabad

Grouping multiple neural networks for automatic target recognition in infrared imagery [4379-19]
B. Correia, R. Nunes
Target identification using Zernike moments and neural networks [4379-20]
M. Azimi-Sadjadi, A. Jamshidi, A. Nevis

SESSION 5
INFRARED SIGNAL PROCESSING IN ATR

New experiments in the use of infrared polarization in the detection of small targets [4379-21]
F. Sadjadi, C. Chun

Target characterization by using B-spline curves for infrared image segmentation algorithms evaluation [4379-22]
J. Caporossi, P. Bolon, J. Blanc-Talon

Knowledge-based recognition algorithm for long-range infrared bridge images [4379-23]
Z. Cao, Q. Sun, T. Zhang

Regression model for prediction of IR images [4379-24]
A. Srivastava, B. Thomasson, S. Sims

Improved target detection algorithm using dualband infrared imagery [4379-25]
L. Chan, S. Der, N. Nasrabadi

SESSION 6
RADAR PROCESSING IN ATR I

Information divergence measure for ISAR image registration [4379-26]
Y. He, A. Hamza, A. Krim

Using support vector machines as HRR signature classifiers [4379-27]
J. Ma, H. Li, S. Ahalt

Improving HRR ATR performance at low-SNR by multilook adaptive weighting [4379-29]
D. Nguyen, J. Kay, B. Orchard, G. Benitz, R. Whiting

Validation of a chi2 model of HRR target RCS variability and verification of the resulting ATR performance model [4379-30]
C. Holt, J. Attili, S. Schmidt

ATR discrimination-SNR for HRR assuming chi2 model of RCS variability [4379-31]
C. Holt, S. Schmidt, J. Attili

SESSION 7
RADAR PROCESSING IN ATR II

Automatic classification of minelike targets buried underground using time-frequency signatures extracted by a stepped-frequency radar [4379-33]
H. Strifors, A. Gustafsson, S. Abrahamson, G. Gaunaudr

Nonlinear feature extraction applied to ISAR images of targets for classification [4379-34]
G. Maskall, A. Webb

HRR ATR performance enhancement at low-SNR using beamspace HDI [4379-35]
D. Nguyen, G. Benitz, J. Kay, B. Orchard, R. Whiting
SESSION 8
TRACKING AND CLASSIFICATION

Three-dimensional pattern recognition: algorithms and systems [4379-36]
B. Javidi, E. Tajahuerce

Acquisition and analysis of X-band moving target signature data using a 160-GHz compact range
R. Giles, H. Neilson, D. Healy, T. Grayson, R. Williams, W. Nixon

Group target tracking using game theory [4379-37]
F. Sadjadi, W. Kober

Target classification via labeling of subtarget motion patterns [4379-38]
F. Sadjadi

Fast pattern recognizer for autonomous target recognition and tracking for advanced naval attack missiles [4379-39]
A. Hastbacka

Detection, recognition, identification, and tracking of military vehicles using biomimetic intelligence [4379-40]
P. Pace, J. Sutherland

SESSION 9
ATR SYSTEMS AND PERFORMANCE I

WAR HORSE (wide-area reconnaissance; hyperspectral overhead real-time surveillance experiment) [4379-42]
C. Stellman, F. Olchowski, J. Michalowicz

Consequences of preprocessing feature data for support vector machines [4379-43]
D. Gorsich, R. Karlsen, G. Gerhart

SESSION 10
ATR SYSTEMS AND PERFORMANCE II

Relationships between computational system performance and recognition system performance
M. DeVore, J. O'Sullivan, R. Chamberlain, M. Franklin

Performance prediction of vehicle detection algorithms [4379-45]
P. Klausmann, K. Kroschel, D. Willersinn

SESSION 11
TARGET CLASSIFICATION TECHNIQUES

Comparable performance for classifier trained on real or synthetic IR-images [4379-46]
B. Weber, J. Penn

Complexity of confidence level optimization in sequential automatic target detection of hyperspectral system [4379-48]
H. Haskett, A. Sood, M. Habib

Signature adaptive mine detection at a constant false alarm rate [4379-49]
F. Crosby, S. Riley
Vehicle size and orientation estimation using geometric fitting [4379-64]
C. Groenwall, M. Millnert

SESSION 12
ADVANCED ALGORITHMS: THEORY I

Eigen-extended maximum average correlation height (EEMACH) filters for automatic target recognition [4379-51]
B. Kumar, M. Alkanhal

Shape space object recognition [4379-54]
X. Zhang, J. Zhang, G. Walter, A. Krim

SESSION 13
ADVANCED ALGORITHMS: THEORY II

Target detection and classification using a deformable template [4379-55]
R. Dufour, E. Miller, N. Galatsanos

Comparison of Hausdorff distances performances in dissimilarity measurements for silhouette discrimination [4379-57]
O. Ruch, P. Refregier

Advanced detection and correlation-based automatic target recognition [4379-58]
A. Mahalanobis, R. Muise

SESSION 14
ADVANCED ALGORITHMS: APPLICATIONS I

Image-based aircraft pose estimation: a comparison of simulations and real-world data [4379-59]
M. Breuers, N. de Reus

Buried landmine detection using multivariate normal clustering [4379-60]
B. Duston

Rapid update of discrete Fourier transform for real-time signal processing [4379-61]
B. Sherlock, Y. Kakad

Rapid prototyping of update algorithm of discrete Fourier transform for real-time signal processing [4379-62]
Y. Kakad, B. Sherlock, K. Chatapuram, S. Bishop

Gradient-based genetic algorithms in image registration [4379-63]
I. Maslov, I. Gertner

SESSION 15
ADVANCED ALGORITHMS: APPLICATIONS II

Ship detection with an attention mechanism applied [4379-65]
Y. Wang, T. Zhang, G. Wang

Post interaural neural net-based vowel recognition [4379-66]
I. Jouny
Tumor detection using digital mammography [4379-67]
G. Preis, I. Jouny

SESSION 16
INFORMATION THEORY AND AUTOMATIC TARGET RECOGNITION

Classification of Gaussian data with sieve-regularized estimates [4379-69]
N. Schmid, J. O'Sullivan

Fisher information in transported generator clutter models [4379-70]
D. Bitouk, U. Grenander, M. Miller, P. Tyagi

ATR applications of minimax entropy models of texture and shape [4379-71]
S. Zhu, A. Yuille, A. Lanterman
MULTISENSOR MULTITARGET TRACKING AND FUSION

Multiple-model nonlinear filtering for low-signal ground target applications [4380-2]
C. Kreucher, K. Kastella

Multiple-model tracking with feedback [4380-4]
A. Alouani, T. Rice

Passive tracking scheme for a single stationary observer [4380-5]
Y. Chan, T. Rea

Multitarget tracking on intensity-modulated sensor data [4380-6]
R. Streit, M. Graham, M. Walsh

Target-type probability combining algorithms for multisensor tracking [4380-7]
T. Wigren

Naval air defense: multiple-model approach to the angular tracking and targeting of antiship missiles [4380-8]
D. Maltese

Track-to-track fusion in a multisensory environment [4380-9]
D. Gendron, M. Farooq, K. Benameur

Application of fuzzy logic to target tracking in a cluttered environment [4380-10]
A. Gad, M. Farooq, S. Midwood

ASSISTED TARGET RECOGNITION (ATR)

Unified generalized Bayesian accrual of evidence for robust ATR: new results [4380-11]

Target variability and exact signature reproduction requirements for Ka-band radar data [4380-14]
R. Giles, W. Kersey, M. McFarlin, R. Finley, H. Neilson, W. Nixon

Registration of SAR and FLIR images for fusion ATR applications [4380-15]
Y. Chen

Detecting landmines using weighted density distribution function features [4380-16]
R. Stanley, N. Theera-Umpon, P. Gader, S. Somanchi, D. Ho

Detection and recognition of vehicles in high-resolution SAR imagery [4380-18]
W. Roller, E. Peinsipp-Byma, A. Berger, E. Korres

Experimental results on detection and classification of buried objects [4380-19]
S. Guyonie

Feature detection and fusion for intelligent compression [4380-63]
P. Ducksbury, M. Varga
Automatic fusion of multiple-sensor and multiple-season images [4380-69]
V. Lutsiv, I. Malysh, V. Pepelka

SESSION 3
INVITED SESSION: MULTISENSOR FUSION METHODOLOGIES AND APPLICATIONS I

Multitarget filtering using a multitarget first-order moment statistic [4380-21]
R. Mahler, T. Zajic

Joint tracking, pose estimation, and target recognition using HRRR and track data: new results [4380-22]
T. Zajic, C. Rago, R. Mahler, M. Huff, M. Noviskey

Multitarget nonlinear filtering based on spectral compression and probability hypothesis density
A. El-Fallah, T. Zajic, R. Mahler, B. Lajza-Rooks, R. Mehra

Detecting, tracking, and classifying group targets: a unified approach [4380-24]
R. Mahler

Sequential detection of targets in distributed systems [4380-25]
A. Tartakovsky, X. Li, G. Yaralov

Particle filters for combined state and parameter estimation [4380-26]
H. Chan, M. Kouritzin

Practical application of a branching particle-based nonlinear filter [4380-27]
D. Ballantyne, J. Hoffman, M. Kouritzin

Optical path tracking in high-scintillation scenarios [4380-28]

Complexity reducing algorithm for near optimal fusion (CRANOF) with application to tracking and information fusion [4380-29]
D. Bamber, I. Goodman, W. Torrez, H. Nguyen

None-of-the-above (NOTA) capability for INTELL-based NCTI [4380-30]
E. Sorensen, R. Mahler, T. Brundage

Bayesian network using edge probabilities for target detection and recognition [4380-31]
R. Zhao, P. Kelly, H. Derin

User-defined information and scientific performance evaluation [4380-32]
J. Hoffman, R. Mahler, T. Zajic

SESSION 4
SITUATION ASSESSMENT AND RESOURCE MANAGEMENT

Fuzzy logic resource manager: tree structure and optimization [4380-33]
J. Smith, R. Rhyne

GMUGLE: A goal lattice constructor [4380-70]
K. Hintz

Scientific performance evaluation for distributed sensor management and adaptive data fusion
Self-organizing team formation for target observation [4380-36]
R. Bowyer, R. Bogner

Situation assessment and impact assessment activities in information fusion [4380-37]
M. Hinman

Human-computer interface for the study of information fusion concepts in situation analysis and command decision support systems [4380-38]
J. Roy, R. Breton, S. Paradis

Hierarchical adaptation scheme for multiagent data fusion and resource management in situation analysis [4380-71]
A. Benaskeur, J. Roy

Perceptual reasoning managed situation assessment and adaptive fusion processing [4380-40]
I. Kadar

SESSION 5
MULTISENSOR FUSION METHODOLOGIES AND APPLICATIONS II

Defining a fusion-gain system operation characteristic (SOC) curve based on probability of detection and probability of false alarms [4380-41]
E. Blasch, J. Hoffman, J. Petty

Evaluation of CFAR effects on adaptive Boolean decision fusion performance for SAR/EO change detection [4380-42]
M. Liggins

Signal-level fusion model for image-based change detection in DARPA's dynamic database system [4380-43]
M. Carlotto

Perceptual evaluation of different image fusion schemes [4380-44]
A. Toet, J. IJspeert

Force detection and identification system [4380-45]
M. Pagels, J. Gilmore

Multisensor fusion for improved air-to-ground target localization [4380-46]
M. Smith, E. Januarius, M. Bernhardt, D. Nicholson, G. Rees, J. Ralph

FRESNEL program: fusion of radar and electro-optical signals for surveillance on land [4380-47]
A. Theil, L. Kester, S. van den Broek, P. van Dorp, R. van Sweeden

Fusion of radar and EO sensors for surveillance [4380-48]
L. Kester, A. Theil

Results of the DRIVE I experiment for fusion of IR and radar data [4380-49]
C. Birkemark, J. Titley

Multisensor fusion in gastroenterology domain through video and echo endoscopic image combination: a challenge [4380-50]
R. Debon, C. Le Guillou, J. Cauvin, B. Solaiman, C. Roux
Utilizing a class labeling feature in an adaptive Bayesian classifier [4380-51]
R. Lynch, P. Willett

Tracking of moving objects in scenery using subspace projection using independent component analysis [4380-52]
B. Noe, F. Ham

Remote sensing through reduced Mueller matrix elements [4380-53]
J. Ellis, A. Dogariu

Facial expression recognition using constructive neural networks [4380-54]
L. Ma, K. Khorasani

Contrast-invariant dimensionless features [4380-55]
A. Melan, S. Rudolph

Increasing spatial resolution by using an image sequence [4380-56]
I. Andersson, L. Haglund, E. Roennqvist

Metropolis Monte Carlo deconvolution technique compared to iterative methods for noisy data [4380-57]
A. Amini, G. Ioup, J. Ioup

LED flicker pulsing [4380-58]
M. Johnson, P. Cote

Automatic eye tracking in video image sequence [4380-64]
K. Qian, G. Zhou, C. Hung, P. Bhattacharya, J. Liu

Generic reusable COTS multifunction radar monitor, recorder, and simulator unit [4380-65]
M. Sayid

Fluctuation-based technique for beamforming and auto detection [4380-68]
R. Wagstaff
Volume 4381 Algorithms for Multispectral, Hyperspectral, and Ultraspectral Imagery

SESSION 1
DETECTION AND IDENTIFICATION I

Spectral subspace matched filtering [4381-1]
A. Schaum

Hyperspectral adaptive matched-filter detectors: practical performance comparison [4381-2]
D. Manolakis, C. Siracusa, D. Marden, G. Shaw

Automatic target-recognition system for hyperspectral imagery using ORASIS [4381-3]
D. Gillis, P. Palmadesso, J. Bowles

Quantitative study of detection performance for LWIR hyperspectral imagers as a function of number of spectral bands [4381-5]
R. Mayer, R. Priest

SESSION 2
BAND SELECTION

Relationships between physical phenomena, distance metrics, and best-bands selection in hyperspectral processing [4381-6]
N. Keshava, P. Boettcher

Automated optimal channel selection for spectral imaging sensors [4381-7]
J. Gruninger, R. Sundberg, M. Fox, R. Levine, W. Mundkowsky, M. Salisbury, A. Ratcliff

Band selection for lossless image compression [4381-8]
S. Hunt, M. Velez-Reyes

Band selection from a hyperspectral data-cube for a real-time multispectral 3CCD camera [4381-9]
P. Withagen, E. den Breejen, E. Franken, A. de Jong, H. Winkel

SESSION 3
IMAGING SPECTROMETRY PROJECTS I

IKONOS technical performance assessment [4381-10]
M. Cook, B. Peterson, G. Dial, L. Gibson, F. Gerlach, K. Hutchins, R. Kudola, H. Bowen

Night vision imaging spectrometer (NVIS) calibration and configuration: recent developments [4381-11]
C. Simi, A. Hill, H. Kling, C. LaSota, J. Zadnik, J. Parish, J. Deaver

Night vision imaging spectrometer (NVIS) processing and viewing tools [4381-12]
C. Simi, R. Dixon, M. Schlangen, E. Winter, C. LaSota

Compact Airborne Spectral Sensor (COMPASS) [4381-13]
C. Simi, E. Winter, M. Williams, D. Driscoll

On-board processing for the COMPASS [4381-14]
C. Simi, E. Winter, M. Schlangen, A. Hill

Chemical imaging system: current status and challenges [4381-15]
A. Ifarraguirre, J. Jensen
SESSION 4
SPECTRAL APPLICATIONS AND METHODOLOGY I

Automated hyper/multispectral image analysis tool [4381-16]
J. Conant, K. Annen

ENVI-based hyperspectral/high-resolution panchromatic pitch yaw roll and georectification algorithm development [4381-17]
D. Miller

Efficient materials mapping for hyperspectral data [4381-18]
P. Lucey, M. Winter, E. Winter, D. Steutel

SESSION 5
MULTISPECTRAL THERMAL IMAGER I

Multispectral Thermal Imager: overview [4381-20]
W. Bell, P. Weber

Multispectral Thermal Imager (MTI) satellite hardware status, tasking, and operations [4381-21]
M. Decker, R. Kay, N. Rackley

MTI science, data products, and ground-data processing overview [4381-22]

Performance of the interactive procedures for daytime detection of dense clouds in the MTI pipeline [4381-23]
C. Rohde, K. Hirsch, A. Davis

Recipes for writing algorithms for atmospheric corrections and temperature/emissivity separations in the thermal regime for a multispectral sensor [4381-24]
C. Borel, W. Clodius

Observations and model predictions of water skin temperatures at MTI core site lakes and reservoirs [4381-25]
A. Garrett, R. Kurzeja, B. O'Steen, M. Parker, M. Pendergast, E. Villa-Aleman, M. Pagnutti

SESSION 6
SPECTRAL APPLICATIONS AND METHODOLOGY II

Evolving forest fire burn severity classification algorithms for multispectral imagery [4381-26]
S. Brumby, N. Harvey, J. Bloch, J. Theiler, S. Perkins, A. Young, J. Szymanski

Fusion of high-resolution lidar elevation data with hyperspectral data to characterize tree canopies [4381-27]
C. Miller

Integration of high-resolution DTED, hyperspectral data, and hypermedia data using the terrain analysis system [4381-28]
B. Leighty, J. Rinker
Analytic registration of spatially and spectrally disparate co-located imaging sensors achieved by matching optical flow [4381-29]
J. Schuler, J. Howard, D. Scribner, P. Warren, R. Klein, M. Satyshur, M. Kruer

SESSION 7
CLUSTERING AND CLASSIFICATION

Gibbs-based unsupervised segmentation approach to partitioning hyperspectral imagery for terrain applications [4381-30]
R. Rand, D. Keenan
Support vector machines for broad-area feature classification in remotely sensed images [4381-31]
S. Perkins, N. Harvey, S. Brumby, K. Lacker
Evaluation of matrix factorization method for data reduction and the unsupervised clustering of hyperspectral data using second-order statistics [4381-32]
E. Bosch, R. Rand

SESSION 8
SPECTRAL APPLICATIONS AND METHODOLOGY III

Statistics of hyperspectral imaging data [4381-35]
D. Manolakis, D. Marden, J. Kerekes, G. Shaw
Models for recognizing faces in hyperspectral images [4381-36]
G. Healey, Z. Pan, B. Tromberg
Examples of atmospheric characterization using hyperspectral data in the VNIR, SWIR and MWIR
H. Burke, M. Griffin, J. Snow, C. Upham, C. Richard
Finding the dimensionality of hyperspectral data [4381-38]
S. Kaewpijit, J. Le Moigne, T. El-Ghazawi

SESSION 9
DETECTION AND IDENTIFICATION II

Modeling of LWIR hyperspectral system performance for surface object and effluent detection applications [4381-39]
J. Kerekes, M. Griffin, J. Baum, K. Farrar
Characterization of gaseous effluents from modeling of LWIR hyperspectral measurements [4381-40]
M. Griffin, J. Kerekes, K. Farrar, H. Burke
Unsupervised target subpixel detection in hyperspectral imagery [4381-41]
C. Chang, Q. Du, S. Chiang, D. Heinz, I. Ginsberg
Object-level processing of spectral imagery for detection of targets and changes using spatial-spectral-temporal techniques [4381-42]
G. Hazel
Hyperspectral materials detection/identification/quantification using the residual correlation method [4381-43]
L. Hudgins, J. Hayashi, P. Blake, L. Tran, E. Kilday
SESSION 10
MULTISPECTRAL THERMAL IMAGER II

Recipes for writing algorithms to retrieve columnar water vapor for three-band multispectral data
C. Borel, K. Hirsch, L. Balick

Comparison of four methods for determining precipitable water vapor content from multispectral data [4381-45]
K. Hirsch, L. Balick, C. Borel, P. McLachlan

Ground-truth collections at the MTI core sites [4381-46]
A. Garrett, R. Kurzeja, M. Parker, B. O'Steen, M. Pendergast, E. Villa-Aleman

Multiscale thermal-infrared measurements of the Mauna Loa caldera, Hawaii [4381-47]

Semi-autonomous registration of satellite imagery using feature fitting [4381-48]
J. Smith, S. Motomatsu, J. Taylor, K. Jefferson, B. Stallard

SESSION 11
ATMOSPHERIC CHARACTERIZATION AND CORRECTION

MODTRAN4 version 2: radiative transfer modeling [4381-49]

Shadow-insensitive material detection/classification with atmospherically corrected hyperspectral imagery [4381-50]

MOD3D: a model for incorporating MODTRAN radiative transfer into 3D simulations [4381-51]
A. Berk, G. Anderson, B. Gossage

SESSION 12
SPECTRAL APPLICATIONS AND METHODOLOGY IV

Landcover change over central Virginia: comparison of endmember fractions in hyperspectral data [4381-54]
S. Tompkins, K. McNaron-Brown, J. Sunshine, J. Burt

Optical profiles for the lower James River estuary and nontidal headwater reaches of the James River [4381-56]
J. Anderson, M. Satterwhite

Use of inherent optical properties for determination of water quality [4381-57]
K. Abdullah, M. Mat Jafri, Z. Din

SESSION 13
IMAGING SPECTROMETRY PROJECTS II

Optimization and characterization of an imaging Hadamard spectrometer [4381-58]
C. Wehlburg, J. Wehlburg, S. Gentry, J. Smith
Effects of temporally changing sources on Fourier transform spectrometers [4381-59]
H. Mitchell, T. Hemmer, P. Lewis, C. Salvaggio

High-throughput dispersive imaging spectrometer for astronomy at visible wavelengths [4381-60]
S. Cain

Methodologies and protocols for the collection of midwave and longwave infrared emissivity spectra using a portable field spectrometer [4381-61]
C. Salvaggio, C. Miller

Comparison of field- and laboratory-collected midwave and longwave infrared emissivity spectra/data reduction techniques [4381-62]
C. Salvaggio, C. Miller

SESSION 14
DETECTION AND IDENTIFICATION III

Recognizing 3D objects in hyperspectral images under unknown conditions [4381-63]
Z. Pan, G. Healey

Interference subspace projection approach to subpixel target detection [4381-66]
Q. Du, C. Chang

Detection of constrained signals [4381-67]
S. Johnson

SESSION 15
POSTERS

Band sharpening technique for multiresolution spectral data sets using regression residuals [4381-68]
V. Lewis
Volume 4382 Algorithms for Synthetic Aperture Radar Imagery VIII

SESSION 1
IMAGING FORMATION

**Multistatic synthetic aperture imaging of aircraft using reflected television signals [4382-1]**
Y. Wu, D. Munson

**Performance analysis of fast backprojection for synthetic-aperture radar processing [4382-2]**
L. Ulander, H. Hellsten, G. Stenstroem

**Using frequency-scaling approach to process squint-mode spotlight SAR data [4382-3]**
J. Sun, S. Mao, Z. Liu, W. Hong

**Sensitivity of two autofocus algorithms to spatially variant phase errors [4382-4]**
R. Abrahamsson, J. Li, P. Stoica, G. Thordarson

**Time-based sparse-array beamforming [4382-5]**
L. Nguyen, J. Sichina, M. Ressler

**Efficient implementation of an expectation-maximization algorithm for imaging diffuse radar targets [4382-54]**
A. Lanterman

SESSION 2
INCREASING RESOLUTION

**Spectral estimation of gapped data and SAR imaging with angular diversity [4382-6]**
E. Larsson, J. Li, P. Stoica, G. Liu, R. Williams

**High-precision stereoscopic 3D mapping accuracy [4382-8]**
A. Doerry

SESSION 3
IMAGE SEGMENTATION AND CALIBRATION

**Segmentation of interferometric SAR data in urban areas [4382-10]**
U. Soergel, K. Schulz, U. Thoennessen

**Content-based image compression [4382-11]**
X. Du, H. Li, S. Ahalt

**Coding-theoretic approach to SAR image segmentation [4382-12]**
U. Ndili, R. Nowak, R. Baraniuk, H. Choi, M. Figueiredo

**Phase-history data collection for synthetic-scene-modeling applications [4382-13]**
K. Wilson, P. Ryan, M. Minardi

SESSION 4
HIGH-RANGE RESOLUTION

**Comparison of some HRR-classification algorithms [4382-18]**
F. Dicander, R. Jonsson
SESSION 5
HRR TRACKING AND MOTION

Signature-aided tracking using HRR profiles [4382-19]
K. Sullivan, M. Ressler, R. Williams

Feature-aided tracking using invariant features of HRR signatures [4382-20]
D. Gross, M. Oppenheimer, J. Schmitz, K. Sturtz

Continuous identification technology [4382-21]
J. Diemunsch

Linear FM radar effects on moving target signatures [4382-22]
B. Welsh, R. Hawley

Segmentation of moving objects in SAR-MTI data [4382-23]
K. Schulz, U. Soergel, U. Thoennessen

Imaging algorithm for steadily flying and maneuvering big targets [4382-24]
M. Xing, Z. Bao

SESSION 6
TARGET DETECTION ALGORITHMS

Target isolation for SAR images [4382-26]
R. Xu, C. Kwan, L. Haynes

Alternative procedure for detecting stationary targets with ultrawideband foliage-penetration radar [4382-27]
K. Ranney, H. Khatri, L. Nguyen

Fuzzy clustering with a specified membership function for target detection with a radar system
K. Ranney, H. Khatri, L. Nguyen

Spectral analysis of high-frequency SAR data [4382-29]
A. Mitra, T. Lewis

SESSION 7
TARGET MODELING

Real-time simulation of moving ground-target signatures [4382-30]
J. Schmitz, D. Gross, A. Wasserman

Fully polarimetric W-band ISAR imagery of scale-model tactical targets using a 1.56-THz compact range [4382-31]
T. Goyette, J. Dickinson, J. Waldman, W. Nixon, S. Carter

W-band polarimetric scattering features of a tactical ground target using a 1.56-THz 3D-imaging compact range [4382-32]
D. Culkin, G. DeMartinis, T. Goyette, J. Dickinson, J. Waldman, W. Nixon
SESSION 8
FEATURES FOR CLASSIFICATION

Adaptive design and characterization of features for SAR ATR [4382-33]
D. Blacknell

Calibration of polarimetric SAR and sensitivity to calibration error [4382-34]
W. Smith, D. Filiberti, A. Bennett, A. Currie

SESSION 9
CLASSIFICATION TECHNIQUES

Search algorithms for vector quantization and nearest-neighbor classification [4382-36]
T. Ryan, S. Pothier, W. Pierson

ATR complexity and template set size [4382-37]
E. Freudenthal, E. Lavely, W. Pierson, M. Argyle, J. Fishman

Composite filters for ISAR ship classification [4382-38]
C. Yuan, D. Casasent, S. Ashizawa

Increasing the discrimination of SAR recognition models [4382-39]
B. Bhanu, G. Jones

SESSION 10
ATR PERFORMANCE EVALUATION

Confidence intervals for ATR performance metrics [4382-41]
T. Ross

Interalgorithmic evaluation of SAR image segmentation algorithms using multiple measures [4382-42]
G. Power

Effect of SAR resolution on target identification [4382-43]
G. Meyer, S. Gustafson, D. Arnold

Objective evaluation of four SAR image segmentation algorithms [4382-44]
J. Gregga, S. Gustafson, G. Power

SESSION 11
THEORETICAL APPROACH TO ATR

Probabilistic approach to model extraction from training data [4382-45]

SAR image invariants from 3D scattering centers [4382-46]
V. Velten

Statistical assessment of model fit for synthetic aperture radar data [4382-47]
M. DeVore, J. O’Sullivan

Target signature manifold methods applied to MSTAR dataset: preliminary results [4382-48]
M. Bryant
SESSION 12
ATR PERFORMANCE PREDICTION

Synthesizing invariant 3D rigid scattering centers [4382-49]
D. Arnold, R. Claypool, V. Velten, K. Sturtz

Information theory for the prediction of SAR target classification performance [4382-50]
A. Horne

Analytic performance bounds on SAR-image target recognition using physics-based signatures
C. Cho, C. Yeang, J. Shapiro

Stochastic process modeling and Monte Carlo simulation: assisting higher-level decision making for
aided target recognition networks [4382-52]
D. Rosario
SESSION 1
ENVIRONMENTAL AND ATMOSPHERIC MODELING AND EFFECTS

Imagery spectroscopy application for Super Fund mining waste monitoring [4383-1]
W. Roper

Hyperspectral imaging in earth road construction planning [4383-2]
Y. Nie, R. Gomez, M. Kafatos, R. Yang

New algorithm for atmospheric correction of hyperspectral remote sensing data [4383-3]
M. Montes, B. Gao, C. Davis

SESSION 2
TERRAIN AND TARGET MODELING AND CHARACTERIZATION

NOAA-AVHRR image mosaics applied to vegetation identification [4383-4]
M. de Almeida, B. Ruddorff, Y. Shimabukuro

Wavelet-based hyperspectral and multispectral image fusion [4383-5]
R. Gomez, A. Jazaeri, M. Kafatos

Anomaly detection in hyperspectral imagery [4383-6]
C. Chang, S. Chiang, I. Ginsberg

SESSION 3
VISUALIZATION, IMAGE REGISTRATION, AND FEATURE EXTRACTION

Mutual information as a similarity measure for remote sensing image registration [4383-8]
K. Johnson, A. Cole-Rhodes, I. Zavorin, J. Le Moigne

Like-feature detection in geo-spatial sources [4383-11]
A. Samal, S. Seth, K. Cueto

Fast hyperspectral data processing methods [4383-12]
T. Boggs, R. Gomez

Hyperspectral image analysis using ENVI (environment for visualizing images) [4383-13]
Y. Xing, R. Gomez

Image data integration and analysis for natural disaster decision support systems [4383-14]
W. Roper
Volume 4384 Data Mining and Knowledge Discovery: Theory, Tools, and Technology

SESSION 1
CLUSTERING AND CLASSIFICATION TECHNIQUES

New data clustering technique and its applications [4384-1]
C. Kwan, R. Xu, L. Haynes

Value-balanced agglomerative connectivity clustering [4384-3]
G. Gupta, J. Ghosh

Clustering of complex shaped data sets via Kohonen maps and mathematical morphology [4384-4]
J. Ferreira Costa, M. de Andrade Netto

Efficient boundary hunting via vector quantization [4384-5]
C. Diamantini, M. Panti

Extraction and optimization of classification rules for continuous or mixed-mode data using neural nets [4384-6]
D. Wang, T. Dillon

SESSION 2
IMAGE AND WEB MINING I

Fuzzy feature-based image mining in remote sensing [4384-7]
J. Li, R. Narayanan, W. Waltman, A. Peters

Retrieval of multi- and hyperspectral images using an interactive relevance feedback form of content-based image retrieval [4384-8]
I. Alber, M. Farber, N. Yeager, Z. Xiong, W. Pottenger

Fuzzy, crisp, and human logic in e-commerce marketing data mining [4384-9]
K. Hearn, Y. Zhang

SESSION 3
IMAGE AND WEB MINING II

eShopper modeling and simulation [4384-10]
V. Petrushin

Web caching and prefetching: a data mining approach [4384-11]
A. Shyamsukha, A. Sathaye, A. Swami

SESSION 4
DATA MINING AND KNOWLEDGE DISCOVERY: THEORY AND TOOLS

Knowledge discovery through games and game theory [4384-13]
J. Smith, R. Rhyne

Discovery of diagnostic knowledge from multisensor data [4384-14]
W. Moczulski, J. Zytkow

Schema extraction and levelization for XML data [4384-15]
J. Yoon, S. Kim
Visualization for enhancing the data mining process [4384-16]
C. Meneses, G. Grinstein

Toward ubiquitous mining of distributed data [4384-17]
R. Ayyagari, B. Park, D. Hershberger, H. Kargupta

Data mining of text as a tool in authorship attribution [4384-18]

Efficiently mining maximal frequent patterns: fast-miner [4384-19]
M. Dewsnip, M. Mahoui

SESSION 5
SOFT COMPUTING, ROUGH SETS, AND FUZZY LOGIC

Application of preprocessing filtering on Decision Tree C4.5 and rough set theory [4384-20]
J. Chan, T. Lin

System to build fuzzy logic models from databases and application to multisensor data [4384-21]
G. Witus

Statistical extension of rough set rule induction [4384-22]
S. Tsumoto

New soft computing model for data mining [4384-24]
S. Sumathi, S. Sivanandam, S. Babu

Algebra view and information view of rough sets theory [4384-25]
G. Wang

SESSION 6
DATA MINING AND KNOWLEDGE DISCOVERY TECHNOLOGY: APPLICATIONS I

Knowledge discovery in scientific data using hierarchical modeling in dimensional analysis [4384-26]
S. Brueckner, S. Rudolph

Asymmetric threat data mining and knowledge discovery [4384-27]
J. Gilmore, M. Pagels, J. Palk

Medical knowledge discovery in hospital information systems [4384-28]
S. Tsumoto

SESSION 7
DATA MINING AND KNOWLEDGE DISCOVERY TECHNOLOGY: APPLICATIONS II

Multimedia agent monitoring and assessment system [4384-29]
J. Gilmore, M. Pagels, J. Palk

Fractal and multidimensional analysis of data from delay complex systems [4384-30]
V. Dailyudenko

Project X: competitive intelligence data mining and analysis [4384-31]
J. Gilmore, M. Pagels, J. Palk
Decomposition in data mining: a medical case study [4384-32]
A. Kusiak

SESSION 8
ASSOCIATION RULES AND TIME SERIES ANALYSIS

Mining association rules between low-level image features and high-level concepts [4384-33]
I. Sethi, I. Coman, D. Stan

Association mining of dependency between time series [4384-35]
A. Hafez

Bitmap approach to trend clustering for prediction in time series databases [4384-36]
J. Yoon, Y. Luo, J. Nam

Fuzzy-logic-based method for chaotic time series prediction [4384-37]
M. Wang, G. Rong, S. Liao

Multichannel art network with rule extraction: as a data mining tool [4384-38]
S. Sumathi, S. Sivanandam, S. Babu
Volume 4385 Sensor Fusion: Architectures, Algorithms, and Applications V

SESSION 1
FEATURE AND DECISION LEVEL FUSION

**Metric sensitivity of the multisensor information fusion process under instance-based learning [4385-1]**
B. Dasarathy

**Taking advantage of misclassifications to boost classification rate in decision fusion [4385-2]**
K. Goebel, S. Mysore

**Multisensor feature fusion methods and results [4385-3]**
D. Heagy, R. Barnes, E. Bechhoefer

**Population bias control for bagging k-NN experts [4385-6]**
F. Alkoot, J. Kittler

SESSION 2
BAYESIAN, NEURAL NETS, AND GENETIC ALGORITHMS

**Multitarget tracking with the IMM and Bayesian networks: empirical studies [4385-48]**
S. Hautaniemi, J. Saarinen

**Visual localization using Bayesian decision fusion on omnidirectional sensing [4385-8]**
L. Paletta, S. Frintrop, J. Hertzberg

**Equivalency of Bayesian multisensor information fusion and neural networks [4385-9]**
P. Aarabi

**Neural networks for sensor fusion of meteorological measurements [4385-10]**
Y. Yee, E. Measure, J. Cogan, M. Bleiweis

**Genetic algorithms for multiagent fusion system learning [4385-12]**
L. Pigeon, J. Inglada, B. Solaiman

SESSION 3
IMAGE DATA FUSION AND ITS APPLICATIONS I

**Optimizing multiresolution pixel-level image fusion [4385-13]**
V. Petrovic, C. Xydeas

**Wavelet domain superresolution reconstruction of infrared image sequences [4385-14]**
J. Li, Y. Sheng, L. Sevigny, P. Valin

**Cooperative search algorithm for mutual-information-based image registration [4385-15]**
H. Chen, P. Varshney

**Robust automatic ground image feature extraction for multisensor image registration [4385-16]**
V. Randrianarisoa, X. Yang, Y. Sheng, L. Sevigny, P. Valin

**Model fusion for road extractions from multisource satellite images [4385-18]**
L. Pigeon, L. Lecornu, B. Solaiman, G. Brunet
SESSION 4
IMAGE DATA FUSION AND ITS APPLICATIONS II

Biologically based sensor fusion for medical imaging [4385-19]
M. Aguilar, A. Garrett

Application of spatial likelihood functions to multicamera object localization [4385-21]
P. Aarabi

CHOP STIX: an exploitation metasystem [4385-23]
M. Pagels, J. Gilmore

SESSION 5
MILITARY APPLICATIONS

Fault detection and multiclassifier fusion for unmanned aerial vehicles (UAVs) [4385-25]
W. Yan

Sensor array calibration via tracking with the extended Kalman filter [4385-50]
V. Cevher, J. McClellan

Use of multisensor fusion technology to meet the challenges of emerging EO and rf threats to a fighter aircraft [4385-27]
P. Rao, A. Shukla

SESSION 6
FUSION CONCEPTS AND ARCHITECTURES

Fusion under the closed-world assumption [4385-28]
E. Gregoire

Information fusion concepts: from information elements definition to the application of fusion approaches [4385-29]
B. Solaiman

Distributed resource allocation under communication constraints [4385-30]
P. Dodin, V. Nimier

Simple real-time data fusion [4385-31]
D. Polvani

Efficient method for simultaneous map building and localization [4385-52]
U. Hanebeck, J. Horn

SESSION 7
MISCELLANEOUS APPLICATIONS

Relations among wavelet coefficients and features for ATR [4385-34]
M. Kokar, M. Malczewski

Robust multisource sound localization using temporal power fusion [4385-36]
P. Aarabi
Estimating grassland yields by projection pursuit regression (PPR) and RS, GIS, and GPS [4385-37]
J. Li

Odor source identification by grounding linguistic descriptions in an artificial nose [4385-38]
A. Loutfi, S. Coradeschi, T. Duckett, P. Wide

Development of a sensor integration strategy for robotic application based on geometric optimization [4385-39]
G. Nandi, D. Mitra

Performance limits for multiplatform scene-referenced navigation systems [4385-40]
J. Ralph, E. Januarius, M. Smith, K. Edwards, M. Bernhardt

SESSION 8
FUZZY LOGIC APPROACHES

Fuzzy-model-based multisensor data fusion system [4385-42]
P. Prajitno, N. Mort

Short memory fuzzy fusion image recognition schema employing spatial and Fourier descriptors
S. Raptis, S. Tzafestas

Combination of fuzzy sets and Dempster-Shafer theories in forest map updating using multispectral data [4385-45]
F. Leduc, B. Solaiman, F. Cavayas
