SPIE 
Eco-Photonics
Energy, Engineering, Education,
and the Environment

28–30 March 2011
Palais de la Musique et des Congrès
Strasbourg, France

Welcome

On behalf of SPIE, it is our pleasure to welcome you to SPIE Eco-Photonics. This week you will have the unique opportunity to participate in the exchange of ideas about energy solutions, re-engineering, workforce education, and sustainable environmental solutions. The outstanding programme includes lectures by key people in Eco-Photonics from government, industry, and academia addressing the needs for a Greener Future and a new Green Economy, and you will have numerous opportunities to develop both your career and business by networking with leading researchers and entrepreneurs in the field. We look forward to your participation in these critical issues during the week.

Symposium Chairs

Dan Curticapean,
Univ. of Applied Sciences
Offenburg (Germany)

Patrick Meyrueis,
Ecole Nationale Supérieure de
Physique de Strasbourg (France)

SPIE supports and encourages green photonics technologies such as energy, sustainability, conservation, and environmental monitoring.

Organising Committee:

Pierre Ams, Univ. de Haute Alsace (France)

Elmar Bollin, Univ. of Applied Sciences Offenburg (Germany)

Alexis G. Bony, Daimler AG (Germany)

Christian-Alexander Bunge, Hochschule für Telekommunikation Leipzig (Germany)

Alan J. Conneely, National Univ. of Ireland, Galway (Ireland)

Gilles Coutelier, Pixium (France)

Dan Curticapean, Univ. of Applied Sciences Offenburg (Germany)

Claus Emmelmann, Technische Univ. Hamburg-Harburg (Germany)

Yeshaiahu Fainman, Univ. of California, San Diego (United States)

Manuel Flury, Univ. Jean Monnet Saint-Etienne (France)

Philippe B. Gallion, Telecom ParisTech (France)

Lionel L'Haridon, Rhenaphotonics (France)

Hans Peter Herzig, Ecole Polytechnique Fédérale de Lausanne (Switzerland)

Dirk Jansen, Univ. of Applied Sciences Offenburg (Germany)

Stefan Kaierle, Fraunhofer-Institut für Lasertechnik (Germany)

Wolfgang Knapp, Cooperation Laser Franco-Allemande (France)

Bernard Kress, USI Photonics Inc. (United States)

Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France)

Vasudevan Lakshminarayan, Univ. of Waterloo (Canada)

Klaus Löffler, TRUMPF GmbH & Co. KG (Germany)

Patrick Meyrueis, Ecole Nationale Supérieure de Physique de Strasbourg (France)

Adrian Neculae, Univ. de Vest din Timisoara (Romania)

José Luis Ocaña, Univ. Politécnica de Madrid (Spain)

Alexander M. Olowinsky, Fraunhofer-Institut für Lasertechnik (Germany)

Marius H. Paulescu, Univ. de Vest din Timisoara (Romania)

Hans Poisel, Univ. of Applied Sciences Nürnberg (Germany)

Stephen M. Pompea, National Optical Astronomy Observatory (United States)

Francois Quentel, D-Lightsys (France)

Christoph Rüttimann, LASAG AG (Switzerland)

John Sadi, Lightnics (France)

Werner W. Schröder, Univ. of Applied Sciences Offenburg (Germany)

Paul Siffert, European Materials Research Society (France)

Tuan Vo-Dinh, Duke Univ. (United States)

Berit Wessler, OSRAM Opto Semiconductors GmbH (Germany)

Feng Zhou, Indiana Univ. of Pennsylvania (United States)

Olaf Ziemann, Univ. of Applied Sciences Nürnberg (Germany)

Registration

Full symposium registration includes: admittance to the conferences, welcome reception, poster reception, coffee breaks, and Proceedings of SPIE as applicable under the specific registration plan (see registration form for details).

Proceedings of SPIE CD-ROMs purchased as part of your registration plan include shipping charges. Student author registration plans do not include *Proceedings of SPIE CD-ROM*.

SYMPOSIUM PROCEEDINGS CD-ROM:

The symposium proceedings CD-ROM will be available within eight weeks after the conclusion of the event and will be mailed automatically to paid registrants. Papers will also be available in the SPIE Digital Library.

Registration Hours

Erasmus Entrance

Sunday 27 March15.00 to 17.00 hrs
Monday 28 March08.00 to 18.00 hrs
Tuesday 29 March.08.30 to 18.00 hrs
Wednesday 30 March08.30 to 16.00 hrs

Welcome Reception

Monday 28 March • 18.00 to 19.30
Location: Contades Est

All attendees are invited to relax, socialise, and enjoy light refreshments.

Due to limited space and numbers, guests will be admitted on a first-come, first-served basis. Please contact the onsite registration desk for tickets.

Please remember to wear your conference registration badges. Dress is casual.

Wednesday Poster Breakfast and Networking Session

Wednesday 30 March • 09.30 to 11.00
Location: Tivoli Foyer

All symposium attendees are invited to attend the Wednesday poster breakfast provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster session is designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may display their poster papers starting at 12.00 hrs on Tuesday in the Forum. Each poster presenter is provided a space 0.95 x 1.20m in which to display a summary of the paper. Attendees are requested to wear their conference registration badges to the poster session.

Poster authors should be at their papers from 09.30 to 10.30 hrs on Wednesday to answer questions from attendees. Poster presenters who have not set up by 09.00 on Wednesday will be considered a “no show” and their manuscript will not be published. Posters will remain on display until the end of lunch break on Wednesday for extended viewing. Any papers left on the boards following the end of the lunch break will be considered unwanted and will be discarded. SPIE assumes no responsibility for posters left up after the end of the poster session.

Plenary Sessions

MONDAY PLENARY SESSION I: Sustainable Energy Engineering

Monday 28 March • 10.30 to 11.30

Session Chairs: **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Dan Curticeapean**, Univ. of Applied Sciences Offenburg (Germany)

10.30

Welcome and Opening Session

Welcome Address by a representative of the European Parliament

11.00

Energy saving through LED in signaling functions for automotive exterior lighting

Alexis G. Bony,
Daimler AG (Germany)

Abstract: In this work, taking as an example the new Mercedes-Benz roadster SLK (R172), we present the first single LED day-time-running lamp, with a total

power consumption below 5W per vehicle. After reviewing legal requirements, the optical and electronic concepts are discussed, as well as possible future evolutions towards design freedom or power consumption reduction. Details on the tail lamp LED functions are also discussed, and particularly the advantages from the realization of fog lamp with LEDs.

Biography: After studying applied physics engineering, Dr. Bony received his Ph.D. in Engineering from the University of Strasbourg, France, with a work on roughness evaluation for integrated optics components. He has been working since 2007 in the exterior lighting department for Mercedes-Benz cars, working on concept development and technology validation related to headlamps and tail lamps.

TUESDAY PLENARY SESSION II: Sustainable Manufacturing Development and Process

Tuesday 29 March • 09.30 to 12.00

09.30

Photonics research in Europe

Stefan Kaierle,
European Laser Institute
(Germany)

Abstract: A couple of years ago it had been recognized that a systematic approach to clustering research topics in the field of photonics would be required. As a result, the European Technology Platform 'Photonics21' had been founded. Today, the platform serves as advisor for the European Commission and develops Strategic Research Agendas on a regular. The talk will cover the approach and demonstrate the future hot topics in European Photonics research.

Biography: After studying Electrical Engineering and a PhD in Mechanical Engineering at RWTH Aachen University, Stefan Kaierle joined the Fraunhofer ILT where he is heading the System Technology. He published more than 100 papers in the field of process control, laser system technology, laser materials processing and related fields.

Stefan Kaierle has been appointed to two guest professorships at Changchun University and at Beijing University of Technology (China). Currently, he is also President of the European Laser Institute ELI.

10.00

Examples of green laser applications

Michael Lang,
TRUMPF GmbH & Co. KG
(Germany)

Abstract: Advances in Laser Technology have enabled implementation of various technology improvements that contribute to saving resources.

Reduction in carbon footprint is reached through effective manufacturing technologies, contributions to energy efficient products, and enabling access to new energy sources.

On a macroscopic scale high power lasers have enabled efficient, high speed welding. On a microscopic scale, lasers are used for various applications supporting eMobility and the manufacturing of solar cells.

Advantages of lasers are contact free manufacturing and highest precision. These properties are in demand for future production processes to achieve high product quality and throughput, at reasonable energy consumption. As a consequence the number of laser applications across various industries will continue to grow.

Biography: Michael Lang has graduated in physics with a Diploma from University of Konstanz, Germany, in 1997. During his thesis he did practical experiments on non-linear optics and frequency conversion. His professional experience includes service, applications consulting and sales activities in the semiconductor industry, working with laser based manufacturing equipment. He joined TRUMPF in 2010, as a specialist for laser applications in the semiconductor sector.

10.30

Laser welding for weight saving in BIW design at PSA Peugeot Citroën

Mathieu Kielwasser,
PSA Peugeot Citroën (France)

Abstract and Biography:
Not available at this time.

11:00

Photonics-enabled manufacturing: ICT+sensors+lasers = sustainable growth for manufacturing in Europe

Thomas P. Pearsall,
European Photonics Industry Consortium (France)

Abstract: Photonics-powered production - the combination of lasers, sensors and ICT - is the key component of agile, lean and green manufacturing. The

introduction of laser technologies in manufacturing is highly disruptive, creating competitive opportunities for European manufacturing, because programmable and controllable laser processing implements a flexible, fast and reactive manufacturing platform.

Photonics-powered production unites three sectors that account for more than 30 billion euros of economic activity per year in Europe, according to statistics published by Photonics-21 and SEMI: Lasers, Sensors and Machine Vision. In addition, this creates synergies among European Technology platforms: Photonics, Manufacture and Eniac. It leverages Key Enabling Technologies of Photonics and Advanced Manufacturing.

Diode lasers are a core technology of this vision. With slope efficiencies greater than 90 percent, and steadily improving output powers, direct diode laser processing could be developed for laser processing systems that deliver up to a kilowatt of continuous machining power. For higher powers, such diode laser systems can pump fiber laser or disc laser systems. Diode laser pumping is additionally the basis for ultra-short pulse length, high peak-power lasers that can be used to manufacture glass and ceramic based products: LCD displays and thin-film solar cells, for example.

The diode-pumped laser, and in particular the fiber laser, has been developed from optical amplifiers used for optical fiber telecommunications. There are a number of small companies making such lasers all over Europe. This technology is by nature easy to scale. Thus, high performance fiber lasers can be made to fit in the hollow of your hand, while the same technology is being used to make lasers the size of football fields for nuclear fusion. This is exciting technology with a brilliant future.

Biography: Following his degree work, he worked at Bell Laboratories Thomson CSF, and Corning. He is a pioneer developer of InGaAsP and the inventor of the InGaAs photodetector.

In 2003, Pearsall started EPIC, The European Photonics Industry Consortium. EPIC has 80 voting members and 400 associated members located in 18 countries of the European Union. EPIC has been a major contributor to the launch and the development of the European Technology Platform Photonics21.

Conference 8065

Monday-Wednesday 28-30 March 2011
Proceedings of SPIE Vol. 8065

SPIE Eco-Photonics 2011: Sustainable Design, Manufacturing, and Engineering Workforce Education for a Green Future

Conference Chairs: **Pierre Ambs**, Univ. de Haute Alsace (France); **Dan Curticapean**, Univ. of Applied Sciences Offenburg (Germany); **Claus Emmelmann**, Technische Univ. Hamburg-Harburg (Germany); **Wolfgang Knapp**, Cooperation Laser Franco-Allemande (France); **Zbigniew T. Kuznicki**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France)

Monday 28 March

Welcome and Opening Session

Room: Tivoli Mon. 10.30 to 11.00

Session Chairs: **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Dan Curticapean**, Univ. of Applied Sciences Offenburg (Germany)

Welcome Address by a representative of the European Parliament

PLENARY SESSION I

Room: Tivoli Mon. 11.00 to 11.30

Sustainable Energy Engineering

Session Chairs: **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Zbigniew T. Kuznicki**, Ecole Nationale Supérieure de Physique de Strasbourg (France)

11.00: **Energy saving through LED in signaling functions for automotive exterior lighting** (*Invited Paper*), Alexis G. Bony, Khaled Hamami, Frank Tebbe, Jens Mertens, Daimler AG (Germany) [8065-100]

Lunch Break 11.30 to 13.30

SESSION 1

Room: Tivoli Mon. 13.30 to 15.20

Sustainable Energy Engineering I

Session Chairs: **Zbigniew T. Kuznicki**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France)

13.30: **Monitoring the energy systems of sustainable buildings** (*Invited Paper*), Elmar Bollin, Univ. of Applied Sciences Offenburg (Germany) [8065-01]

14.00: **Design a linear irregular Fresnel lens to reduce the cost and thickness of an LED-based direct-type backlight module and improve the illuminance and uniformity of LCD plate**, Wen-Gong Chen, Yung-Ta Institute of Technology and Commerce (Taiwan) [8065-02]

14.20: **Simulation of silicon thin-film solar cells for oblique incident waves**, Christine Jandl, Kai Hertel, Christoph Pflaum, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); Helmut Stiebig, Malibu GmbH & Co. KG (Germany) [8065-03]

14.40: **Monitoring applications of power generators for the increase of energy efficiency using novel fiber optical sensors**, Michael Villnow, Michael Willsch, Thomas Bosselmann, Siemens AG (Germany); Bernhard Schmauss, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) [8065-04]

15.00: **Study of spectrum-splitting solar photovoltaic system**, Liang-Yao Chen, Yuan Zhao, Mingyu Shen, Yu-Xiang Zheng, Fudan Univ. (China) [8065-05]

Coffee Break 15.20 to 15.40

SESSION 2

Room: Tivoli Mon. 15.40 to 18.00

Sustainable Energy Engineering II

Session Chairs: **Zbigniew T. Kuznicki**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Patrick P. Meyrueis**, Ecole Nationale Supérieure de Physique de Strasbourg (France)

15.40: **Current collection from different Si devices based on nanoscale Si-layered systems containing a new metamaterial for photovoltaics**, Mikael Hosatte, Ecole Nationale Supérieure de Physique de Strasbourg (France); Marek Basta, Univ. de Strasbourg (France); Patrick P. Meyrueis, Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France) [8065-06]

16.00: **Optimising optical efficiency in diamond turned Fresnel mould masters**, John L. Allsop, Paul R. Shore, Arjen Mateboer, Cranfield Univ. (United Kingdom) [8065-07]

16.20: **Enhanced light trapping in realistic thin film solar cells using one-dimensional gratings**, Ali Naqavi, Karin Söderström, Franz-Josef Haug, Vincent Paeder, Toralf Scharf, Hans Peter Herzig, Christophe Ballif, Ecole Polytechnique Fédérale de Lausanne (Switzerland) [8065-08]

16.40: **Transparent conductive oxides for nano-SIS solar cells**, Kevin Füchsel, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany) and Friedrich-Schiller-Univ. Jena (Germany); Astrid Bingel, Friedrich-Schiller-Univ. Jena (Germany); Norbert Kaiser, Andreas Tünnermann, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany) [8065-09]

17.00: **Microalgae photonics**, Timmy Floume, Imperial College London (United Kingdom); Julien Sylvestre, PhotoFuel SAS (France) [8065-10]

17.20: **A silicon based metamaterial for the light-to-electricity conversion** (*Invited Paper*), Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France) [8065-11]

Welcome and Networking Reception

Location: Contades Est. . Mon. 18.00 to 19.30

Tuesday 29 March

Plenary Session II

Room: Tivoli Tues. 09.30 to 11.30

Sustainable Manufacturing Development and Process

Session Chairs: **Wolfgang Knapp**, Cooperation Laser Franco-Allemande (France); **Claus Emmelmann**,

09.30: **Photonics research in Europe**, Stefan Kaieler, European Laser Institute (Germany) [8065-101]

10.00: **Examples of green laser applications**, Michael Lang, TRUMPF Laser- und Systemtechnik GmbH (Germany); Klaus Löffler, TRUMPF GmbH & Co. KG (Germany) [8065-102]

10.30: **Laser welding for weight saving in BIW design at PSA Peugeot Citroën**, Mathieu Kielwasser, PSA Peugeot Citroën (France) [8065-105]

11.00: **Photonics-enabled manufacturing: ICT+sensors+laser = sustainable growth for manufacturing in Europe**, Thomas P. Pearsall, European Photonics Industry Consortium (France) [8065-104]

Panel Discussion

Room: Tivoli Tues. 11.30 to 12.00

Lunch Break 12.00 to 13.30

SESSION 3

Room: Tivoli Tues. 13.30 to 15.30

Sustainable Energy Engineering III

Session Chairs: **Patrick P. Meyruois**, Ecole Nationale Supérieure de Physique de Strasbourg (France); **Zbigniew T. Kuznicki**, Ecole Nationale Supérieure de Physique de Strasbourg (France)

13.30: Carbon dioxide a raw material for sustainable development (*Invited Paper*), Jacques Amouroux, Ecole Nationale Supérieure de Chimie de Paris (France); Paul Siffert, European Materials Research Society (France); Koichi Hashimoto, Tohoku Univ. (Japan); Philipp G. Rutberg, Institute of Electrophysics (Russian Federation) [8065-12]

14.00: Minimum energy per bit in high bit rate optical communications and quantum communications (*Invited Paper*), Philippe B. Gallion, Telecom ParisTech (France) [8065-13]

14.30: Solar trough system based on microstructured reflective Mylar sheets incorporating both photovoltaic and thermal conversions, Vic Hejmadi, USI Photonics Inc. (United States); Afredo Gilliberto, USI Photonics Inc. (United Arab Emirates); Meimei Shin, Bernard Kress, USI Photonics Inc. (United States) [8065-55]

14.50: Enhancement of spectral response of visible light absorption of TiO₂ synthesis by femtosecond laser ablation, Abdul Salam N. Mahmood, Ryerson Univ. (Canada) [8065-15]

15.10: Optical properties of crystalline and amorphous Si:P for device fabrication and structural modeling, Marek Basta, Univ. de Strasbourg (France); Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France) [8065-16]

Coffee Break 15.30 to 16.00

SESSION 5

Room: President Tues. 13.30 to 15.30

Sustainable Manufacturing Development and Processes I

Session Chairs: **Claus Emmelmann**, Technische Univ. Hamburg-Harburg (Germany); **Wolfgang Knapp**, Cooperation Laser Franco-Allemande (France)

13.30: Eco efficiency of laser welding applications (*Invited Paper*), Stefan Kaieler, Fraunhofer-Institut für Lasertechnik (Germany) [8065-17]

13.50: Glue-free assembly of glass fiber reinforced thermoplastics using laser light (*Invited Paper*), Wolfgang Knapp, Cooperation Laser Franco-Allemande (France) [8065-18]

14.10: Improvement of mechanical properties and life extension of high reliability structural components by laser shock processing (*Invited Paper*), José L. Ocaña, Univ. Politécnica de Madrid (Spain) [8065-19]

14.30: Wavefront analysis and optimization from conventional liquid crystal displays for low-cost holographic optical tweezers and digital holographic microscopy, Andreas Weber, Valentín Ortega Clavero, Werner W. Schröder, Univ. of Applied Sciences Offenburg (Germany) [8065-20]

14.50: Spot welding of highly reflective materials used for electrical contacts (*Invited Paper*), Christoph Rüttimann, LASAG AG (Switzerland) [8065-21]

15.10: Thermal management in laser applications: basic technology and energy efficiency, Bernd Buerner, Sascha Paulus, Edgar Timm, Riedel Kältetechnik Glen Dimplex Deutschland GmbH (Germany) [8065-22]

Coffee Break 15.30 to 16.00

SYMPOSIUM PROCEEDINGS CD-ROM:

The symposium proceedings CD-ROM will be available within eight weeks after the conclusion of the event and will be mailed automatically to paid registrants. Papers will also be available in the SPIE Digital Library.

SESSION 4

SESSION 6

Room: Tivoli Tues. 16.00 to 18.20

Room: President Tues. 16.00 to 18.10

Education for a Sustainable Engineering Workforce

Sustainable Manufacturing Development and Processes II

Session Chair: Dan Curticapean, Univ. of Applied Sciences Offenburg (Germany)

Session Chairs: Wolfgang Knapp, Cooperation Laser Franco-Allemande (France); Claus Emmelmann, Technische Univ. Hamburg-Harburg (Germany)

16.00: Photonics education for a green future: connecting the dots of the Arizona STEM education experiment (*Invited Paper*), Stephen M. Pompea, National Optical Astronomy Observatory (United States); Leonard W. Fine, Science Foundation Arizona (United States); Pierre Meystre, College of Optical Sciences, The Univ. of Arizona (United States)[8065-23]

16.00: Energy efficiency in thermal joining processes (*Invited Paper*), Johannes Wilden, Bilge Kaya, Technische Univ. Berlin (Germany) [8065-34]

16.30: The outreach activities to promote photonics education for school students (*Invited Paper*), Feng Zhou, Indiana Univ. of Pennsylvania (United States); Daniel M. Hull, OP-TEC National Ctr. for Optics and Photonics Education (United States). [8065-24]

16.30: Robust, precise, high resolution Fourier transform Raman spectrometer, Valentin Ortega Clavero, Univ. of Applied Sciences Offenburg (Germany) and Univ. of Strasbourg (France); Werner W. Schröder, Univ. of Applied Sciences Offenburg (Germany); Patrick P. Meyrueis, Univ. of Strasbourg (France); Andreas Weber, Univ. of Applied Sciences Offenburg (Germany). [8065-30]

16.50: Enabling virtual reality on mobile devices: enhancing students learning experience (*Invited Paper*), Markus Feisst, The Univ. of Nottingham (United Kingdom). [8065-25]

16.50: Optical glass and the EU directive RoHS, Peter Hartmann, SCHOTT AG (Germany) [8065-31]

17.10: National education program for energy efficient illumination engineering (*Invited Paper*), Constance E. Walker, Stephen M. Pompea, National Optical Astronomy Observatory (United States) [8065-26]

17.10: Communication of the multi laser tracker system used as position feedback sensor, Trung T. Nguyen, Thanh Q. Nguyen, Arvid Amthor, Christoph Ament, Technische Univ. Ilmenau (Germany) . [8065-32]

17.30: New aspects of using eyetracking in education of optics and photonics, Ute Rohbock, Martha Jagoda, Univ. of Applied Sciences Offenburg (Germany) [8065-27]

17.30: Holographic microscope using conventional low-cost liquid crystal in transmissive setup, Andreas Weber, Werner W. Schröder, Valentin Ortega Clavero, Univ. of Applied Sciences Offenburg (Germany) [8065-33]

17.50: Interactive lecture demonstrations, active learning and the ALOP Project (*Invited Paper*), Vasudevan Lakshminarayan, Univ. of Waterloo (Canada) [8065-28]

17.50: Virtual reality to simulate large lighting with high efficiency LED, Thierry Blandet, Ecole Nationale Supérieure de Physique de Strasbourg (France); Gilles Coutelier, Pixium (France) [8065-54]

POSTER BREAKFAST

Room: Tivoli Wed. 09.30 to 11.00

All symposium attendees are invited to attend the Wednesday poster breakfast provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster session is designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may display their poster papers starting at 12.00 hrs on Tuesday in the Forum. Each poster presenter is provided a space 0.95 x 1.20m in which to display a summary of the paper. Attendees are requested to wear their conference registration badges to the poster session.

Poster authors should be at their papers from 09.30 to 10.30 hrs on Wednesday to answer questions from attendees. Poster presenters who have not set up by 09.00 on Wednesday will be considered a “no show” and their manuscript will not be published. Posters will remain on display until the end of lunch break on Wednesday for extended viewing. Any papers left on the boards following the end of the lunch break will be considered unwanted and will be discarded. SPIE assumes no responsibility for posters left up after the end of the poster session.

Organic photovoltaic device characterized by high open circuit voltage with aluminum doped zinc oxide as transparent electrode, Pavlo Y. Stakhira, Vladyslav V. Cherpak, Dmytro M. Volyniuk, Lviv Polytechnic National Univ. (Ukraine); Grzegorz Luka, Bartłomiej S. Witkowski, Marek Godlewski, Elżbieta Guziwicz, Institute of Physics (Poland); Zenon Y. Hotra, Lviv Polytechnic National Univ. (Ukraine); Jurate Simokaitiene, Juozas V. Grazulevicius, Kaunas Univ. of Technology (Lithuania); Natalia Kostiv, Lviv Polytechnic National Univ. (Ukraine). [8065-46]

Zinc oxide films grown by atomic layer deposition for reflective coating applications, Grzegorz Luka, Bartłomiej S. Witkowski, Tomasz A. Krajewski, Institute of Physics (Poland); Andrzej Witowski, Univ. of Warsaw (Poland); Rafal Jakiela, Elżbieta Guziwicz, Marek Godlewski, Institute of Physics (Poland) [8065-47]

Optimization of Pd surface plasmon resonance sensor for hydrogen detection, Cedric Perrotton, Nicolas Javahiry, Ecole Nationale Supérieure de Physique de Strasbourg (France); Martin Slaman, Vrije Univ. Amsterdam (Netherlands); Bernard Dam, Technische Univ. Delft (Netherlands); Patrick P. Meyrueis, Ecole Nationale Supérieure de Physique de Strasbourg (France). [8065-48]

The design of a wireless battery-less bi-flash installation with high power leds, Jan Cappelle, Wim De Geest, KaHo Sint-Lieven Hogeschool (Belgium); Naten van Hemelrijck, Linea Trovata (Belgium); Peter Hanselaer, KaHo Sint-Lieven Hogeschool (Belgium) [8065-49]

Perfection of sustainable processes of grinding and polishing of optical details, Yuriy D. Filatov, V. Bakul Institute for Superhard Materials NASU (Ukraine); Olexandr Y. Filatov, National Academy of Sciences of Ukraine (Ukraine); Guy Monteil, Ecole Nationale Supérieure Mécanique et des Microtechniques de Besancon (France); Uwe Heisel, Michael G. Storchak, Univ. Stuttgart (Germany) [8065-50]

Improving the performance of the NIST gonio-colorimeter for measurements of bidirectional reflectance distribution function, Vyacheslav Podobedov, C. Cameron Miller, Maria E. Nadal, National Institute of Standards and Technology (United States) [8065-51]

Nanolayers of a PV metamaterial buried within a single crystal Si; SEM and reflectivity observations, Marek Basta, Univ. de Strasbourg (France); Bartłomiej S. Witkowski, Marek Godlewski, Institute of Physics (Poland); Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France) [8065-52]

Characterization method of multi-interface, multi-layer, heavily doped Si:P nanostructures using electromagnetic propagation, Zbigniew T. Kuznicki, Ecole Nationale Supérieure de Physique de Strasbourg (France); Marek Basta, Univ. de Strasbourg (France) [8065-53]

SESSION 7

Room: Tivoli Wed. 11.00 to 12.00

Photonics in Sustainable Product Design I

Session Chair: **Pierre Ambs**,
Univ. de Haute Alsace (France)

11.00: **The role of photonics in sustainable product design** (*Invited Paper*), Berit Wessler, OSRAM Opto Semiconductors GmbH (Germany) [8065-35]

11.30: **Improving the energy efficiency of telecommunication networks** (*Invited Paper*), Christoph Lange, Deutsche Telekom AG (Germany); Andreas Gladisch, Deutsche Telekom Labs. (Germany) [8065-36]

Lunch Break 12.00 to 13.30

SESSION 8

Room: Tivoli Wed. 13.30 to 15.40

Photonics in Sustainable Product Design I

Session Chair: **Pierre Ambs**,
Univ. de Haute Alsace (France)

13.30: **Fully controlled helicopter for 3D-reconstruction of buildings and survey applications**, Raimund Lehmann, Stefan Staiger, Werner W. Schröder, Hochschule Offenburg (Germany) [8065-37]

13.50: **Mobile display backlight light guide plates based on slanted grating arrays**, Jyrki S. Kimmel, Tapani Levola, Nokia Research Ctr. (Finland) . [8065-38]

14.10: **Realtime implementation of square 16-QAM transmission system**, Ali M. Al-Bermani, Christian Wördehoff, Sebastian Hoffmann, Univ. Paderborn (Germany); Ulrich Rückert, Univ. Bielefeld (Germany); Reinhold Noé, Univ. Paderborn (Germany) . . [8065-39]

14.30: **Clean photonics for environmental monitoring: not only the wavelengths are green** (*Invited Paper*), Hans Zappe, Albert-Ludwigs-Univ. Freiburg (Germany) [8065-41]

15.00: **The european ICT-BOOM project: silicon photonic TB/s routers for improved energy efficiency in optical networks**, Annachiara Pagano, Emilio Riccardi, TelecomitaliaLAB (Italy); Christos Stamatiadis, Konstantinos Vyrosokinos, National Technical Univ. of Athens (Greece); Leontios Stampoulidis, CONSTELEX Technology Enablers (Greece); Hercules Avramopoulos, National Technical Univ. of Athens (Greece) [8065-42]

15.20: **D3-display: the 'no power' (green) electrowetting display**, Michael Jentsch, adt Deutschland GmbH (Germany) [8065-43]

SPIE would like to express its deepest appreciation to the symposium chairs, conference chairs, programme committees, session chairs, and authors who have so generously given their time and advice to make this symposium possible.

The symposium, like our other conferences and activities, would not be possible without the dedicated contribution of our participants and members. This programme is based on commitments received up to the time of publication and is subject to change without notice.

General Information

Onsite Services

Cashier Services

The onsite cashier can assist with registration payments, receipts, and badge corrections.

Registration Payments

If you have paid by cash or cheque as part of your onsite registration, wish to add a publication or a guest ticket requiring payment, or have questions regarding your registration please see the onsite cashier at the Cashier station at the registration desk.

Receipts

Preregistered attendees who did not receive a receipt prior to the meeting may obtain a new copy of their registration receipt onsite at the Cashier's desk.

Badge Corrections

Attendees who need a correction to their badge information onsite may do so at the Cashier's desk.

Message Centre

Messages for attendees can be left by calling the Palais de la Musique et des Congrès and asking for the SPIE Eco-Photonics Conference and Registration Desk. Messages will be taken during registration hours Monday, Tuesday, and Wednesday. It is the attendee's responsibility to check the message boards on a daily basis.

Internet Access / WiFi

Internet Access via WiFi will be available; speeds may vary depending on the number of users.

Luggage Storage and Coat Check

A cloakroom is located near the Erasme Foyer on the ground floor of the Congress Centre. Opening times are from

Monday 28 March 07.30 to 18.30 hrs.

Tuesday 29 March 08.00 to 18.30 hrs

Wednesday 30 March08.00 to 16.30 hrs.

SPIE Marketplace

The SPIE Marketplace is your source for the latest SPIE Press books, Proceedings, and Education and Professional Development materials. A selection will be available for you to browse at the registration desk.

Speaker Services _____

Speaker Check-In

All conference rooms will have a computer workstation, LCD projector, screen, lapel microphone, and laser pointer.

All presenters are requested to use the rooms of their conference in the breaks or in the mornings to test their presentation.

Interactive Poster Sessions Setup Instructions

Poster presenters may display their poster papers starting at 12.00 hrs on Tuesday in the Forum. Any papers left on the boards following the lunch break on Wednesday will be considered unwanted and will be discarded. SPIE assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 9.30 to 10.30 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Policies _____

Audio/Video/Digital Recording Policy

Because of copyright restrictions, video or digital recording of any conference session or poster is strictly prohibited without written prior consent from each specific presenter to be recorded. Individuals not complying with this policy will be asked to leave a given session and to surrender their film or disc. It is the responsibility of the presenter to notify SPIE if consent is given.

Laser Safety Policy

SPIE uses tested and safety-approved laser pointers for all conference and course rooms. For safety reasons, SPIE requests that presenters use our provided laser pointers. Use of a personal laser pointer at an SPIE event represents user's acceptance of liability for use of a non-SPIE Europe-supplied laser pointer device. Misuse of any laser pointer could lead to eye damage.

Unsecured Items

Personal belongings such as briefcases, backpacks, coats, book bags, etc., should not be left unattended in meeting rooms or public areas. These items will be subject to removal by security upon discovery.

Catering _____

Coffee Breaks

Forum, 1st Floor

Complimentary coffee will be served twice each day of the conference at approximately 10.00 and 15.00. Please check the individual technical conference listings for exact times and locations.

Travel to the Conference Venue _____

TRAM is the most popular, most effective and by all means the most comfortable way of transport in Strasbourg. Four tram lines (A, B, C and D) connect all corners of the city and make city traffic more fluid. Lines A, B and C operate from Monday to Sunday from 4.30 till 0.30 while the line D operates every day except Sunday, from 7.00 till 19.00. Route B heading to Hoenheim Gare will take you to the stops "Wacken" or "Rives de L'Aar", and the congress centre is between them. Route B will also take you back into the city centre, heading to Elsau/Lingolsheim.

TAXI: The main taxi companies in Strasbourg are:

Taxi 13 30 avenue de la Paix
Tel : +33 (0)3 88 36 13 13

Allo Taxi 65 avenue du Neuhof
Tel : +33 (0)3 88 22 99 99

Mondial Taxi 99 route du Neuhof
Tel : +33 (0)3 88 22 11 11

Taxi One 72 rue de la Renaissance
Tel : +33 (0)6 19 55 53 90

Rental Car

Hertz Car Rental

Call your local Hertz Reservation Center to receive a special discount for the Eco-Photonics Meeting. Reservations may also be placed online at www.hertz.com. You will receive 15% off qualifying retail rates with Unlimited Mileage at participating locations in France. Be sure to identify yourself as an SPIE Eco-Photonics Meeting attendee. The **PC#146090** must be on your advance reservation to receive this special offer. You must present the coupon at time of rental in order to receive the discount.

Go to www.spie.org/x40123.xml to download coupon.
