Don’t get bogged down by the notion of limits. There aren’t any.

Sunita Williams, MS Florida Institute of Technology, BS United States Naval Academy, American astronaut and United States Navy officer of Indian-Slovenian descent. She formerly held the records for total spacewalks by a woman (seven) and most spacewalk time for a woman (50 hours, 40 minutes).

(Top) This mosaic of M31 merges 330 individual images taken by the Ultraviolet/Optical Telescope aboard NASA’s Swift spacecraft. It is the highest-resolution image of the galaxy ever recorded in the ultraviolet. Image Credit: NASA/Swift/Stefan Immler (GSFC) and Erin Grand (UMCP).

(Bottom) NASA astronaut Sunita Williams, Expedition 32 flight engineer, appears to touch the bright sun on her mission’s third spacewalk on 5 September 2012. Image Credit: NASA.

This poster is part of a three-poster series, featuring women who through optics and photonics, have made their careers in space. See spie.org/posters in 2018 and 2019 for new posters.
