Hossain awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA – June 4, 2019 – **Mohammad Jobayer Hossain** has been awarded a 2019 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for his potential contributions to the field of optics, photonics or related field.

Hossain is a PhD candidate at CREOL, The College of Optics and Photonics at University of Central Florida (USA). His current research is in optoelectronic devices and development of inexpensive and more accurate metrology tools for characterizing those devices. “I am working on an easy-to-implement nanophotonic structure which provides more photocurrent generation, reduces surface recombination loss and facilitates better carrier transport, thus increases the overall efficiency,” said Hossain.

The Society awarded \$298,000 in education scholarships to 84 outstanding SPIE student members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected and approved by the SPIE Scholarship Committee, Chaired by SPIE volunteer Jeremy Bos.

Through 2018, SPIE has distributed \$6 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE is the international society for optics and photonics, an educational not-for-profit organization founded in 1955 to advance light-based science, engineering, and technology. The Society serves 257,000 constituents from 173 countries, offering conferences and their published proceedings, continuing education, books, journals, and the SPIE Digital Library. In 2018, SPIE provided more than \$4 million in community support including scholarships and awards, outreach and advocacy programs, travel grants, public policy, and educational resources. www.spie.org.
