Anaya awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA – June 17, 2016 – Miguel Anaya Martin has been awarded a 2016 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics for his potential contributions to the field of optics, photonics or related field.

Anaya is a PhD student in the Multifunctional Optical Materials Group at the Institute of Materials Science of Seville (Spain). His research, supervised by Professor Hernán Míguez and Doctor Mauricio Calvo, is focused on the optical design of perovskite based optoelectronic devices. His work covers the study of fundamental optical and emissive properties of ABX₃ materials, and modelling-to-fabrication of devices based on those absorbers in which photonic structures are integrated with the aim of enhancing their performance.

In 2016 SPIE awarded \$351,000 in education and travel scholarships to 133 outstanding individuals, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected and approved by the SPIE Scholarship Committee, Chaired by SPIE volunteer Cristina Solano. An additional \$45,000 in travel scholarships will be awarded later this year.

Through 2015, SPIE has distributed \$5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE is the international society for optics and photonics, an educational not-for-profit organization founded in 1955 to advance light-based science, engineering, and technology. The Society serves nearly 264,000 constituents from approximately 166 countries, offering conferences and their published proceedings, continuing education, books, journals, and the SPIE Digital Library. In 2015, SPIE provided more than \$5.2 million in support of education and outreach programs. www.spie.org
