

Technical Programme

SPIE *Europe* Optics+ Optoelectronics

20–23 April 2009

Prague Congress Centre
Prague, Czech Republic

Welcome!

Participants from countries all over the world are invited to attend SPIE *Europe* Optics + Optoelectronics to be held in Prague, Czech Republic, April 20-23, 2009. Following the success and excellent feedback for its 2007 Prague debut, Optics + Optoelectronics has returned to the Czech Republic in 2009.

This Central European conference series has become a networking platform enabling exchange of recent research advances in optics and optoelectronics, stimulate discussion about novel concepts and fields of applications; promote dissemination of scientific results; and offer opportunities to ask questions, support discussions, and enable networking among fellow researchers.

The event will bring forward the latest advances in instruments and devices development: from x-ray optics, photonic manufacturing, to emerging nanotechnologies—among many other cutting-edge topics. The event will begin with a comprehensive “hot topics” session, and will feature workshops discussing the latest European effort and advances in Emerging High-Power European Laser Facilities as well as the new Central European Synchrotron Laboratory project.

We invite all researchers, scientists, engineers, and application and product developers to join their colleagues and share results related to the conference topics described here. Visit the city of hundred spires; the magical city of bridges, cathedrals, gold-tipped towers and church domes. We welcome you to feel at home in Czech Republic. Please come and join us for this exciting meeting in Prague!

General Chairs:

Pavel Tomanek, Brno Univ. of Technology, Czech Republic

Alan Michette, King's College London, United Kingdom

Bahaa Saleh, Boston Univ., USA

Honorary Chair:

Jan Perina, Sr., Palacky Univ., Czech Republic

Cooperating Organisations

Institute of Physics, Academy of Sciences of the Czech Republic

Institute of Physics

Hot Topics Plenary Session

Monday 20 April 8.30 to 12.05

Optics+Optoelectronics will begin with a Hot Topic Session. The Hot Topics will feature Europe's leading scientists discussing the most recent scientific breakthroughs. The session will also serve as a platform for new information updates on the European Commission's Framework 7 programme.

8.30 to 8.50

Welcome and Introduction

8.50 to 9.20

Photonics: The European Vision

John Magan, Acting Head of Photonics Unit, European Commission, Information Society and Media Directorate-General, Belgium

9.20 to 10.05

Photon Physics: From Wave Mechanics to Quantum Electronics

Ole Keller, Institute of Physics and Nanotechnology Aalborg Univ., Denmark

10.35 to 11.20

Quantum Free Electron Laser

Rodolfo Bonifacio, Istituto Nazionale Fisica Nucleare (INFN), Univ. degli Studi di Milano, Italy; visiting professor, Univ. of Strathclyde, UK

11.20 to 12.05

Meopta-optika, s.r.o.: Manufacturer of High-Tech Products

Gerry Rausnitz, CEO and President, Meopta-optika a.s., Czech Republic and President, Meopta U.S.A. Inc., USA

Welcome Reception

Strahov Monastery Brewery - (See map page 37).

Monday 20 April 18.30 to 20.30

All attendees are invited to attend the Welcome Reception which will be held at the Strahov Monastery Brewery near the Prague Castle. Relax, socialize, and enjoy light refreshments. Please remember to wear your conference registration badges. Dress is casual. For details on how to get to the venue, please check with the registration desk.

Poster Session and Reception

Conference Area Hallway

Tuesday 21 April 17.45 to 19.15

All symposium attendees are invited to attend the Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded. SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Exhibition

Congress Hall Foyer B - 1st Floor

Tuesday 21 April 10.00 to 17.00

Wednesday 22 April 10.00 to 16.00

SPIE Europe Optics+Optoelectronics brings together exhibitors, from both the local region and the international optics and photonics community, to showcase a wide range of products and services.

These Workshops are
Part of the **SPIE Celebration**
of the **50th Anniversary of the Laser**

Emerging European Laser Facilities: Beyond Petawatt (WK01)

Tuesday 21 April 9:00 to 17:00

Chairs: **Luis Roso**, Univ. de Salamanca (Spain); **Bedrich Rus**, Institute of Physics, Academy of Sciences of the Czech Republic

The Emerging European Laser Facilities: Beyond Petawatt Workshop focuses on the present status and progress reports of the transnational projects such as HiPER, ELI, and XFEL. Invited lectures by the leading scientists and industry players will provide overview of these new High-Power Laser facilities as well as their user communities. The Workshop will serve as a forum to explore further possibilities for transnational collaborations and to discuss the future of multilateral initiatives of such large size.

9.00 to 9.10: Welcome and Introduction

Luis Roso, Univ. de Salamanca (Spain); **Bedrich Rus**, Institute of Physics, Academy of Sciences of the Czech Republic

9.10 to 9.45: Introduction to ESFRI Roadmap

Christian Kurrer, European Commission (Belgium)

9.45 to 10.20: High-Power Lasers

Wolfgang Sandner, Max Born Institute for Non-linear Optics and Short-Pulse Spectroscopy (Germany), Chair, Management Board, EC Research Infrastructure Network "LASERLAB-EUROPE"

10.20 to 10.50: Coffee Break

10.50 to 11.25: Extreme Light Infrastructure (ELI)

Jean-Paul Chambaret, Laboratoire d'Optique Appliquée, Ecole Nationale Supérieure de Technique Avancée (France), Project Manager, ELI Preparatory Phase

11.25 to 12.00: HiPER, European High Power laser Energy Research Facility

Mike Dunne, Central Laser Facility, Rutherford Appleton Lab. (United Kingdom), Coordinator, HiPER Preparatory Phase

12.00 to 12.35: The European X-ray Free Electron Laser Facility (European XFEL), Thomas Tschentscher, Deutsches Elektronen-Synchrotron (Germany)

12.35 to 14.00: Lunch Break

14.00 to 15.00 Large Laser Facilities as an Industrial Engine Views from the industrial perspective

15.00 to 15.30: Coffee Break

15.30 to 17.00: Round Table Discussion: Emerging European Laser Facilities: Beyond Petawatt

Moderator: **Luis Roso**, Univ. de Salamanca (Spain)

CESLAB: Challenges in Optics and Optoelectronics (WK02)

Thursday 23 April 9:00 to 18:15

Chairs: **Jaromir Hrdy**, Institute of Physics, Academy of Sciences of the Czech Republic; **Petr Mikulik**, Masaryk Univ., Czech Republic

The CESLAB Challenges in Optics and Optoelectronics Workshop will feature invited presentations by skilled experts. It will serve as a platform to discuss the potential effects of the Central European Synchrotron Laboratory (CESLAB) on the future advances in Optics and Optoelectronics.

9.00 to 9.10: Welcome and Introduction

Jaromir Hrdy, Institute of Physics, Academy of Sciences of the Czech Republic; **Stanislav Kozubek**, Institute of Biophysics, Academy of Sciences of the Czech Republic

9.10 to 9.45: Status Report of the CESLAB Project

Petr Mikulik, Masaryk University (Czech Republic)

9.45 to 10.30: Hard X-Ray Microspectroscopy at BESSY II

Alexei Erko, Berliner Elektronenspeicherring-Gesellschaft für Synchrotronstrahlung m.b.H./BESSY (Germany)

10.30 to 11.00: Coffee break

11.00 to 11.45: Diffractive X-ray Optics for Microscopy and Radiography Applications

Christian David, Paul Scherrer Institut (Switzerland)

11.45 to 12.30: Holographic Approach to Difuse Scattering of X-rays

Milos Kopecky, Institute of Physics ASCR (Czech Republic)

12.30 to 14.00: Lunch

14.00 to 14.45: Internally Water Cooled Crystal Monochromators: Advantages and Problems

Peter Oberta, Institute of Physics ASCR (Czech Republic)

14.45 to 15.30: Recent Achievement at Elettra in the Field of Beamline Optics and Instrumentation

Daneile Cocco, ELETTRA, Sincrotrone Trieste S.C.p.A. (Italy)

15.30 to 16.00: Coffee break

16.00 to 16.45: High Performance X-ray Optical and Mechanical System for 3rd Generation Synchrotron USAXS Instrument

Jan Ilavsky, **Deming Shu**, **Peter Jemian**, Argonne National Lab, Advanced Photon Source (USA)

16.45 to 17.30: IMAGE: X-ray Imaging Beamline at ANKA

Daniele Pelliccia, ANKA, Forschungszentrum Karlsruhe (Germany)

17.30 to 18.15: Hard X-ray Microimaging at the SYRMEP Beamline of Elettra: Case Studies

Josef Kaiser, Brno Univ. of Technology (Czech Republic)

Plenary Sessions

Monday 20 April 8.30 to 12.05

8.30 to 8.50

Welcome and Introduction

2009 Symposium Chairs: **Pavel Tomanek**, Brno Univ. of Technology, Czech Republic; **Alan Michette**, King's College London, United Kingdom; **Bahaa Saleh**, Boston Univ., USA

2009 SPIE President: **Maria Yzuel**, University Autònoma de Barcelona, Spain

8.50 to 9.20

Photonics : The European Vision

John Magan, Acting Head of Photonics Unit, European Commission, Information Society and Media Directorate-General, Belgium

The speaker will present an overview of the relevant developments in Photonics research in Europe, including the opportunities for funding research at European level as well as some new initiatives at national level. The future opportunities will be

placed in the global context of European strengths and upcoming developments in the photonics market. The speaker will also address the many challenges which face the innovator, such as fragmentation of research effort, adequate financing, access to research infrastructure as well as the supply of the skilled people needed to grow the photonics industry.

Biography: **John Magan** received a Ph.D. in laser physics from Trinity College Dublin in 1989. After working for Hoechst AG in Germany from 1989 to 1992, where he was responsible for setting up an industrial laser lab, he joined the European Commission where he has worked in research funding in the Community's Information and Communication Technologies programmes. In 2007 he was appointed deputy head of the photonics unit on its creation.

9.20 to 10.05

Photon Physics: From Wave Mechanics to Quantum Electronics

Ole Keller, Institute of Physics and Nanotechnology Aalborg University, Denmark

The birth of quantum field radiation theory, developed in the years 1925-30, did not mean that the particle concept of light was given up. Beautiful wave mechanical theories for the photon were established by Landau and Peierls [1930], and by Oppenheimer[1931]. Over the years physicists

interest in photon wave mechanics has waxed and waned, but never fallen to rest. The wave mechanical theory of the photon (a first-quantized theory based on a reinterpretation of the microscopic Maxwell-Lorentz equations) can be extended to the QED-level, and in the modern formulation the theory has given us valuable new insight in subjects such as spatial photon localization, single-photon wave packet emission from atoms, the near-field photon concept, transverse photon mass and eikonal theory, photon tunnelling, rim zone causality, and the photon position operator problem.

Biography: **Ole Keller** is a physical optics theorist. In recent years he has worked on fundamental aspects of the microscopic electrodynamics of mesoscopic systems, nonlinear optics of BCS-superconductors, the quantum theory of near-field optics, photon tunnelling, spatial photon localization, and photon wave mechanics. He has a Doctor of Science degree from the University of Århus, and a Ph.D degree from the Technical University of Denmark in Copenhagen. He is a fellow of the Optical Society of America, in recognition of his contributions to microscopic optical theories of mesoscopic media.

10.05 to 10.35: Coffee Break

10.35 to 11.20

Quantum Free-Electron Laser

Rodolfo Bonifacio, Istituto Nazionale Fisica Nucleare (INFN), Univ. degli Studi di Milano, Italy; visiting professor, Univ. of Strathclyde, UK

Co-authors: **N. Piovella**, Univ. di Milano, Italy; **G. Robb**, **Dino Jaroszynski**, Univ. of Strathclyde, United Kingdom

We propose a new quantum description of the electron beam, described as the Quantum FEL (QFEL) regime. In

this QFEL regime the interaction must be treated quantum mechanically, analogous to a two-level atomic system, which results in the prediction of intrinsic coherence that results in a linewidth three to four orders of magnitude smaller than the corresponding classical SASE linewidth. Conceptually, this is a novel macroscopic quantum coherence effect. This can be realised very compactly by Compton backscattering a laser pulse from a cold electron beam. The QFEL can provide an ultra compact source of coherent radiation also below the Angstrom region.

In this study we describe the basic physics of a novel macroscopic quantum coherence phenomena: the Quantum Free Electron Laser (QFEL). Unlike the classical FEL, where the momentum spread is larger than the emitted photon momentum hk , in QFEL the energy spread is smaller, so that the discreteness of the momentum quantization plays a fundamental role. In the self-amplified spontaneous emission (SASE) mode operation a quantum coherence effect takes place. Whereas in the classical situation the spectrum of the emitted radiation is formed by many incoherent random spikes, in the quantum regime the system radiates coherently a single Superradiant spike whose spectrum is a single very narrow line. The current international XFEL programmes attempting to reach the 1 Angstrom region of the spectrum are based on this classical theory of SASE. Despite the high average radiation power (~10GW), they produce radiation pulses with relatively poor temporal coherence. We show that the quantum FEL can be described using quantum fluid equations which in the classical limit reduce to well known equations in plasma physics. The QFEL requires a laser wiggler and a cold electron beam, so it can be realized as a very convenient table-top source in the Angstrom region. Towards this end, the possibility of using a laser-plasma wakefield accelerator and a plasma channel to guide the FEL radiation will be briefly discussed.

Biography: In 1984 **Rodolfo Bonifacio** laid down the foundations for the high gain free-electron laser (FEL) starting from noise, the so-called Self-Amplified Spontaneous Emission (SASE) FEL which is now central to several billion dollar X-ray FEL (XFEL) programmes around the world. In 1994 he developed a complete theory of SASE radiation which predicted the temporal structure and spectrum. **Rodolfo Bonifacio** is a recipient of a number of scientific awards that — among others — include the Michelson Medal of the Franklin Institute for his theoretical studies of Optical Bistability and the Einstein Medal of the Society for Quantum Optics and Quantum Electronics for his work on the free-electron laser. Recently, Professor Bonifacio and colleagues have proposed a quantum description of the electron beam, which predicts a completely new regime for the FEL: the Quantum FEL (QFEL) regime.

11.20 to 12.05

Meopta-optika, s.r.o.: Manufacturer of High-Tech Products

Gerry Rausnitz, CEO and President, Meopta-optika a.s., Czech Republic and President, Meopta U.S.A. Inc., USA

The presentation will discuss Meopta as a successful business enterprise with a wide range of diversified, high-tech manufacture as well as its own research and development in numerous areas of optics, mechanics, and optoelectronics. Company portfolio includes products of sports and military optics, such as day and night vision observation and spotting binoculars. Meopta's optics systems for radiologic video displays and subsystems for analyzing body fluids using luminescence represents company's contributions to the medical industry; and dispersion prism systems used by DLP projectors also belong to the line of digital projection techniques developed and distributed by Meopta. Other high-tech ventures include Meopta's cooperation with companies as a developer and manufacturer of testing subsystems for semiconductor elements based on reflection and dispersion of ultraviolet radiation.

In order to retain its high technical level, cooperation with universities and scientific institutions is of great importance to the company. Based on this cooperation Meopta has carried out a number of experiments in the field of micromanipulation using optical traps, forming and controlling of luminous beam using stereometric modulators and diffraction optical elements. Development of modules using light forceps for microelements, which usage is expected in medical and microbiological area, has accounted as one of the accomplishments of this cooperation.

Biography: **Gerry Rausnitz** is the CEO and President of Meopta Optika in Prerov, Czech Republic. With over 2,500 employees, Meopta is a world leader in research and production of optical, optronic, and opto-electrical products for aerospace, military, medical, industrial, and other applications.

Following his 30 years as the President of Tyrolit Co. Inc., manufacturer of fine optical products for industrial and military applications, Gerry joined the Board of Directors at Meopta in 1996, and started establishing a vision for the future of the company. Since 2003, as the CEO and President of Meopta, Gerry has introduced modern technologies and business practices thus enabling the company to compete in world markets. Gerry is also the President of Meopta U.S.A., Meopta's U.S. affiliate.

Zheludev**, Univ. of Southampton (United Kingdom); **Richard W. Ziolkowski**, The Univ. of Arizona (USA)

Monday 20 April

Room: Club D Mon. 13.30 to 13.40

Opening Remarks

Vladimir Kuzmiak, Institute of Photonics and Electronics (Czech Republic); **Peter Markos**, Slovak Univ. of Technology (Slovakia); **Tomasz Szoplik**, Warsaw Univ. (Poland)

SESSION 1

Room: Club D Mon. 13.40 to 15.10

Metamaterials I

Session Chair: **Kurt Busch**, Univ. Karlsruhe (Germany)

13.40: **Spatial dispersion in a wire mesh metamaterial** (*Invited Paper*), Didier Felbacq, Univ. Montpellier II (France); Guy Bouchitte, Univ. de Toulon et du var (France); Brahim Guizal, Univ. Montpellier II (France) [7353-01]

14.10: **Low-loss infrared metallo-dielectric metamaterials: theory and applications**, Boubacar Kante, André de Lustrac, Jean Michel Lourtioz, Univ. Paris-Sud (France) [7353-02]

14.30: **Negative and imaginary permittivity in 2D photonic macroporous silicon structures**, Lyudmila A. Karachevtseva, Vitaliy I. Ivanov, Volodimir F. Onishchenko, Olena J. Stronska, V. Lashkariov Institute of Semiconductor Physics (Ukraine) [7353-03]

14.50: **Negative effective permeability of multilayers of ordered arrays of metal-dielectric nanosandwiches**, Christos Tserkezis, Nikolaos Stefanou, Georgios Gantzounis, Univ. of Athens (Greece); Nikolaos Papanikolaou, National Ctr. for Scientific Research Demokritos (Greece) [7353-04]

Coffee Break 15.10 to 15.30

SESSION 2

Room: Club D Mon. 15.30 to 17.40

Metamaterials II

Session Chair: **Peter Markos**, Slovak Univ. of Technology (Slovakia)

15.30: **2D metamaterials: from simple to complex--coupling matters!** (*Invited Paper*), Harald W. Giessen, Univ. Stuttgart (Germany) [7353-05]

16.00: **Kramers-Kronig relations in one-dimensional dispersive photonic crystals**, Michael Bergmair, Ulrich Dobramysl, Kurt Hingerl, Johannes Kepler Univ. Linz (Austria) [7353-06]

16.20: **Metamaterial absorber with wide angular and frequency bandwidth**, Alessandro Toscano, Lucio Vegni, Univ. degli Studi di Roma Tre (Italy) [7353-07]

16.40: **Infrared metamaterials and plasmons engineering**, Boubacar Kante, André de Lustrac, Jean Michel Lourtioz, Univ. Paris-Sud (France) [7353-08]

17.00: **Propagation and tunneling of electromagnetic waves through uniaxial metamaterials at arbitrary orientations of the optical axis**, Evgenii G. Starodubtsev, Gomel State Technical Univ. (Belarus) [7353-09]

17.20: **Optics of metamaterials based on channelled mirror structures**, Eugene Y. Glushko, Institute of Semiconductor Physics (Ukraine) [7353-10]

Tuesday 21 April

SESSION 3

Room: Club D Tues. 9.00 to 12.00

Modelling of Metamaterials

Session Chair: **Harald W. Giessen**, Univ. Stuttgart (Germany)

9.00: **Analysis of metallic nanostructures via a discontinuous-Galerkin time-domain approach** (*Invited Paper*), Kurt Busch, Univ. Karlsruhe (Germany) [7353-11]

9.30: **Analytical modelling of linear and nonlinear properties of metamaterials based on multipole expansion**, Arkadi Chipouline, Jörg Petschulat, Ekaterina Pshenay-Severin, Friedrich-Schiller-Univ. Jena (Germany); Andreas Tünnermann, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany); Thomas Pertsch, Christoph Menzel, Thomas Paul, Falk L. Lederer, Friedrich-Schiller-Univ. Jena (Germany) [7353-12]

9.50: **Monte Carlo analysis of local distribution of negative refractive index in nanosphere-doped liquid crystal metamaterial**, Grzegorz Pawlik, Michal Jarema, Wiktor T. Walasik, Antoni C. Mitus, Warsaw Univ. of Technology (Poland) [7353-13]

Coffee Break 10.10 to 10.40

10.40: **Magneto-optical response enhancement in 1D and 2D magnetoplasmonic crystals**, Andrey A. Fedyanin, Alexander G. Zhdanov, Andrey Grunin, Boris B. Tsema, Alexander A. Ezhov, Tatyana V. Dolgova, Elena Ganshina, Lomonosov Moscow State Univ. (Russian Federation) [7353-14]

11.00: **An all-purpose three-dimensional finite element model for bigratings**, Guillaume Demésy, Frederic Zolla, André Nicolet, Mireille Commandré, Caroline Fossati, Institut Fresnel (France); Olivier Gagliano, Brendan Dunne, STMicroelectronics (France) [7353-15]

11.20: **A genetic algorithm based procedure to retrieve effective parameters of planar metamaterial samples**, Simone Tricarico, Filiberto Bilotti, Lucio Vegni, Univ. degli Studi di Roma Tre (Italy) [7353-16]

11.40: **Dielectric-metal-dielectric nanotip for SNOM**, Tomasz J. Antosiewicz, Piotr Wrobel, Tomasz Szoplik, Univ. Warsaw (Poland) [7353-48]

Lunch/Exhibition Break 12.00 to 13.20

SESSION 4

Room: Club D Tues. 13.20 to 15.30

Plasmonics I

Session Chair: **Tomasz Szoplik**, Univ. Warszawski (Poland)

13.20: **Conquering loss and stimulated emission in nanoplasmonic systems** (*Invited Paper*), Mikhail A. Noginov, Guohua Zhu, Norfolk State Univ. (United States) [7353-18]

13.50: **Propagation of surface plasmons through surface interfaces**, Tomas Vary, Peter Markos, Slovak Univ. of Technology (Slovakia) [7353-19]

14.10: **Interaction of a surface plasmon polariton beam with chain of nanoparticles**, Andrey L. Stepanov, Andrey B. Evlyukhin, Roman Kiyan, Boris N. Chichkov, Laser Zentrum Hannover e.V. (Germany) [7353-20]

14.30: **Confined modes in planar particle arrays**, Xesus M. Bendaóa, F. Javier Garcia de Abajo, Consejo Superior de Investigaciones Cientificas (Spain) [7353-21]

14.50: **Gap plasmons in neighboring metal wires**, Alejandro Manjavacas, F. Javier Garcia de Abajo, Consejo Superior de Investigaciones Cientificas (Spain) [7353-22]

15.10: **The negative refractive index materials as the aggregate of the spherical particles or porous in the different ambient medium**, Martha Tagviashvili, V. I. Bereziani, Georgian Academy of Sciences (Georgia) [7353-23]

Coffee Break 15.30 to 15.50

Wednesday 22 April

SESSION 5

Room: Club D Tues. 15.50 to 17.40

Plasmonics II

Session Chair: Concita Sibilia, Univ. degli Studi di Roma, La Sapienza (Italy)

15.50: **All-dielectric sub-diffraction optical circuitry with man-made surface plasmons** (*Invited Paper*), Stavroula Foteinopoulou, Eleftherios N. Economou, Maria Kafesaki, Costas M. Soukoulis, Foundation for Research and Technology-Hellas (Greece)[7353-24]

16.20: **Modelling the optical response of metal nanoparticles**, Viktor Myroshnychenko, Consejo Superior de Investigaciones Cientificas (Spain); Jessica Rodríguez-Fernández, Enrique Carbo-Argibay, Isabel Pastoriza-Santos, Jorge Pérez-Juste, Luis M. Liz-Marzán, Univ. de Vigo (Spain); F. Javier García de Abajo, Consejo Superior de Investigaciones Cientificas (Spain)[7353-26]

16.40: **Observation of enhanced transmission through a deep subwavelength aperture**, Atilla O. Cakmak, Kamil B. Alici, Bilkent Univ. (Turkey); Filiberto Bilotti, Lucio Vegni, Univ. degli Studi di Roma Tre (Italy); Ekmel Özbay, Bilkent Univ. (Turkey)[7353-26]

17.00: **Transmission enhancement of light through a metallic nanoslit with periodic metallic nanostrips**, Yanxia Cui, Yi Jin, Zhejiang Univ. (China); Yoichi Okuno, Kumamoto Univ. (Japan); Sailing He, Royal Institute of Technology (KTH) (Sweden)[7353-27]

17.20: **Plasmon-induced wavelength-dependent polarization switching in optical metamaterials**, Maxim R. Shcherbakov, Polina P. Vabishchevich, Andrey A. Fedyanin, Lomonosov Moscow State Univ. (Russian Federation); Alexander S. Sigov, Alexander A. Zaitsev, Moscow Institute for Radioengineering, Electronics and Automation (Russian Federation)[7353-28]

Room: Club D Tues. 17.45 to 19.15

Posters—Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Superlensing for the generation of strongly enhanced localised field, Eugene G. Bortchagovsky, Institute of Semiconductor Physics (Ukraine)[7353-42]

Influence of ionized radiation of optical characteristics of Ge coordinate compounds, Yaroslav I. Lepikh, Odessa National I.I. Mechnikov Univ. (Ukraine)[7353-43]

Imaging in the visible wavelength range through anisotropic layered flat lens operating in the canalization regime, Anna Pastuszczak, Rafal Kotyński, Univ. Warszawski (Poland)[7353-44]

Zero-average index band-gap edges in m-bonacci metamaterial multilayers, Juan A. Monsoriu, Univ. Politècnica de València (Spain); Ricardo A. Depine, Maria L. Martinez-Ricci, Univ. de Buenos Aires (Argentina); Enrique Silvestre-Mora, Pedro Andrés Bou, Univ. de València (Spain)[7353-45]

Surface defect layer for beaming with photonic crystals, Evrim I. Colak, Humeyra Caglayan, Ozgur A. Cakmak, Ekmel Özbay, Bilkent Univ. (Turkey); Alessandro D. Villa, Filippo Capolino, Univ. degli Studi di Siena (Italy)[7353-46]

Complex Fourier factorization method applied in modeling optical metamaterials based on 2D periodic nanostructures, Roman Antos, Martin Veis, Stefan Visnovsky, Charles Univ. in Prague (Czech Republic) ...[7353-47]

SESSION 6

Room: Club DWed. 8.30 to 10.20

Subwavelength Imaging

Session Chair: Vladimir Kuzmiak, Institute of Photonics and Electronics (Czech Republic)

8.30: **Novel approaches to subwavelength imaging based on metasurfaces** (*Invited Paper*), Constantin R. Simovski, Univ. ITMO (Russian Federation)[7353-29]

9.00: **Super resolution and spectral properties of coupled guided wave system**, Antonio Mandatori, Alessio Benedetti, Mario Bertolotti, Concita Sibilia, Univ. degli Studi di Roma, La Sapienza (Italy); Michael Scalora, Charles M. Bowden Research Facility (United States)[7353-30]

9.20: **Metal-dielectric superlens with ultra-flat phase of the modulation transfer function**, Tomasz Stefaniuk, Rafal Kotyński, Tomasz Szoplik, Univ. of Warsaw (Poland)[7353-31]

9.40: **Focusing of radially polarized light with corrugated silver nanolayer**, Piotr Wróbel, Jacek Pniowski, Tomasz J. Antosiewicz, Tomasz Szoplik, Univ. of Warsaw (Poland)[7353-32]

10.00: **Subwavelength focus using radiationless interference at optical wavelengths**, Reuven Gordon, Univ. of Victoria (Canada)[7353-33]

Coffee Break10.20 to 10.50

SESSION 7

Room: Club DWed. 10.50 to 12.20

Metamaterials Fabrication Technologies

Session Chair: Constantin R. Simovski, Univ. ITMO (Russian Federation)

10.50: **Tunability of metamaterial via a ferroelectric and liquid crystal technologies** (*Invited Paper*), Didier Lippens, Institut d'Electronique de Microélectronique et de Nanotechnologie (France)[7353-34]

11.20: **Proximity-effect induced limitations on the density of electron-beam patterned planar photonic nanostructures**, Robert Wueest, ETH Zürich (Switzerland) and ABB Switzerland (Switzerland); Heinz Jaeckel, ETH Zürich (Switzerland)[7353-35]

11.40: **Optical spectroscopy of terbium-scandium-aluminium garnet and terbium-scandium perovskite**, Kamil Postava, Lukas Halagacka, Ondrej Zivotsky, David Hrabovsky, Jaromir Pistora, Technical Univ. of Ostrava (Czech Republic); Dorota A. Pawlak, Sebastian Turczynski, Katarzyna Kolodziejak, Institute of Electronic Materials Technology (Poland)[7353-36]

12.00: **Design of miniaturized printed monopole antennas through phase-compensation**, Luca Scorrano, Filiberto Bilotti, Lucio Vegni, Univ. degli Studi di Roma Tre (Italy)[7353-37]

Lunch/Exhibition Break12.20 to 13.40

SESSION 8

Room: Club DWed. 13.40 to 15.00

Device Application of Metamaterials

Session Chair: Stavroula Foteinopoulou, Foundation for Research and Technology-Hellas (Greece)

13.40: **Optical antennas composed on multiple plasmonic nanoparticles**, Ludmila N. Raguin, Matthew D. Mishrikey, Takumi Sannomiya, Christian Hafner, Rüdiger Vahldieck, ETH Zürich (Switzerland)[7353-38]

14.00: **Asymmetric split ring resonators for optical sensing**, Basudev Lahiri, Univ. of Glasgow (United Kingdom); Scott G. McMeekin, Glasgow Caledonian Univ. (United Kingdom); Ali Z. Khokhar, Richard M. De La Rue, Nigel P. Johnson, Univ. of Glasgow (United Kingdom)[7353-39]

14.20: **Quasi-quantitative demonstration of multi-mode refractive index sensors based on standing-wave plasmonic resonances in split ring resonators**, Yun-Tzu Chang, Ta-Jen Yen, National Tsing Hua Univ. (Taiwan)[7353-40]

14.40: **Tunable terahertz metamaterials with negative permeability**, Petr Kuzel, Hynek Nemeč, Filip Kadlec, Institute of Physics (Czech Republic); Patrick Mounaix, Univ. Bordeaux I (France)[7353-41]

Nonlinear Optics and its Applications

Conference Chair: **Mario Bertolotti**, Univ. degli Studi di Roma, La Sapienza (Italy)

Conference Co-Chairs: **Joseph W. Haus**, Univ. of Dayton (USA); **Alexei M. Zheltikov**, Lomonosov Moscow State Univ. (Russian Federation)

Programme Committee: **Robert W. Boyd**, Univ. of Rochester (USA); **Bruno Crosignani**, Univ. dell'Aquila (Italy); **Claude Fabre**, Univ. Pierre et Marie Curie (France); **Hiromasa Ito**, The Institute of Physical and Chemical Research (RIKEN) (Japan); **Yuri S. Kivshar**, The Australian National Univ. (Australia); **Jan Perina, Sr.**, Univ. Palackeho (Czech Republic); **Derryck T. Reid**, Heriot-Watt Univ. (United Kingdom); **Mark I. Stockman**, Georgia State Univ. (USA); **Ching-Yue Wang**, Tianjin Univ. (China)

Monday 20 April

Room: Club H Mon. 13.25 to 13.30

Opening Remarks

Mario Bertolotti, Univ. degli Studi di Roma, La Sapienza (Italy)

SESSION 1

Room: Club H Mon. 13.30 to 15.10

Solitons

13.30: **Nonlinear photonics in multi-dimensional and complex photonic lattices** (*Invited Paper*), Cornelia Denz, Westfaelische Wilhelms-Univ. Muenster (Germany); Jörg Imbrock, Univ. Osnabrück (Germany)[7354-01]

14.10: **Instabilities and solitons in semiconductor media with spatiotemporal dispersion**, Fabio Biancalana, Max Planck Institute for the Science of Light (Germany)[7354-02]

14.30: **Optical spatial solitons in glassy potassium-lithium-tantalate-niobate**, Eugenio Del Re, Univ. degli Studi dell'Aquila (Italy); Alessandro Ciattoni, Univ. degli Studi dell'Aquila (Italy); Claudio Conti, Univ. degli Studi di Roma, La Sapienza (Italy); Aharon J. Agranat, The Hebrew Univ. of Jerusalem (Israel)[7354-03]

14.50: **Linear and nonlinear localization of light in one-dimensional bulk and planar photorefractive photonic superlattices in lithium niobate**, Ksenia V. Shandarova, Technische Univ. Clausthal (Germany); Vladimir M. Shandarov, State Univ. of Control Systems and Radioelectronics (Russian Federation); Yang Tan, Feng Chen, Shandong Univ. (China); Detlef Kip, Christian Rüter, Technische Univ. Clausthal (Germany)[7354-04]

Coffee Break 15.10 to 15.40

SESSION 2

Room: Club H Mon. 15.40 to 17.40

Multiphoton Process

15.40: **Simultaneous multiple species imaging by femtosecond multiphoton laser-induced fluorescence** (*Invited Paper*), Richard B. Miles, Arthur Dogaru, Herschel A. Rabitz, Jonathan D. Roslund, Princeton Univ. (United States)[7354-05]

16.20: **Observation of laser induced Optogalvanic-like effect in liquid: a case of optical nutation of the dipole vectors**, Rajib Bordoloi, Tinsukia College (India); Ranjana Bora, Namrup College (India); Gauranga D. Baruah, Dibrugarh Univ. (India)[7354-50]

16.40: **Photoluminescence and optical studies of photodegradation in nonlinear optical organic chromophores**, Sebastiampillai G. Raymond, Grant V. M. Williams, Andrew J. Kay, Benjamin Lochocki, Delower Bhuiyan, Industrial Research Ltd. (New Zealand)[7354-08]

17.00: **Size-dependent and dopant-enhanced three-photon absorption in semiconductor quantum dots**, Wei Ji, National Univ. of Singapore (Singapore)[7354-09]

17.20: **Characterization of super optical power limiting in a triphenylamine derivative solution**, Wei Huang, Ying Qian, Changgui Lu, Yiping Cui, Southeast Univ. (China)[7354-47]

Tuesday 21 April

SESSION 3

Room: Club H Tues. 8.30 to 10.30

Devices and Applications

Session Chair: **Mark I. Stockman**, Georgia State Univ. (USA)

8.30: **Nonlinear effects in plasmonic nanostructures** (*Invited Paper*), Anatoly V. Zayats, Queen's Univ. Belfast (United Kingdom)[7354-10]

9.10: **Plasmon-assisted effects in nonlinear-optical response of magnetic nanodisks**, Tatyana V. Murzina, Irina A. Kolmychek, Oleg A. Aktsipetrov, Lomonosov Moscow State Univ. (Russian Federation); Alfonso Cebollada, Gaspar Arnelles, Ctr. Nacional de Microelectrónica (Spain)[7354-11]

9.30: **Properties of quadratic nonlinear interaction of GaN based structures**, Fabio Antonio Bovino, Elsag Datamat S.p.A. (Italy); Maria Cristina Larciprete, Marco Centini, Alessandro Belardini, Mario Bertolotti, Concita Sibilia, Univ. degli Studi di Roma, La Sapienza (Italy); Adriana Passaseo, Vittorianna Tasco, National Nanotechnology Lab. (Italy)[7354-12]

9.50: **Novel ultra-high-speed deeply etched polymer electro-optic modulator**, Shyyqri Haxha, Univ. of Kent (United Kingdom)[7354-13]

10.10: **Second harmonic generation from metallic**, Marco Centini, Alessio Benedetti, Concita Sibilia, Mario Bertolotti, Univ. degli Studi di Roma, La Sapienza (Italy); Michael Scalora, U.S. Army Aviation and Missile Command (United States) [7354-14]

Coffee Break 10.30 to 10.50

SESSION 4

Room: Club H Tues. 10.50 to 12.50

Applications and Photonic Crystals

Session Chair: **Concita Sibilia**, Univ. degli Studi di Roma, La Sapienza (Italy)

10.50: **Highly nonlinear GaSb-based saturable absorber mirrors**, Riku A. Koskinen, Soile Suomalainen, Jonna Paajaste, Samuli Kivistö, Mircea D. Guina, Oleg G. Okhotnikov, Markus Pessa, Tampere Univ. of Technology (Finland)[7354-15]

11.10: **Photo-physical properties and triplet-triplet absorption of platinum(II) acetylides in solid PMMA matrices**, Eirik Glimsdal, Norwegian Univ. of Science and Technology (Norway); Robert M. Westlund, Royal Institute of Technology (KTH) (Sweden); Bertil Eliasson, UmeÅ Univ. (Sweden); Mikael Lindgren, Norwegian Univ. of Science and Technology (Norway)[7354-16]

11.30: **Optical limiting in hydrogenated amorphous silicon selenium thin films**, Hacene Manaa, Abdullah Al-Mulla, Noor Al-Jamal, Kuwait Univ. (Kuwait); Shawqi Al-Dallal, Saleh M. Al-Alawi, Univ. of Bahrain (Bahrain)[7354-17]

11.50: **Design and modeling of chi (2) second harmonic amplification in Circular Photonic Crystal**, Alessandro Massaro, Vittorianna Tasco, Maria T. Todaro, Tiziana Stomeo, Roberto Cingolani, Massimo De Vittorio, Adriana Passaseo, National Nanotechnology Lab. (Italy)[7354-18]

12.10: **Dynamics of band-edge 2D-photonic crystal lasers**, Rama Raj, Fabrice Raineri, Alejandro M. Yacomotti, Lab. de Photonique et de Nanostructures (France) [7354-19]

12.30: **All-optical signal processing based on trapped modes of a photonic crystal resonator**, Eugene Y. Glushko, Institute of Semiconductor Physics (Ukraine); Vladimir N. Evteev, Alexander N. Stepanyuk, Krivoy Rog Pedagogical Institute (Ukraine); Alexander E. Glushko, Univ. of Leoben (Austria)[7354-20]

Lunch/Exhibition Break 12.50 to 13.50

SESSION 5

Room: Club H Tues. 13.50 to 15.30

Non-classical Optics

13.50: **Experimental test on dynamical vacuum fluctuations** (*Invited Paper*), Fabio A. Bovino, Elsag Datamat S.p.A. (Italy)[7354-21]

14.30: **Generation of entangled photon pairs in periodically poled nonlinear crystals**, Jiri Svozillk, Jan Perina, Jr., Palacky Univ. (Czech Republic)[7354-22]

14.50: **Photon logic gates using ultraslow light**, Byoung S. Ham, Joonsung Hahn, Inha Univ. (Korea, Republic of)[7354-23]

15.10: **Advanced application of a planar wave guide from a bismuth as an active element of optical devices**, Oleg V. Kondakov, Sylvestre Karambizi, National Univ. of Rwanda (South Africa)[7354-24]

Coffee Break 15.30 to 15.50

SESSION 6

Room: Club H Tues. 15.50 to 17.10

Nonlinear Generation

- 15.50: **Application of waveguide arrays and spectral filtering for a multi-frequency picosecond: Mode-locked Pulse Source**, Brandon G. Bale, J. Nathan Kutz, Univ. of Washington (United States); Edward D. Farnum, Kean Univ. (United States) [7354-25]
- 16.10: **Pulse shortening by passive negative feedback in mode-locked train from highly-doped Nd:YAG in a bounce geometry**, Vaclav Kubecek, Miroslav Cech M.D., Petr Hiröl, Czech Technical Univ. in Prague (Czech Republic); Andreas Stintz, Jean-Claude M. Diels, The Univ. of New Mexico (United States) [7354-26]
- 16.30: **Optical pulse frequency shift with mismatched three-wave interaction**, Valery E. Lobanov, Anatoly P. Sukhorukov, Lomonosov Moscow State Univ. (Russian Federation) [7354-28]
- 16.50: **The unified theory of chirped-pulse oscillators**, Vladimir L. Kalashnikov, Technische Univ. Wien (Austria) [7354-29]

Room: Club H Tues. 17.45 to 19.15

Posters—Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions

Pr:YAP generation in blue spectral region, Martin Fibrich, Helena Jellnkova, Miroslav Cech, Czech Technical Univ. in Prague (Czech Republic); Karel Nejezchleb, Vaclav Skoda, Crytur Ltd. (Czech Republic) [7354-42]

Parabolic pulse propagation in mean-zero, dispersion-managed transmission systems and mode-locked laser cavities, Brandon G. Bale, J. Nathan Kutz, Univ. of Washington (United States) [7354-43]

Solvents effects on NLO properties of ethyl eosin dye, Ahmad Y. Nooraldeen, Anna Univ. (India) [7354-44]

Photophysics of organic and inorganic media treated with nanoobjects, Natalie V. Kamanina, Petr Y. Vasilyev, Vladislav Studenov, S.I. Vavilov State Optical Institute (Russian Federation) [7354-45]

Optical switching mechanism in GaP double injection devices, Tina Laperashvili, Orest Kvitsiani, Institute of Cybernetics (Georgia) [7354-46]

Characterization of super optical power limiting in a triphenylamine derivative solution, Wei Huang, Ying Qian, Changgui Lu, Yiping Cui, Southeast Univ. (China) [7354-47]

The modeling and characterization of simple semiconductor wafers, Junewen Chen, Chung-Hua Univ. (Taiwan) [7354-48]

Cascade parametric oscillator system at 5.75 μm for cholesterol elimination, Tomokazu Shido, Chitose Institute of Science and Technology (Japan); Takuya Mikami, Chitose Institute of Science and Technology (Japan) and Okamoto Optics Work, Inc. (Japan); Kiyoshi Kato, Chitose Institute of Science and Technology (Japan) [7354-49]

Observation of laser induced Optogalvanic-like effect in liquid: a case of optical nutation of the dipole vectors, Rajib Bordoloi, Tinsukia College (India); Ranjana Bora, Namrup College (India); Gauranga D. Baruah, Dibrugarh Univ. (India) [7354-50]

Growth, FT-IR studies and in-situ growth rate measurements on [100] and [101] faces of $\text{K}_1\text{-x}(\text{NH}_4)\text{xH}_2\text{PO}_4$ mixed crystals from aqueous solutions, Hamid Rezagholipour Dizaji, Zahra Zargar, Univ. of Semnan (Iran, Islamic Republic of) [7354-51]

Optical studies of high-field carrier transport of AlGaInP and GaInP for optoelectronics device optimizations, Mohammad Reza Khalvati, Shahrood Univ. of Technology (Iran, Islamic Republic of); Sayed Hadi Mousavi, Shahrood Univ. of Technology (Iran, Islamic Republic of); Hadi Arabshahi, Ferdowsi Univ. (Iran, Islamic Republic of) [7354-52]

Theoretical and experimental analysis of beam propagation in a nonlinear optical media using Gaussian decomposition method, Ehsan Koushki, Sabzevar Univ. of Tarbiat Moallem (Iran, Islamic Republic of); Sayed Hadi Mousavi, Hamid Haratizadeh, Shahrood Univ. of Technology (Iran, Islamic Republic of); Mohammad Hosein Majles Ara, Tarbiat Moallem Univ. (Iran, Islamic Republic of) [7354-53]

Partition function and order parameter measurements for nematic liquid crystals, Sayed Hadi Mousavi, Shahrood Univ. of Technology (Iran, Islamic Republic of); Ehsan Koushki, Tarbiat Moallem Univ. of Sabzevar (Iran, Islamic Republic of); Hamid Haratizadeh, Navid Aghanoori, Sayed Amin Jafari, Shahrood Univ. of Technology (Iran, Islamic Republic of) [7354-54]

The role of exciton-exciton interaction on nonlinearity in GaN microdisks, Saeid Shojaei, Univ. of Tabriz (Iran, Islamic Republic of) and Univ. degli Studi di Modena (Italy); Filippo Troiani, Guido Goldoni, Univ. degli Studi di Modena (Italy); Manouchehr Kalafi, Asghar Asgari, Univ. of Tabriz (Iran, Islamic Republic of) [7354-55]

Wednesday 22 April

SESSION 7

Room: Club H Wed. 8.20 to 10.00

Applications

8.20: **Mapping of attosecond ionization dynamics by recollision-free higher-order harmonic generation (Invited Paper)**, Andrius Baltuska, Alexander V. Mitrofanov, D. V. Kartashov, Vienna Univ. of Technology (Austria); Evgeny E. Serebryannikov, Alexei M. Zheltikov, Lomonosov Moscow State Univ. (Russian Federation) [7354-30]

9.00: **Double grating design of 3D phase matched waveguide for second harmonic $\chi^{(2)}$ process.**, Alessandro Massaro, Roberto Cingolani, Massimo De Vittorio, Adriana Passaseo, National Nanotechnology Lab. (Italy) [7354-31]

9.20: **Blue laser light generation by frequency doubling of a cesium vapor laser**, Boris V. Zhdanov, Yalin Lu, Michael Shaffer, Wooddy Miller, Dallas Wright, U.S. Air Force Academy (United States); W. Holmes, Univ. of California, Berkeley (United States); Randall J. Knize, U.S. Air Force Academy (United States) [7354-32]

9.40: **Ultrafast depolarization based on four-wave mixing in highly nonlinear optical fiber**, Changxi Yang, Yu Tian, Peng Dong, Tsinghua Univ. (China) [7354-33]

Coffee Break 10.00 to 10.20

SESSION 8

Room: Club H Wed. 10.20 to 13.00

Generation and Terahertz

10.20: **Numerical study and optimization of third harmonics generation in two-sectioned periodically poled LiTaO_3 .**, Oleg A. Louchev, Megaopto Co., Ltd. (Japan); Satoshi Wada, The Institute of Physical and Chemical Research (RIKEN) (Japan) [7354-34]

10.40: **Accurate design and modeling of $\chi^{(2)}$ nonlinear processes in periodic waveguide of by Hertzian Potential Method**, Alessandro Massaro, Vittorianna Tasco, Maria T. Todaro, Roberto Cingolani, Massimo De Vittorio, Adriana Passaseo, National Nanotechnology Lab. (Italy) [7354-35]

11.00: **Mid-infrared laser radiation generation by Fe:ZnSe laser**, Helena Jellnkova, Petr Koranda, Czech Technical Univ. in Prague (Czech Republic); Maxim E. Doroshenko, Tasoltan T. Basiev, General Physics Institute (Russian Federation); Jan ěulc, Michal Nemeč, Czech Technical Univ. in Prague (Czech Republic) [7354-36]

11.20: **Femtosecond pump-probe optical spectroscopy studies of $\text{Ga}_1\text{-xMn}_x\text{As}$ thin films**, G. Pepe, C. de Lisio, L. Parlato, V. Pagliarulo, N. Marrocco, Univ. degli Studi di Napoli Federico II (Italy); C. Zhao, Dong Pan, Hanan Dery, Roman Sobolewski, Univ. of Rochester (United States); V. Novak, K. Olejnik, M. Cukr, Fyzikální stav (Czech Republic) [7354-37]

12.00: **Terahertz pulse generation by the method of optical rectification of few-cycle laser pulses propagating in GaAs crystal**, Artsrun S. Martirosyan, Institute for Physical Research (Armenia); Davit L. Hovhannisyán, Yerevan State Univ. (Armenia); Vigen H. Chaltikyan, Institute for Physical Research (Armenia); Komitas G. Stepanyan, Yerevan State Univ. (Armenia) [7354-39]

12.20: **On the self-modulation mechanism of the emission of THz radiation from 2D lattice of nonlinear metallic nanoparticles illuminated by light**, Roman Noskov, Alexander A. Zharov, Institute for Physics of Microstructures (Russian Federation); Maxim Tsarev, Nizhny Novgorod State Univ. (Russian Federation) [7354-40]

12.40: **Laser-driven proton acceleration and plasma diagnostics with J-KAREN laser**, Alexander S. Pirozhkov, Japan Atomic Energy Agency (Japan) [7354-41]

Quantum Optics and Quantum Information Transfer and Processing

Conference Chair: **Miloslav Dusek**, Univ. Palackeho (Czech Republic)

Program Committee: **Ulrik Andersen**, Danmarks Tekniske Univ. (Denmark); **Markus Arndt**, Univ. of Vienna (Austria); **Jens Eisert**, Imperial College London (United Kingdom); **Jaromir Furiasek**, Univ. Palackeho (Czech Republic); **Daniel F.V. James**, Univ. of Toronto (Canada); **Christian Kurtsiefer**, National Univ. of Singapore (Singapore); **Andreas Poppe**, Univ. Wien (Austria); **Fabio Sciarrino**, Univ. degli Studi di Roma, La Sapienza (Italy); **Andrew J. Shields**, Toshiba Research Europe Ltd. (United Kingdom)

Monday 20 April

Room: Club C Mon. 13.30 to 13.40

Opening Remarks

Miloslav Dusek, Univ. Palackeho (Czech Republic)

SESSION 1

Room: Club C Mon. 13.40 to 15.30

Quantum Cryptography and Quantum Information Processing

Session Chair: **Miloslav Dusek**, Univ. Palackeho (Czech Republic)

- 13.40: **Gigahertz decoy quantum key distribution with megabit/s secure key rate** (*Invited Paper*), Zhiliang Yuan, Toshiba Research Europe Ltd. (United Kingdom); Alex R. Dixon, Toshiba Research Europe Ltd. (United Kingdom) and Univ. of Cambridge (United Kingdom); James F. Dynes, Andrew W. Sharpe, Andrew J. Shields, Toshiba Research Europe Ltd. (United Kingdom)[7355A-01]
- 14.10: **Three-qubit quantum gates and filters for linear optical quantum information processing**, Jaromir Furiasek, Univ. Palackého V Olomouci (Czech Republic) [7355A-02]
- 14.30: **Principles of quantum computing on the base of physical properties of photon echo effect**, Elena V. Melnichenko, Moscow Engineering Physics Institute (Russian Federation) [7355A-03]
- 14.50: **Perfect state transfer for quantum systems with multiple excitations**, Thomas Brougham, Igor Jex, Vojtech Kostak, Czech Technical Univ. in Prague (Czech Republic); Georgios Nikolopoulos, Foundation for Research and Technology-Hellas (Greece) [7355A-04]
- 15.10: **Quantum interference by coherence transfer from spin to orbital angular momentum of photons**, Eleonora Nagali, Istituto Nazionale di Fisica Nucleare (Italy) and Univ. degli Studi di Napoli Federico II (Italy); Fabio Sciarrino, Istituto Nazionale di Fisica Nucleare (Italy); Francesco De Martini, Univ. degli Studi di Roma, La Sapienza (Italy); Lorenzo Marrucci, Bruno Piccirillo, Ebrahim Karimi, Enrico Santamato, Univ. degli Studi di Napoli Federico II (Italy)[7355A-05]
- Coffee Break 15.30 to 16.00

SESSION 2

Room: Club C Mon. 16.00 to 17.40

Quantum Entanglement and Quantum Optics

Session Chair: **Zhiliang Yuan**, Toshiba Research Europe Ltd. (United Kingdom)

- 16.00: **Micro-Macro entangled photon systems: results and perspectives**, Chiara Vitelli, Fabio Sciarrino, Francesco De Martini, Univ. degli Studi di Roma, La Sapienza (Italy) [7355A-06]
- 16.20: **X-Entanglement of PDC photon pairs**, Lucia Caspani, Enrico Brambilla, Ottavia Jedrkiewicz, Luigi Lugiato, Alessandra Gatti, Univ. degli Studi dell'Insubria (Italy) [7355A-07]
- 16.40: **Photon-number statistics of twin beams and their non-classical properties**, Jan Perina, Jr., Jan Perina, Sr., Ondrej Haderka, Jaromir Krepelka, Martin Hamar, Vaclav Michalek, Univ. Palackého V Olomouci (Czech Republic); Maria Bondani, Alessia Allevi, Alessandra Andreoni, Univ. degli Studi dell'Insubria (Italy) [7355A-08]
- 17.00: **Complete bi-partite CV entanglement characterization via Covariance Matrix measurement.**, Alberto Porzio, Istituto Nazionale di Fisica Nucleare (Italy); Stefano Fornaro, Salvatore Solimeno, Univ. degli Studi di Napoli Federico II (Italy); Virginia D'Auria, Ecole Normale Supérieure (France)[7355A-09]
- 17.20: **Wafer fused InP-GaAs optically-pumped semiconductor disk laser operating at 1.57- μm** , Jari Lyytikainen, Jussi Rautiainen, Tampere Univ. of Technology (Finland); Alexei Sirbu, Alexandru Mereuta, Andrei Caliman, Eli Kapon, Ecole Polytechnique Fédérale de Lausanne (Switzerland); Oleg G. Okhotnikov, Tampere Univ. of Technology (Finland) [7355A-10]

Tuesday 21 April

Room: Club C Tues. 17.45 to 19.15

Posters--Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Quantum random walk with jumps, Hynek Lavicka, Martin Stefanak, Igor Jex, Czech Technical Univ. in Prague (Czech Republic) [7355A-11]

Recurrences in quantum walks, Martin Stefanak, Igor Jex, Czech Technical Univ. in Prague (Czech Republic); Tamas Kiss, Research Institute for Solid State Physics and Optics (Hungary) [7355A-12]

Optimizing the quantum random-walk search on the hypercube, Vaclav Potocek, Czech Technical Univ. in Prague (Czech Republic); Aurel Gabris, Czech Technical Univ. in Prague (Czech Republic) and Research Institute for Solid State Physics and Optics (Hungary); Tamas Kiss, Research Institute for Solid State Physics and Optics (Hungary); Igor Jex, Czech Technical Univ. in Prague (Czech Republic) [7355A-13]

Photon Counting Applications

Conference Chairs: **Ivan Prochazka**, Czech Technical Univ. in Prague (Czech Republic); **Roman Sobolewski**, Univ. of Rochester (USA)

Programme Committee: **Alan L. Migdall**, National Institute of Standards and Technology (USA); **Ulrich Schreiber**, Technische Univ. München (Germany); **Wojciech Slys**, Instytut Technologii Elektronowej (Poland); **Michael Wahl**, PicoQuant GmbH (Germany); **Josef Blazej**, Czech Technical University in Prague (Czech Republic)

Tuesday 21 April

Room: Club C **Tues. 8:15 to 8.20**

Opening Remarks

Ivan Prochazka, Czech Technical Univ. in Prague (Czech Republic);
Roman Sobolewski, Univ. of Rochester (USA)

SESSION 3

Room: Club C **Tues. 8.20 to 10.20**

Superconducting Photon Counters

Session Chair: **Roman Sobolewski**, Univ. of Rochester (USA)

8.20: **Ultrafast infrared superconducting single-photon detectors** (*Invited Paper*), Robert H. Hadfield, Heriot-Watt Univ. (United Kingdom) ... [7355B-15]

8.50: **Superconducting nanowire detectors for quantum optics** (*Invited Paper, Presentation Only*), Val Zwiller, Sander N. Dorenbos, R. Heeres, Tony Zijlstra, Teun M. Klapwijk, Technische Univ. Delft (Netherlands); G. Steudle, I. Muller, Oliver Benson, Humboldt Univ. zu Berlin (Germany); Roman Sobolewski, Univ. of Rochester (United States) [7355B-16]

9.20: **Avoiding and exploiting the polarization dependence of superconducting single photon detectors**, Sander N. Dorenbos, Nikolay Akopian, Umberto Perinetti, Valéry Zwiller, Tony Zijlstra, Teun M. Klapwijk, Delft Univ. of Technology (Netherlands) [7355B-17]

9.40: **Superconductor/ferromagnet bilayer nanostructures for optical photon counters**, G. Pepe, C. de Lisio, L. Parlato, V. Pagliarulo, N. Marrocco, Univ. degli Studi di Napoli Federico II (Italy); Dong Pan, Roman Sobolewski, Univ. of Rochester (United States) [7355B-18]

10.00: **Superconducting single-photon detectors as optical-photon energy-resolving devices**, Roman Sobolewski, Jennifer Kitaygorsky, Univ. of Rochester (United States); Sander N. Dorenbos, Elisabeth Reiger, R. Schouten, Val Zwiller, Technische Univ. Delft (Netherlands); Wojciech Slys, Institute of Electron Technology (Poland); Arturas Jukna, Vilnius Gediminas Technical Univ. (Lithuania) [7355B-19]

Coffee Break 10.20 to 10.50

SESSION 4

Room: Club C **Tues. 10.50 to 12.20**

Semiconducting Photon Counters

Session Chair: **Ivan Prochazka**, Czech Technical Univ. in Prague (Czech Republic)

10.50: **Avalanche photodiode output pulse rise-time study** (*Invited Paper*), Ivan Prochazka, Josef Blazej, Czech Technical Univ. in Prague (Czech Republic) [7355B-20]

11.20: **High gain and low excess noise near infrared single photon avalanche detector**, Krishna R. Linga, Amplification Technologies, Inc. (United States) [7355B-21]

11.40: **Simulation modelling for the analysis and the optimal design of SPAD detectors for time-resolved fluorescence measurements**, Marina Repich, Univ. degli Studi di Trento (Italy) and Fondazione Bruno Kessler (Italy); David Stoppa, Lucio Pancheri, Fondazione Bruno Kessler (Italy); Gian-Franco Dalla Betta, Univ. degli Studi di Trento (Italy) [7355B-22]

12.00: **Dynamic range of submicron/nanoparticle sizing with photon correlation LDA**, Lenard Vamos, Peter Jani, Research Institute for Solid State Physics and Optics (Hungary) [7355B-23]

Lunch/Exhibition Break 12.20 to 13.20

SESSION 5

Room: Club C **Tues. 13.20 to 15.30**

Photon Counting Applications

Session Chair: **Cesare Barbieri**, Univ. degli Studi di Padova (Italy)

13.20: **Photon counting for a space LIDAR: Phoenix Mars Lander** (*Invited Paper*), Alexander E. Dudelzak, Canadian Space Agency (Canada); Peter Dietrich, MDA Corp. (Canada); Grant Cunningham, Jeffrey W. Tripp, Optech, Inc. (Canada) [7355B-24]

13.50: **Very fast photon counting photometers for astronomical applications: IquEYE for the ESO 3.5m New Technology Telescope**, Cesare Barbieri, Giampiero Naletto, Tommaso Occhipinti, Ivan Capraro, Enrico Verroi, Paolo Zoccarato, Claudia Facchinetti, Claudio Germani, Univ. degli Studi di Padova (Italy); Sergio Billotta, Giovanni Bonanno, Osservatorio Astrofisico di Catania (Italy); Enrico Giro, Osservatorio Astronomico di Padova (Italy) [7355B-25]

14.10: **Multilayers clouds monitoring by micro-Joule lidar based on photon counting receiver and diode laser**, Sergei M. Pershin, A. N. Lyash, Vladislav S. Makarov, A. M. Prokhorov General Physics Institute (Russian Federation); Ivan Prochazka, Josef Blazej, Bruno Sopko, Czech Technical Univ. in Prague (Czech Republic) [7355B-26]

14.30: **Observing variable stars and transiting Exo-Planets with single photon counting**, Georg Kirchner, Franz Koidl, Space Research Institute (Austria); Anton Dusleag, Farhat Iqbal, Technische Univ. Graz (Austria) [7355B-27]

14.50: **Graz kHz SLR LIDAR: first results**, Georg Kirchner, Franz Koidl, Daniel Kucharski, Space Research Institute (Austria); Gerd Huebscher, Technische Univ. Graz (Austria) [7355B-28]

15.10: **Fully integrated time-to-amplitude converter for photon timing applications**, Daniele Resnati, Ivan Rech, Massimo Ghioni, Sergio D. Cova, Politecnico di Milano (Italy) [7355B-29]

Coffee Break 15.30 to 16.00

SPIE Europe Optics+Optoelectronics
proceedings are published at
the speed of light.

SPIE 
Digital Library

Research driving technological
innovation

Conference 7355B

SESSION 6

Room: Club C Tues. 16.00 to 18.00

Semiconductor Photon Detectors

Session Chair: **Josef Blazej**, Czech Technical Univ. in Prague (Czech Republic)

16.00: **SPAD active quenching circuit optimized for satellite laser ranging applications**, Jan Kodet, Ivan Prochazka, Czech Technical Univ. in Prague (Czech Republic); Franz Koidl, Georg Kirchner, Space Research Institute (Austria) [7355B-30]

16.20: **Modeling photon detection efficiency and temporal response of single photon avalanche diodes**, Angelo Gulinatti, Ivan Rech, Silvia Fumagalli, Mattia Assanelli, Massimo Ghioni, Politecnico di Milano (Italy); Sergio D. Cova, Politecnico di Milano (Italy) and Micro-Photon-Devices (Italy) [7355B-31]

16.40: **Optimizing the gated avalanche photodiode detector for quantum key distribution**, Pradeep Kumar, Thiruthakka S. Thevan, Lakshmi V. Narayanan, Anil Prabhakar, Indian Institute of Technology Madras (India) [7355B-32]

17.00: **The development of extremely low noise InAs electron APDs for photon counting applications in SWIR/MWIR wavelengths**, Chee Hing Tan, The Univ. of Sheffield (United Kingdom) [7355B-33]

17.20: **Single photon counting linear mode NIR APD**, George M. Williams, Jr., Voxel, Inc. (United States) [7355B-34]

17.40: **Sensitivity of a receiver using GaInAsSb/AlGaAsSb SAM avalanche photodiode for longwavelength optical communication systems in the mid-infrared spectral range**, Maya P. Mikhailova, Igor A. Andreev, Ekaterina V. Kunitsyna, Yury P. Yakovlev, Ioffe Physico-Technical Institute (Russian Federation) [7355B-35]

Room: Club C Tues. 17.45 to 19.15

Posters--Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Superconducting NbN nanostructures with a dielectric resonant microcavity and metallic mirror for single-photon optical detectors, Wojciech Slys, Marek Guzewicz, Jan Bar, Maciej Wegrzecki, Piotr Grabiec, Iwona Wegrzecka, Remigiusz Grodecki, Institute of Electron Technology (Poland); Vallery Zwiller, Technische Univ. Delft (Netherlands); Sander N. Dorenbos, Technische Univ. Delft (Poland); Irina Milostnaya, Boris Voronov, Gregory N. Gol'tsman, Moscow State Pedagogical Univ. (Russian Federation); Jennifer Kitaygorsky, Roman Sobolewski, Univ. of Rochester (United States) [7355B-36]

Optical Sensors

Conference Chairs: **Francesco Baldini**, Istituto di Fisica Applicata Nello Carrara (Italy); **Jiri Homola**, Institute of Photonics and Electronics (Czech Republic); **Robert A. Lieberman**, Intelligent Optical Systems, Inc. (USA)

Programme Committee: **Vladimir Baumruk**, Charles Univ. in Prague (Czech Republic); **Artur Dybko**, Warsaw Univ. of Technology (Poland); **N. Jaffrezic**, Ctr. de Génie Electrique de Lyon (France); **Laura Maria Lechuga**, CIN2 Research Ctr. on Nanoscience and Nanotechnology (Spain); **Bo Liedberg**, Linköpings Univ. (Sweden); **Aleksandra Lobnik**, Univ. of Maribor (Slovenia); **Ramaier Narayanaswamy**, The Univ. of Manchester (United Kingdom); **Guillermo Orellana**, Univ. Complutense de Madrid (Spain); **Reinhardt Willsch**, IPHT Jena (Germany); **Otto S. Wolfbeis**, Univ. Regensburg (Germany)

Monday 20 April

Room: Club B Mon. 13.25 to 13.30

Opening Remarks

Jiri Homola, Institute of Photonics and Electronics (Czech Republic);
Francesco Baldini, Istituto di Fisica Applicata Nello Carrara (Italy);
Robert A. Lieberman, Intelligent Optical Systems, Inc. (USA)

SESSION 1

Room: Club B Mon. 13.30 to 15.20

Advances in Transducers

Session Chair: **Jiri Homola**, Institute of Photonics and Electronics (Czech Republic)

13.30: **Optical fingerprinting with computer screen photo-assisted techniques (Invited Paper)**, Ingemar Lundstrom, Daniel Filippini, Linköpings Univ. (Sweden) [7356-01]

14.00: **Label-free biosensing by means of an optical micro-ring resonator.**, Mario Iodice, Luca De Stefano III, Giuseppe Coppola, Vito Mocella, Ilaria Rea, Edoardo De Tommasi, Ivo Rendina, Istituto per la Microelettronica e Microsistemi (Italy) [7356-02]

14.20: **Microchanneled chirped fibre Bragg grating**, Pouneh Saffari, Aston Univ. (United Kingdom) [7356-03]

14.40: **Analysis and modeling of a silicon nitride slot-waveguide microring resonator biochemical sensor**, Carlos A. Barrios, Univ. Politécnica de Madrid (Spain) [7356-04]

15.00: **Spin coating and plasma process for 2.5D and hybrid 3D micro-resonators on multilayer polymers**, Bruno Biche, Univ. de Rennes 1 (France); Etienne Gaviot, Univ. du Maine (France); Christian Godet, Abdel Zebda, Arnaud Potel, Jérémy Barbe, Univ. de Rennes 1 (France); Lionel Camberlein, Univ. du Maine (France); Véronique Vié, Pascal Panizza, Goulc'hen Loas, Cyril Hamel, Univ. de Rennes 1 (France); Joseph Zyss, Ecole Normale Supérieure de Cachan (France); Nolwenn Huby, Univ. de Rennes 1 (France) [7356-05]

Coffee Break 15.20 to 15.50

SESSION 2

Room: Club B Mon. 15.50 to 16.30

Interferometric Sensors

Session Chair: **Jiri Homola**, Institute of Photonics and Electronics (Czech Republic)

15.50: **Refractometric sensor based on all-fiber coaxial Michelson interferometers**, Paola Barrios, Univ. Autónoma de San Luis Potosí (Mexico); David Saez-Rodríguez, Univ. de València (Spain); Amparo Rodríguez, Univ. Autónoma de San Luis Potosí (Mexico); José L. Cruz Muñoz, Antonio Díez, Miguel V. Andrés, Univ. de València (Spain) [7356-07]

16.10: **Laser-self-mixing interferometric fiber strain sensor**, Maurizio Dabbico, Simona Ottonelli, Angela Intermite, Gaetano Scarmacio, Univ. degli Studi di Bari (Italy) [7356-47]

Tuesday 21 April

SESSION 3

Room: Club B Tues. 8.30 to 11.10

SPR Sensors

Session Chair: **Ingemar Lundstrom**, Linköpings Univ. (Sweden)

8.30: **Design of plasmonic nanocavities for subradiant LSPR sensing with high sensitivities (Invited Paper)**, Stefan A. Maier, Imperial College London (United Kingdom) [7356-10]

9.00: **Compact and low-cost biosensor based on novel approach to spectroscopy of surface plasmons**, Jiri Homola, Marek Piliarik, Milan Vala, Ivo Tichy, Barbora Spackova, Karel Chadt, Jan Hepnar, Pavel Adam, Alexandra Friedl, Institute of Photonics and Electronics (Czech Republic) [7356-11]

9.20: **Development of portable SPR sensor devices based on integrated periodic arrays of nanoholes**, Fatemeh Eftekhari, Jacqueline Ferreira, Marcos L. J. Santos, Carlos Escobedo, Alexandre G. Brolo, David Sinton, Reuven Gordon, Univ. of Victoria (Canada) [7356-12]

9.40: **Surface plasmon resonance imaging for parallelized detection of cancer biomarkers**, Marek Piliarik, Lucie Parova, Hana Vaisocherova, Jiri Homola, Institute of Photonics and Electronics (Czech Republic) [7356-13]

Coffee Break 10.00 to 10.30

10.30: **Visualization of surface electromagnetic waves in one-dimensional photonic crystal by fluorescence dye**, Irina V. Soboleva, Andrey A. Fedyanin, Lomonosov Moscow State Univ. (Russian Federation); Francesco Michelotti, Univ. degli Studi di Roma, La Sapienza (Italy); Emiliano Descrovi, Fabrizio Giorgis, Politecnico di Torino (Italy) [7356-14]

10.50: **Interaction of blood plasma with SPR sensors**, Eduard Brynda, Cesar Rodriguez Emmenegger, Tomas Riedel, Milan Houska, Institute of Macromolecular Chemistry (Czech Republic) [7356-15]

SESSION 4

Room: Club B Tues. 11.10 to 12.10

Physical Sensors I

Session Chair: **Francesco Baldini**, Istituto di Fisica Applicata Nello Carrara (Italy)

11.10: **Ambient humidity monitoring using a 1D photonic crystal sensor fabricated with glancing angle deposition**, Matthew M. Hawkeye, Univ. of Alberta (Canada); Michael J. Brett, Univ. of Alberta (Canada) and National Institute for Nanotechnology (Canada) [7356-16]

11.30: **Active axial eye motion sensing and tracking by closed loop OPD-locked white light interferometry for combined confocal/ en face optical coherence tomography imaging of the human eye fundus in vivo**, Radu G. Cucu, Univ. of Kent (United Kingdom); Mark W. Hathaway, OTI/Opko Health Inc. (United Kingdom); Adrian G. Podoleanu, Univ. of Kent (United Kingdom); Richard B. Rosen M.D., The New York Eye and Ear Infirmary (United States) [7356-17]

11.50: **Miniature laser doppler velocimetry systems**, Christopher I. Moir, Exact Group LLP (United Kingdom) [7356-18]

Lunch/Exhibition Break 11.10 to 13.30

SESSION 5

Room: Club B Tues. 13.30 to 15.10

Physical Sensors II

Session Chair: **Francesco Baldini**, Istituto di Fisica Applicata Nello Carrara (Italy)

13.30: **A fibre optic sensor for high temperature measurements**, Gaetano D'Altrui, Claudio Calisti Tassini, D'Appolonia S.p.A. (Italy); Harris Tsangaris, Univ. of Cyprus (Cyprus) [7356-19]

Conference 7356

- 13.50: **Influence of residual fiber Birefringence and temperature on the high-current performance of an interferometric fiber-optic current sensor**, Robert Wueest, Andreas Frank, Samuel Wiesendanger, Philippe Gabus, Urs E. Meier, Juergen Nehring, Klaus M. Bohnert, ABB Corporate Research (Switzerland)[7356-20]
- 14.10: **Pump depletion reduction technique for extended-range distributed Brillouin fiber sensors**, Romeo Bernini, Consiglio Nazionale delle Ricerche (Italy); Aldo Minardo, Luigi Zeni, Seconda Univ. degli Studi di Napoli (Italy) [7356-21]
- 14.30: **A novel concept for high-speed, short- and long-distance precision laser ranging**, Alexander E. Dudelzak, Canadian Space Agency (Canada); Guerman A. Pasmanik, Passat Ltd. (Canada)[7356-22]
- 14.50: **On the minimization of timing walk in industrial pulsed time-of-flight laser radars**, Juha Kostamovaara, Jan Nissinen, Sami Kurtti, Ilkka Nissinen, Jussi Jansson, Antti Mantyniemi, Univ. of Oulu (Finland)[7356-23]
- Coffee Break 15.10 to 15.40

SESSION 6

Room: Club B Tues. 15.40 to 17.40

Physical Sensors III

Session Chair: **Ivan Kasik**, Institute of Photonics and Electronics (Czech Republic)

- 15.40: **All-silicon carbide hybrid wireless-wired optics temperature sensor: turbine tests and distributed fiber sensor network design**, Nabeel A. Riza, Mumtaz A. Sheikh, CREOL, The College of Optics and Photonics (United States)[7356-24]
- 16.00: **Laser light-section sensor automating the production of textile-reinforced composites**, Robert Schmitt, Christian Niggemann, Christoph Mersmann, RWTH Aachen (Germany)[7356-25]
- 16.20: **A self - mixing laser sensor for the real - time correction of straightness/flatness deviations of a linear slide**, Simona Ottonelli, Maurizio Dabbicco, Gaetano Scamarcio, Francesco De Lucia, Univ. degli Studi di Bari (Italy)[7356-26]
- 16.40: **Optical sensing of magnetic field based on magnetorefractive effect in manganites**, David Hrabovsky, Technical Univ. of Ostrava (Czech Republic); Gervasi Herranz, Institut de Ciència de Materials de Barcelona (Spain); Kamil Postava, Technical Univ. of Ostrava (Czech Republic); Ingrid C. Infante, Thales Research & Technology (France); Florencio Sanchez, Josep Fontcuberta, Institut de Ciència de Materials de Barcelona (Spain)[7356-27]
- 17.00: **Optical system for the simultaneous measurement of two-dimensional straightness errors and the roll angle**, Ilko Rahneberg, Hans J. Büchner, Gerd Jäger, Technische Univ. Ilmenau (Germany)[7356-28]
- 17.20: **Optical sensing in laser machining**, Igor Smurov, Maria Doubenskaia, Ecole Nationale d'Ingénieurs de Saint-Etienne (France)[7356-29]

Room: Club B Tues. 17.45 to 19.15

Posters--Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded. SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

- Toward extended range sub-micron conoscopic holography profilometers, using multiple wavelengths and phase measurement**, Jose M. Enguita, Ignacio Alvarez, Univ. de Oviedo (Spain); Jorge Marina, DSI Plus (Spain); Guillermo Ojea, José A. Cancelas, Maria Frade, Univ. de Oviedo (Spain)[7356-44]
- Measuring small thickness changes of a thin film by white-light spectral interferometry**, Petr Hlubina, Jiri Lunacek, Dalibor Ciprian, Milena Lunackova, Technical Univ. of Ostrava (Czech Republic)[7356-45]
- Laser-self-mixing interferometric fiber strain sensor**, Maurizio Dabbicco, Simona Ottonelli, Angela Intermitte, Gaetano Scamarcio, Univ. degli Studi di Bari (Italy)[7356-47]
- A signal-to-noise ratio comparison of high dynamic range CMOS image sensors**, Leo H. C. Braga, Suzana Domingues, José G. Gomes, Antonio C. Mesquita, Univ. Federal do Rio de Janeiro (Brazil)[7356-48]

Ink-jet printed fluorescent ammonia sensor on the base of polymer micro- and nanoparticles, Artem A. Khlebunov, Dmitry V. Ionov, Vyacheslav A. Sazhnikov, Aleksander V. Koshkin, Vladimir M. Aristarhov, Andrej N. Petrov, Photochemistry Ctr. (Russian Federation); Natalia Shevchenko, Anastasiya Y. Menshikova, Aleksander V. Yakimanski, Institute of Macromolecular Compounds (Russian Federation); Michael V. Alfimov, Photochemistry Ctr. (Russian Federation)[7356-49]

Application of a silica-on-silicon planar optical waveguide Bragg grating sensor for organic liquid compound detection, Steffen Scheurich, Stefan Belle, Ralf Hellmann, Univ. of Applied Sciences Aschaffenburg (Germany); Gregory D. Emmerson, Ian J. Sparrow, Stratophase Ltd. (United Kingdom)[7356-51]

NON-INVASIVE SENSOR FOR MULTI PARAMETER DIAGNOSTICS OF BLOOD BIOCHEMISTRY, Vladimir A. Saetchnikov, Elina A. Tcherniavskaia, Belarusian State Univ. (Belarus); Gustav Schweiger, Ruhr-Univ. Bochum (Germany)[7356-52]

Preparation of Ni/Zn and NiO/ZnO heterojunction nanowires and their optoelectrical characteristics, Wei-Chih Tsai, Shui-Jinn Wang, Chih-Ren Tseng, Rong-Ming Kuo, National Cheng Kung Univ. (Taiwan); Jia-Chuan Lin, St. John's Univ. (Taiwan)[7356-53]

Detection and identification of micro particles and biological agents by optical micro resonance methods, Vladimir A. Saetchnikov, Elina A. Tcherniavskaia, Belarusian State Univ. (Belarus); Gustav Schweiger, Ruhr-Univ. Bochum (Germany)[7356-54]

Preparation and optoelectronic properties of NiO/ZnO heterostructure nanowires, Wei-Chih Tsai, Shui-Jinn Wang, Chih-Ren Tseng, Rong-Ming Kuo, National Cheng Kung Univ. (Taiwan); Jia-Chuan Lin, St. John's Univ. (Taiwan)[7356-55]

Novel optical-fiber structure as a tension sensor, Jan Skapa, Petr Siska, Jan Vanda, Vladimir Vašinek, Technical Univ. of Ostrava (Czech Republic)[7356-56]

Calculation of the band structure of HgCdTe-based variable composition heterostructures with taking into account the dependence of electron affinity on the composition of HgCdTe, Gorn Dmitry, Tomsk State Univ. (Russian Federation); Sergey N. Nesmelov, Siberian Physical-Technical Institute (Serbia); Andrey P. Kokhanenko, Alexander V. Voitsekhovskii, Tomsk State Univ. (Russian Federation)[7356-57]

Photo-erasure of Type-II femtosecond laser written Bragg gratings employed as high reflectors in moderate power Q-switch fibre laser, Mattias L. Slund, The Univ. of Sydney (Australia); Nemanja Jovanovic, Macquarie Univ. (Australia); Stuart D. Jackson, John Canning, Graham D. Marshall, The Univ. of Sydney (Australia); Alexander Fuerbach, Michael J. Withford, Macquarie Univ. (Australia); Kevin Cook, The Univ. of Sydney (Australia)[7356-58]

Compact all-fiber light source for Brillouin sensor applications, Christian A. Cuadrado-Laborde, Pere Perez-Millan, Miguel V. Andrés, Antonio Díez, Jose L. Cruz Munoz, Univ. de València (Spain); Yuri O. Barmenkov, Ctr. de Investigaciones en Optica, A.C. (Mexico)[7356-59]

Dew point measurement technique utilizing fiber cut reflection, Sergey M. Kostrikskii, Alexey A. Dikevich, Yuri N. Korkishko, Vyacheslav A. Fedorov, Moscow Institute of Electronic Technology (Russian Federation)[7356-60]

Air-suspended solid-core fibers for sensing, Stefano Selleri, Annamaria Cucinotta, Federica Poli, Davide Passaro, Univ. degli Studi di Parma (Italy)[7356-61]

Usage of liquid crystals in optical sensors of mechanical forces and motion, Sergey Pasechnik, Moscow State Univ. of Instrument Engineering and Computer Science (Russian Federation) and Hong Kong Univ. of Science and Technology (Hong Kong, China); Dina Shmeliova, Valentin A. Tsvetkov, Aleksandra Torchinskaya, Moscow State Univ. of Instrument Engineering and Computer Science (Russian Federation); Vladimir G. Chigrinov, Hong Kong Univ. of Science and Technology (Hong Kong, China)[7356-62]

Ratiometric wavelength monitor based on X-type spectral response using two edge filters, Agus M. Hatta, Ginu Rajan, Gerald T. Farrell, Yuliya V. Semenova, Dublin Institute of Technology (Ireland)[7356-63]

Experimental demonstration of a Ferroelectric LC tunable filter for fast demodulation of FBG sensors, Sunish J. Mathews, Yuliya V. Semenova, Ginu Rajan, Gerald T. Farrell, Dublin Institute of Technology (Ireland)[7356-64]

The detector of submillimetric radiation on the base of CdxHg1-xTe (~0.2), Vyacheslav V. Zabudsky, Fedir F. Sizov, Alexey B. Smirnov, Joanna V. Gumenjuk-Sichevska, Natalia I. Momot, V. Lashkariov Institute of Semiconductor Physics (Ukraine)[7356-65]

Multi-domain LC cell by photoalignment method, Tao Du, Xiaojin Zhao, Vladimir G. Chigrinov, Hoi Sing Kwok, Hong Kong Univ. of Science and Technology (Hong Kong, China)[7356-66]

Numerical analysis of reflection characteristics of cascaded non-uniform fiber Bragg gratings, Erik Gemzicky, Jarmila Millerova, Zilinska Univ. (Slovakia)[7356-67]

Multi-wavelength switchable fibre laser using polarisation selective tilted fibre grating capable for strain and temperature sensing, Pouneh Saffari, Aston Univ. (United Kingdom)[7356-68]

Performance analysis of diode optopair gas sensors, Galina Y. Sotnikova, Sergey E. Aleksandrov, Gennadiy A. Gavrilov, Iofe Physico-Technical Institute (Russian Federation)[7356-69]

Local real-time detection of pH using fibre tapers, Ivan Kasik, Tomas Martan, Ondrej Podrazky, Jan Mrazek, Marie Pospisilova, Vlastimil Matejec, Institute of Photonics and Electronics (Czech Republic)[7356-70]

Optical measuring system used in magnetic field detectors, Jacek Golebiowski, Politechnika Łódzka (Poland)[7356-71]

Light- and touch-point localization using flexible large area organic photodiodes and elastomer waveguides, Petr Bartu, Johannes Kepler Univ. Linz (Austria); Robert Koeppel, Johannes Kepler Univ. Linz (Austria) and isiQiri interface technologies GmbH i.G. (Austria); Lisa Fallon, The Dublin Institute for Advanced Studies (Ireland); Siegfried Bauer, Niyazi S. Sariciftci, Johannes Kepler Univ. Linz (Austria)[7356-72]

Frequency fiber-optical sensor system with wavelength division multiplexing, Alexandre V. Poliakov, Belarusian State Univ. (Belarus) [7356-73]

Optical fiber sensor based on redistribution of power among several guided modes, Petr Siska, Technical Univ. of Ostrava (Czech Republic) ... [7356-74]

Design and evaluation of diffractive optical elements: optimization by using iterative angular spectrum approach and evaluation based on vector diffraction theory, Shuhei Yoshida, Manabu Yamamoto, Tokyo Univ. of Science (Japan)[7356-75]

Observation of plasmon-induced optical field enhancement near a pair of partially metal covered dielectric spheres manipulated by the terms of optical tweezers, Alexander G. Zhdanov, Lomonosov Moscow State Univ. (Russian Federation); Mark P. Kreuzer, Satish Rao, Petru V. Ghenuche, Romain Quidant, ICFO - Instituto de Ciencias Fotónicas (Spain); Andrey A. Fedyanin, Lomonosov Moscow State Univ. (Russian Federation); Dmitri Petrov, ICFO - Instituto de Ciencias Fotónicas (Spain)[7356-77]

Micro force measurement by photoelastic effect in solid-state laser, Khelifa Naceur-Eddine, Conservatoire National des Arts et Métiers (France)[7356-78]

Sensitivity enhancement in surface plasmon resonance sensors theoretical modeling, Jaroslav Vıcek, Jaromir Pistora, Michal Lesnak, Technical Univ. of Ostrava (Czech Republic)[7356-79]

Collection of photogenerated charge carriers in small-pitched PV arrays based on HgCdTe heterostructures, Mikhail S. Nikitin, Galina V. Chekanova, Alpha (Russian Federation); Albina A. Drugova, Viacheslav A. Kholodnov, Institute of Radio-engineering and Electronics (Russian Federation) . [7356-80]

Characterization of sensing layer onto the tip taper fiber, Marie Pospisilova, Institute of Radio Engineering and Electronics (Czech Republic); Jan Petrasek, Institute of Experimental Botany (Czech Republic); Vlastimil Matejec, Ivan Kasik, Institute of Photonics and Electronics (Czech Republic)[7356-81]

Long range surface plasmons for fluorescence spectroscopy-based optical biosensors, Chun Jen Huang, Jakub Dostalek, Max-Planck-Institut für Polymerforschung (Germany) and Austrian Research Ctrs. GmbH (Austria); Wolfgang Knoll, Austrian Research Ctrs. GmbH (Austria)[7356-82]

Fiber optic detection of creatinine in a microsystem, Ilona Grabowska, Michal Chudy, Zbigniew Brzozka, Artur Dybko, Warsaw Univ. of Technology (Poland)[7356-83]

Experimental performances and Monte Carlo modelling of LWIR HgCdTe Avalanche Photodiodes, Sophie Derelle, Sylvie Bernhardt, Riad Haidar, Joel Deschamps, Jérôme Primot, ONERA (France); Johan Rothman, Commissariat à l'Energie Atomique (France)[7356-84]

Sensor of back-scattered light polarization in body cells, Jan Miklas, Pavel Tomanek, Lubomir Grmela, Jitka Brüstlova, Pavel Dobis, Brno Univ. of Technology (Czech Republic)[7356-85]

Design of spectrophotometers and ended-ended systems, Armando G. Rojas, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico)[7356-87]

Further developments on a novel color sensitive CMOS detector, Giacomo Langfelder, Antonio Longoni, Federico Zaraga, Politecnico di Milano (Italy)[7356-89]

Optical interferometric vibration measurements of biological objects, Olena Serozhkina, National Technical Univ. of Ukraine (Ukraine); Grigoriy Tymchik, National Technical University of Ukraine (Ukraine)[7356-90]

Broadband transmission spectroscopy in tissue, application to radiofrequency tissue fusion, Timmy Floume, Richard R. A. Syms, Ara W. Darzi, George B. Hanna, Imperial College London (United Kingdom)[7356-91]

Wednesday 22 April

SESSION 7

Room: Club BWed. 8.40 to 10.00

Components for Sensors

Session Chair: **Ivan Kasik**, Institute of Photonics and Electronics (Czech Republic)

8.40: **A temperature insensitive silicon photodetector**, James A. Harder, Michaelene W. Sprague, Elbit Systems of America (United States) . . [7356-30]

9.00: **Slab waveguide spatial heterodyne spectrometers for remote sensing from space**, Miroslaw Florjanczyk, York Univ. (Canada) and National Research Council Canada (Canada); Pavel Cheben, Siegfried Janz, National Research Council Canada (Canada); Alan D. Scott, COM DEV Canada (Canada); Brian H. Solheim, York Univ. (Canada); Dan-Xia Xu, National Research Council Canada (Canada)[7356-31]

9.20: **Organic photo sensors operating at high speed utilizing poly(9,9-dioctylfluorene) derivative and fullerene derivative fabricated by solution process**, Yutaka Ohmori, Tatsunari Hamasaki, Osaka Univ. (Japan); Taichiro Morimune, Takuma National College of Technology (Japan); Hirotake Kajii, Osaka Univ. (Japan)[7356-32]

9.40: **Sensitivity of fast-response nanographite photodetector at high temperature**, Gennady M. Mikheev, Ruslan G. Zonov, Institute of Applied Mechanics (Russian Federation); Alexander N. Obraztsov, Lomonosov Moscow State Univ. (Russian Federation); Yuri P. Svirko, Univ. of Joensuu (Finland)[7356-33]

Coffee Break10.00 to 10.30

SESSION 8

Room: Club BWed. 10.30 to 113.50

Chemical Sensors

Session Chair: **Martin Hof**, J. Heyrovsky Institute of Physical Chemistry (Czech Republic)

10.30: **Remote Tuneable Diode Laser Absorption Spectroscopy (TDLAS) via a 1W raman source**, David M. Mitchell, Kevin Duffin, Walter Johnstone, Univ. of Strathclyde (United Kingdom)[7356-34]

10.50: **Chemical sensor applications of whispering-gallery modes resonances of thin capillaries with submicrometric wall**, Vanessa Zamora, Antonio Dlez, Benito Gimeno, Miguel V. Andrés, Univ. of Valencia (Spain)[7356-35]

11.10: **Infrared optical sensor for CO₂ detection**, Frédéric Charpentier, Bruno Bureau, Virginie Nazabal, Johann Troles, Quentin Coulombier, Laurent Brilland, Univ. de Rennes 1 (France); Frédéric Smektala, Univ. de Bourgogne (France); Hervé Lhermite, Joël Charrier, Univ. de Rennes 1 (France); Petr Nemeč, Miloslav Frumar, Univ. Pardubice (Czech Republic); Karine Le Pierres, BRGM (France); Nathalie Thybaud, ADEME (France)[7356-36]

11.30: **Liquid-crystal based optical gas sensors**, Kun-Lin Yang, National Univ. of Singapore (Singapore)[7356-38]

Lunch/Exhibition Break 113.50 to 13.30

SESSION 9

Room: Club BWed. 13.30 to 15.20

Biosensors

Session Chair: **Jiri Homola**, Institute of Photonics and Electronics (Czech Republic)

13.30: **Principles and applications of fluorescence lifetime correlation (Invited Paper)**, Martin Hof, J. Heyrovsky Institute of Physical Chemistry (Czech Republic)[7356-39]

14.00: **A fluorescent immunoassay for the determination of procalcitonin and C-reactive protein**, Francesco Baldini, Istituto di Fisica Applicata Nello Carrara (Italy); Luca Bolzoni, Datamed S.r.L. (Italy); Ambra Giannetti, Istituto di Fisica Applicata Nello Carrara (Italy); Giampiero Porro, Datamed S.r.L. (Italy); Folco Senesi, Cosimo Trono, Istituto di Fisica Applicata Nello Carrara (Italy)[7356-40]

14.20: **Advanced biosensing based on surface plasmon-enhanced fluorescence spectroscopy**, Jakub Dostalek, Max-Planck-Institut für Polymerforschung (Germany) and Austrian Research Ctrs. GmbH (Austria); Yi Wang, Chun Jen Huang, Max-Planck-Institut für Polymerforschung (Germany) and Austrian Research Centers - ARC (Austria); Raquel Chulia-Jordan, Max-Planck-Institut für Polymerforschung (Germany) and Austrian Research Ctrs. GmbH (Austria); Alena Aulasevich, Robert F. Roskamp, Annette Brunen, Max-Planck-Institut für Polymerforschung (Germany); Wolfgang Knoll, Austrian Research Ctrs. GmbH (Austria)[7356-41]

14.40: **Intrinsic photoluminescence of diatom shells in sensing applications.**, Edoardo De Tommasi, Ivo Rendina, Istituto per la Microelettronica e Microsistemi (Italy); Mario De Stefano, Annalisa Lamberti, Univ. degli Studi di Napoli Federico II (Italy); Luca De Stefano III, Istituto per la Microelettronica e Microsistemi (Italy)[7356-42]

15.00: **Perfluorinated polymer optical fiber tapers for fluorescence collection**, Romeo Bernini, Consiglio Nazionale delle Ricerche (Italy) .[7356-43]

Photonic Crystal Fibres

Conference Chair: **Kyriacos Kalli**, Cyprus University of Technology (Cyprus)

Conference Co-Chairs: **Dmitry V. Skryabin**, Univ. of Bath (United Kingdom); **Francis Berghmans**, Vrije Univ. Brussel (Belgium)

Programme Committee: **Hartmut Bartelt**, IPHT Jena (Germany); **Benjamin J. Eggleton**, The Univ. of Sydney (Australia); **Sebastien Fevrier**, Univ. de Limoges (France); **Jiri Kanka**, Institute of Photonics and Electronics (Czech Republic); **Jonathan Knight**, Univ. of Bath (United Kingdom); **Hanne Ludvigsen**, Helsinki Univ. of Technology (Finland); **Azizur B. Rahman**, The City Univ. (United Kingdom); **Karsten Rottwitt**, Danmarks Tekniske Univ. (Denmark); **Kay Schuster**, IPHT Jena (Germany); **Waclaw Urbanczyk**, Wroclaw Univ. of Technology (Poland); **David J. Webb**, Aston Univ. (United Kingdom); **Alexei M. Zheltikov**, Lomonosov Moscow State Univ. (Russian Federation)

Wednesday 22 April

Room: Club H Wed. 13.25 to 13.30

Opening Remarks

Kyriacos Kalli, Cyprus University of Technology (Cyprus)

SESSION 1

Room: Club H Wed. 13.30 to 15.20

Advances in PCF Fabrication: Doped and Nonlinear Fibers

Session Chair: **Kay Schuster**, IPHT Jena (Germany)

13.30: **Microstructured fibers with high lanthanum oxide glass core for nonlinear applications** (*Invited Paper*), Jens Kobelke, Kay Schuster, Doris Litzkendorf, Anka Schwuchow, Johannes Kirchhof, Hartmut Bartelt, Vincent Tombelaine, IPHT Jena (Germany); Philippe Leproux, Vincent Couderc, Univ. de Limoges (France); Alexis Labruyere, XLIM Institut de Recherche (France) [7357-01]

14.00: **Highly nonlinear chalcogenide core nanofiber and photonic crystal fiber showing zero dispersion at 1.55 μm** , Chitrarekha B. Chaudhari, Takenobu Suzuki, Yasutake Ohishi, Toyota Technological Institute (Japan) [7357-02]

14.20: **Chalcogenide photonic crystal fibers: elaboration and non linear optical characterizations**, Frédéric Smektala, Mohammed ElAmraoui, Coraline Fortier, Univ. de Bourgogne (France); Gilles Renversez, Univ. Aix Marseille III (France); Julien Fatome, Jean Charles Jules, Gregory Gadret, Sophie Salaün, Univ. de Bourgogne (France); Johann Troles, Univ. de Rennes 1 (France); Laurent Brilland, PERFOS (France); Frederic Desevedavy, Univ. de Rennes 1 (France); Nick Traynor, PERFOS (France) [7357-03]

14.40: **Dispersion-engineered and highly-nonlinear microstructured polymer optical fibres**, Michael H. Frosz, Kristian Nielsen, Ole Bang, Technical Univ. of Denmark (Denmark) [7357-04]

15.00: **Y-shaped microstructured fibers with Ge-doped core**, Salvador Torres-Peiró, Antonio Díez, José L. Cruz Munoz, Miguel V. Andrés, Univ. de València (Spain) [7357-05]

Coffee Break 15.20 to 15.50

SESSION 2

Room: Club H Wed. 15.50 to 16.50

Super Continuum Generation in PCF

Session Chair: **Sébastien Février**, Univ. de Limoges (France)

15.50: **Relativistic particle white light super continuum generation**, Kent E. Mattsson, Crystal Fibre A/S (Denmark) [7357-06]

16.10: **Ge-doped Y-shaped microstructured fiber for supercontinuum generation**, Jaime Cascante-Vindas, Salvador Torres-Peiró, Antonio Díez, Miguel V. Andrés, Univ. de València (Spain) [7357-07]

16.30: **Ultraflat supercontinuum generation in soft-glass photonic crystal fibers**, Juan J. Miret, Univ. de Alicante (Spain); Pedro Andrés Bou, Enrique Silvestre-Mora, Univ. de València (Spain) [7357-08]

SESSION 3

Room: Club H Wed. 16.50 to 17.50

Measurement and Characterisation of PCF

Session Chair: **Waclaw Urbanczyk**, Politechnika Wroclawska (Poland)

16.50: **Broadband measurement of dispersion in a two-mode birefringent holey fiber by spectral interferometric techniques**, Petr Hlubina, Dalibor Ciprian, Miroslava Kadulova, Technical Univ. of Ostrava (Czech Republic); Gabriela Statkiewicz-Barabach, Waclaw Urbanczyk, Wroclaw Univ. of Technology (Poland) [7357-09]

17.10: **Characterization of modes excited in a nonlinear photonic crystal fibre using low coherence interferometry**, Purnananda Nandi, William J. Wadsworth, Timothy A. Birks, Jonathan C. Knight, Univ. of Bath (United Kingdom) [7357-10]

17.30: **Birefringence dispersion in elliptical-core fibers measured over a broad wavelength range by interferometric techniques**, Petr Hlubina, Dalibor Ciprian, Miroslava Kadulova, Technical Univ. of Ostrava (Czech Republic); Gabriela Statkiewicz-Barabach, Waclaw Urbanczyk, Wroclaw Univ. of Technology (Poland); Jan Wojcik, Maria Curie-Sklodowska Univ. (Poland) [7357-11]

Thursday 23 April

SESSION 4

Room: Club H Thurs. 8.30 to 9.50

PCF-based Laser Mid-infrared Sources

Session Chair: **Dmitry V. Skryabin**, Univ. of Bath (United Kingdom)

8.30: **Dynamic behaviour of an Ytterbium-doped rodlike PCF laser**, Federica Poli, Davide Passaro, Annamaria Cucinotta, Stefano Selleri, Univ. of Parma (Italy) [7357-12]

8.50: **Hollow-core photonic crystal fibers for integrated mid infrared sources**, Benoit Beaudou, Univ. de Limoges (France) and CPPM, Univ. of Bath (United Kingdom) [7357-13]

9.10: **Chalcogenide As₂S₃ suspended core fiber for mid-IR wavelength conversion based on degenerate four-wave mixing**, Marcin Szpulak, Wroclaw Univ. of Technology (Poland); Sébastien Février, Univ. de Limoges (France) [7357-14]

9.30: **Singlemode leakage channel fiber for the middle infrared**, Leonid N. Butvina, Olesya V. Sereda, Alexey L. Butvina, Eugeny M. Dianov, A. M. Prokhorov General Physics Institute (Russian Federation); Ninel V. Lichkova, Vladimir N. Zagorodnev, Institute of Microelectronics Technology and High Purity Materials (Russian Federation) [7357-15]

Coffee Break 9.50 to 10.20

SESSION 5

Room: Club H Thurs. 10.20 to 12.10

Grating Sensor Applications of PCF

Session Chair: Francis Berghmans, Vrije Univ. Brussel (Belgium)

10.20: **Bragg grating writing in photonic crystal fibres** (*Invited Paper*), Kevin J. Cook, John Canning, The Univ. of Sydney (Australia); Alexandre A. P. Pohl, Federal Univ. of Technology Parana (Brazil); John L. Holdsworth, The Univ. of Newcastle (Australia); Nathaniel Groothoff, The Univ. of Sydney (Australia)[7357-16]

10.50: **Fiber bragg gratings in microstructured optical fibers for stress monitoring**, Thomas Geernaert, Vrije Univ. Brussel (Belgium); Geert Luyckx, Eli Voet, Univ. Gent (Belgium); Tomasz A. Nasilowski, Karima Chah, Vrije Univ. Brussel (Belgium); Martin Becker, Hartmut Bartelt, IPHT Jena (Germany); Wacław Urbanczyk, Wrocław Univ. of Technology (Poland); Jan Wójcik, Maria Curie-Skłodowska Univ. (Poland); Wim De Waele, Joris Degrieck, Univ. Gent (Belgium); Francis Berghmans, Hugo Thienpont, Vrije Univ. Brussel (Belgium)[7357-17]

11.10: **Comparison between femtosecond laser and fusion-arc inscribed long period gratings in photonic crystal fibre**, Tom D. P. Allsop, Aston Univ. (United Kingdom); Kyriacos Kalli, Cyprus Institute of Technology (Cyprus); Kaiming Zhou, Graham N. Smith, Aston Univ. (United Kingdom); Michalis Z. Komodromos, Frederick Institute of Technology (Cyprus); Kate Sugden, Mykhaylo Dubov, David J. Webb, Ian Bennion, Aston Univ. (United Kingdom)[7357-18]

11.30: **Inscription of type IIA bragg reflectors in a highly non-linear microstructured optical fiber using deep ultraviolet laser radiation**, Stavros Pissadakis, Michalis Livitziis, Georgios Tsididis, Foundation for Research and Technology-Hellas (Greece); Jens Kobelke, Kay Schuster, IPHT Jena (Germany)[7357-19]

11.50: **Long period fibre gratings photoinscribed in a microstructured polymer optical fibre by UV radiation**, David Sáez-Rodríguez, Jose L. Cruz Munoz, Univ. de València (Spain); I. Johnson, David J. Webb, Aston Univ. (United Kingdom); Maryanne C. J. Large, Alexander Argyros, Martijn A. van Eijkelenborg, The Univ. of Sydney (Australia)[7357-20]

Lunch Break12.10 to 13.30

SESSION 6

Room: Club H Thurs. 13.30 to 16.10

Modelling and Numerical Analysis of PCF

Session Chair: Jiri Kanka, Institute of Photonics and Electronics (Czech Republic)

13.30: **A mode-solver for photonic crystal fibers based on the source-model technique** (*Invited Paper*), Yehuda Leviatan, Amit Hochman, Technion-Israel Institute of Technology (Israel)[7357-21]

14.00: **Understanding form Birefringence of microstructured fibres**, Laurent Labonté, Lab. de Physique de la Matière Condensée (France) and Univ. de Nice Sophia Antipolis (France); Dominique Pagnoux, Univ. de Limoges (France); Elio Pone, Maksim Skorobogatiy, Suzanne Lacroix, Ecole Polytechnique de Montréal (Canada)[7357-22]

14.20: **Guiding and amplification properties of rod-type photonic crystal fibers with sectioned core doping**, Stefano Selleri, Federica Poli, Davide Passaro, Annamaria Cucinotta, Univ. of Parma (Italy); Jesper Lægsgaard, Danmarks Tekniske Univ. (Denmark); Jes Broeng, Crystal Fibre A/S (Denmark)[7357-23]

14.40: **Single-mode regime in large mode area moat fiber**, Davide Passaro, Federica Poli, Annamaria Cucinotta, Stefano Selleri, Univ. of Parma (Italy); Emil Voiculescu, Univ. of Cluj-Napoca (Romania)[7357-24]

Coffee Break15.00 to 15.30

15.30: **Dispersion optimization of nonlinear glass photonic crystal fibers and impact of fabrication tolerances on their telecom nonlinear applications performance**, Jiri Kanka, Institute of Photonics and Electronics (Czech Republic)[7357-26]

15.50: **Novel design of photonic crystal fibres with highly birefringence, low confinement losses and low chromatic dispersion**, Shyqyri Haxha, Univ. of Kent (United Kingdom)[7357-27]

SESSION 7

Room: Club H Thurs. 16.10 to 17.20

Guided Wave Sensing Applications of PCF

Session Chair: David J. Webb, Aston Univ. (United Kingdom)

16.10: **Role of microstructure on guided acoustic wave Brillouin scattering in photonic crystal fibers** (*Invited Paper*), Jean-Charles Beugnot, Ecole Polytechnique Fédérale de Lausanne (Switzerland); Thibaut Sylvestre, Émile Carry, Hervé Maillotte, Univ. de Franche-Comté (France); Gilles Melin, Draka Comteq France (France); Vincent Laude, Institut Femto-ST (France)[7357-28]

16.40: **Highly birefringent microstructured fibers with zero sensitivity to temperature**, Tadeusz Martynkien, Wacław Urbanczyk, Politechnika Wroclawska (Poland)[7357-29]

17.00: **Suspended-core fibres as optical gas sensing cells: study and implementation**, Isabelle Dicaire, Jean-Charles Beugnot, Luc Thévenaz, Ecole Polytechnique Fédérale de Lausanne (Switzerland)[7357-30]

SPIE Europe Optics+Optoelectronics proceedings are published at the speed of light.

SPIE 
Digital Library

Research driving technological innovation

Holography: Advances and Modern Trends

Conference Chairs: **Miroslav Miler**, Institute of Photonics and Electronics (Czech Republic); **Miroslav Hrabovsky**, Joint Lab. of Optics and Univ. Palackeho (Czech Republic)

Programme Committee: **Ivo Aubrecht**, Police presidium CR (Czech Republic); **Radim Chmelik**, Brno Univ. of Technology (Czech Republic); **Pavel Fiala**, Czech Technical Univ. in Prague (Czech Republic); **Romuland Jozwicki**, Warsaw Univ. of Technology (Poland); **Milos Kopecky**, Institute of Physics (Czech Republic); **Raymond K. Kostuk**, The Univ. of Arizona (USA); **Libor Kotacka**, Optaglio s.r.o. (Czech Republic); **Dagmar Senderakova**, Comenius Univ. in Bratislava (Slovakia); **Günther K. G. Wernicke**, Humboldt-Univ. zu Berlin (Germany)

Tuesday 21 April

Room: Club C **Tues. 17.45 to 19.15**

Posters--Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Optimization of lattice constants of 2D photonic crystals fabricated on ITO layers of LEDs using holographic method for efficient light extraction, Han Lin, Xiangsu Zhang, Shou Liu, Xiamen Univ. (China) [7358-18]

Digital holography with arbitrary phase-step reconstruction using multiple holograms, Chi-Ching Chang, Ming Dao Univ. (Taiwan); Wang Ta Hsieh, National Defense Univ. (Taiwan) [7358-36]

Fabrication of 2D photonic crystal with micron to sub-micron hexagonal lattices using single-exposure holographic technique, Xiangsu Zhang, Sensen Li, Shou Liu, Han Lin, Xuechang Ren, Xiamen Univ. (China) . [7358-39]

Linear response deviations in photopolymers, Manuel Ortuño, Cristian Neipp, Elena Fernandez Varo, Mariela L. Alvarez, Augusto Beléndez, Univ. de Alicante (Spain) [7358-40]

Research of a method and optical system for record multiplex holograms in system of holographic memory, Sergey B. Odinkov, Bauman Moscow State Technical Univ. (Russian Federation) [7358-41]

Phase recording for formation of holographic optical elements on silver-halide photographic emulsions, Nina M. Ganzherli, Ioffe Physico-Technical Institute (Russian Federation); Sergei N. Gulyaev, St. Petersburg State Polytechnical Univ. (Russian Federation); Irina A. Maurer, Dmitri F. Chernykh, Ioffe Physico-Technical Institute (Russian Federation) [7358-42]

Short-wavelength ultraviolet radiation for formation of holographic optical elements on silver-halide photographic emulsions, Nina M. Ganzherli, Ioffe Physico-Technical Institute (Russian Federation) [7358-43]

Holographic fabrication of periodic structures on silicon as anti-reflective layers for high efficiency solar cells, Xiaoyun Chen, Xiamen Univ. (China) [7358-44]

An elementary research on wireless transmission of holographic 3D moving pictures, Kunihiro Takano, Tokyo Metropolitan College of Industrial Technology (Japan); Koki Sato, Shonan Institute of Technology (Japan) [7358-45]

A color retrieval technique using hologram, Mitsuo Fukuda, Shota Yamamoto, Masaki Aono, Hideo Sekino, Mitsuteru Inoue, Toyohashi Univ. of Technology (Japan); Makoto Kato, Tadahiko Kawaguchi, Papa Lab. Co., Ltd. (Japan) [7358-46]

Multiplexing holograms for data page storage using a LCD as hybrid ternary modulation, Elena Fernández Varo, Manuel Ortuño, Sergi Gallego, Andrés Ruiz Márquez, Augusto Beléndez, Inmaculada V. Pascual, Univ. de Alicante (Spain) [7358-47]

Reflection holograms in a PVA/AA photopolymer: several composition, Rosa Fuentes, Elena Fernandez Varo, Celia Garcia Llopis, Inmaculada V. Pascual, Univ. de Alicante (Spain) [7358-48]

Phase code multiplexed ROM type holographic memory using the computer generated hologram, Yasuhiro Ohuchi, Manabu Yamamoto, Tokyo Univ. of Science (Japan) [7358-49]

Azopolymeric films for tridimensional recording of submicron gratings, Ileana G. Apostol, National Institute for Lasers, Plasma and Radiation Physics (Romania) [7358-50]

Properties of PVA/AA photopolymers at very low spatial frequencies, Sergi Gallego, Andrés Ruiz Márquez, David I. Méndez, Stephan Marini, Elena Fernández Varo, Univ. de Alicante (Spain) [7358-52]

Microdisplays in holographic mastering applications, Sven Plöger, Stefan Osten, Sven Krüger, Günther K. G. Wernicke, HOLOEYE Photonics AG (Germany); Gerhard K. Ackermann, Jürgen P. Eichler, Technische Fachhochschule Berlin (Germany) [7358-53]

Low spatial frequency grating recorded in photopolymer material, Norbert Tajanyi, Daniel Kacik, Univ. of Zilina (Slovakia), Dusan Sabol, John T. Sheridan, Univ. College Dublin (Ireland) [7358-54]

Wednesday 22 April

Room: Club C **Wed. 8:25 to 8.30**

Opening Remarks

Miroslav Miler, Institute of Photonics and Electronics (Czech Republic); **Miroslav Hrabovsky**, Joint Lab. of Optics and Univ. Palackeho (Czech Republic)

SESSION 1

Room: Club C **Wed. 8.30 to 10.00**

Recording Materials I

Session Chairs: **Miroslav Miler**, Institute of Photonics and Electronics (Czech Republic); **Günther K. G. Wernicke**, Humboldt-Univ. zu Berlin (Germany)

8.30: **A comparative review of silver halide, photopolymerizable system and sol-gel holographic materials (Invited Paper)**, Antonio Fimia-Gil, Pablo Acebal, Salvador Blaya, Luis Carretero, Angel Murciano, Roque F. Madrigal, Univ. Miguel Hernandez de Elche (Spain) [7358-01]

9.00: **Optimization of the photochromic response of photoaddressable polymers with azobenzene-containing molecular glasses**, Roland Walker, Hubert Audorff, Univ. Bayreuth (Germany) [7358-02]

9.20: **Photo-kinetic study of Irgacure 784**, Dusan Sabol, Michael R. Gleeson, Shui Liu, John T. Sheridan, National Univ. of Ireland, Dublin (Ireland) [7358-03]

9.40: **Dynamic behavior investigation of refractive index grating in a new nematic liquid crystal doped with azo dye.**, Habib Khoshshima, Rana Asgari Sabet, Univ. of Tabriz (Iran, Islamic Republic of) [7358-04]

Coffee Break 10.00 to 10.30

SESSION 2

Room: Club C **Wed. 10.30 to 12.20**

Advanced Holography

Session Chair: **Libor Kotacka**, Optaglio s.r.o. (Czech Republic)

10.30: **Sub-50nm extreme ultraviolet holographic imaging (Invited Paper)**, Przemyslaw W. Wachulak, Mario C. Marconi, Randy A. Bartels, Carmen S. Menoni, Jorge J. Rocca, Colorado State Univ. (United States) [7358-05]

11.00: **Harrison's 'H4' holograms: stopping time**, Martin J. Richardson, De Montfort Univ. (United Kingdom) [7358-06]

11.20: **3-D coherence holography using a modified Sagnac radial shearing interferometer with geometric phase shift**, Dinesh N. Naik, Takahiro Ezawa, Yoko Miyamoto, Mitsuo Takeda, The Univ. of Electro-Communications (Japan) [7358-07]

11.40: **Time-resolved two-wavelength contouring of adaptive fluidic PDMS-lenses**, Uwe Griebner, Thomas Hansel, Ruediger Grunwald, Günter Steinmeyer, Max-Born-Institut für Nichtlineare Optik und Kurzzeitspektroskopie (Germany); Florian Schneider, Ulrike Wallrabe, Albert-Ludwigs-Univ. Freiburg (Germany)[7358-08]

12.00: **Polarization-holographic element for complete analysis of light**, Barbara N. Kilosanidze, George A. Kakauridze, Institute of Cybernetics (Georgia)[7358-09]

Lunch/Exhibition Break 12.20 to 13.40

SESSION 3

Room: Club C Wed. 13.40 to 15.20

Holography for Security

Session Chair: **Przemyslaw W. Wachulak**, Colorado State Univ. (USA)

13.40: **The role of holograms to detect counterfeits in a digital systems world** (*Invited Paper*), Ian M. Lancaster, Reconnaissance International Ltd. (United Kingdom)[7358-10]

14.10: **Advanced synthetic holograms for security purposes** (*Invited Paper*), Libor Kotacka, Petr Vizdal, Tomaš Behounek, Optaglio s.r.o. (Czech Republic)[7358-11]

14.40: **Polarization-sensitive multilayer diffractive structures for document security**, Ivo Aubrecht, Police presidium CR (Czech Republic)[7358-12]

15.00: **Self-organized holographic diffuser in an azo polymer film**, Sohrab Ahmadi-Kandjani, Univ. of Tabriz (Iran, Islamic Republic of)[7358-13]

Coffee Break 15.20 to 15.50

SESSION 4

Room: Club C Wed. 15.50 to 17.30

Holography for Photonic Crystals

Session Chair: **Ivo Aubrecht**, Police presidium CR (Czech Republic)

15.50: **Holographic 3D microfabrication by femtosecond pulse laser**, Masahiro Yamaji, Hayato Kawashima, Jun'ichi Suzuki, Shuhei Tanaka, New Glass Forum (Japan)[7358-16]

16.10: **Device for synthesising computer-generated holograms**, Jakub Svoboda, Pavel Fiala, Czech Technical Univ. in Prague (Czech Republic)[7358-14]

16.30: **Hybrid aplanatic diffractive optical systems**, Jaroslav Hopp, Pavel Fiala, Czech Technical Univ. in Prague (Czech Republic)[7358-15]

16.50: **The importance of holograms in dentistry**, Cosmin G. H. Sinescu M.D., Univ. de Medicina si Farmacie Victor Babes, Timisoara (Romania); Meda-Lavinia V. Negrutiu, Univ. de Medicina si Farmacie Victor Babes, Timisoara (Romania); Dana Pop, Univ. de Medicina si Farmacie Victor Babes, Timisoara (Romania); Lavinia Cuc, Aurel Vlaicu Univ. of Arad (Romania); Aldo De Sabata, Radu Negru, Mihai Hlucsu, Politehnica Univ. Timisoara (Romania); Mihai Rominu, Univ. de Medicina si Farmacie Victor Babes, Timisoara (Romania)[7358-17]

17.10: **Photonic crystals and plasmonic structures recorded by multi-exposure of holographic patterns**, Lucila H. D. Cescato, Jacson W. Menezes, Univ. Estadual de Campinas (Brazil)[7358-19]

Thursday 23 April

SESSION 5

Room: Club C Thurs. 8.50 to 10.00

Holographic Gratings

Session Chair: **Miroslav Hrabovsky**, Univ. Palackeho (Czech Republic)

8.50: **1x2 demultiplexer for a light waveguide communications system based on a holographic grating** (*Invited Paper*), Xuechang Ren, Xiangsu Zhang, Canhui Wang, Shou Liu, Xiamen Univ. (China)[7358-20]

9.20: **Small-angle beam deviation with high resolution using gratings**, Canhui Wang, Xuechang Ren, Xiangsu Zhang, Shou Liu, Guohua Liu, Xiamen Univ. (China)[7358-21]

9.40: **Optical polyfunctional nanoglassceramics for photonic applications**, Nikolay V. Nikonorov, Vladimir A. Aseev, Alexander Ignatev, Viktor A. Tsekhomsky, Ekaterina V. Tsygankova, Andrey Zlatov, St. Petersburg Institute of Fine Mechanics and Optics (Russian Federation)[7358-23]

Coffee Break 10.00 to 10.30

SESSION 6

Room: Club C Thurs. 10.30 to 12.20

Recording Materials II

Session Chair: **Antonio Fimia-Gil**, Univ. Miguel Hernandez de Elche (Spain)

10.30: **Non-local photo-polymerization kinetics with multiple termination mechanisms and post-exposure effects** (*Invited Paper*), Michael R. Gleeson, John T. Sheridan, National Univ. of Ireland, Dublin (Ireland)[7358-24]

11.00: **Highly effective dynamical holographic grating in doped bithmus titanate crystals and applications to metrology**, George E. Dovgalenko, ITT Technical Institute (United States); Ying Wu, Shanghai Jing Na Luo Decorative Design Engineering Co. (China)[7358-25]

11.20: **Improved model of the photo-initiation mechanisms in photopolymer materials**, Shui Liu, John T. Sheridan, Michael R. Gleeson, National Univ. of Ireland, Dublin (Ireland)[7358-26]

11.40: **Parameter extraction from gratings recorded in photopolymer**, Dusan Sabol, John T. Sheridan, National Univ. of Ireland, Dublin (Ireland)[7358-27]

12.00: **Dynamic polarization holography: materials and applications**, Barbara N. Kilosanidze, George A. Kakauridze, Irakli Chaganava, Institute of Cybernetics (Georgia)[7358-28]

Lunch Break 12.20 to 13.30

SESSION 7

Room: Club C Thurs. 13.30 to 15.20

Computer Assisted Holography

Session Chair: **John T. Sheridan**, National Univ. of Ireland, Dublin (Ireland)

13.30: **'Biased' dynamic holography as a tool of adaptive optic** (*Invited Paper*), Vladimir Y. Venediktov, St. Petersburg State Polytechnical Univ. (Russian Federation)[7358-29]

14.00: **Semi-Lens Lens Array and Fast Fourier Transform to Generate Hologram for Live Electronic Holography**, Kenji Yamamoto, Tomoyuki Mishina, Makoto Okui, National Institute of Information and Communications Technology (Japan)[7358-30]

14.20: **Walk through type electro-holographic display using 3D screen**, Koki Sato, Makoto Ohki, Shonan Institute of Technology (Japan); Kunihiko Takano, Tokyo Metropolitan College of Industrial Technology (Japan)[7358-31]

14.40: **Computer generated holographic invariant LPCC filters for 4-f correlator**, Rostislav S. Starikov, Evgeny Y. Zlokazov, Moscow Engineering Physics Institute (Russian Federation)[7358-32]

15.00: **Complex computer-synthesized holograms, forming uncaused fields**, Eugene V. Braginets, National Taras Shevchenko Univ. of Kyiv (Ukraine); Volodymyr I. Girnyk, OPTRONICS PC (Ukraine); Sergey A. Kostyukevich, Institute of Semiconductor Physics (Ukraine); Vitaliy N. Kurashov, National Taras Shevchenko Univ. of Kyiv (Ukraine)[7358-33]

Coffee Break 15.20 to 15.50

SESSION 8

Room: Club C Thurs. 15.50 to 17.10

Digital Holography

Session Chair: **Vladimir Yu. Venediktov**, S.I. Vavilov State Optical Institute (Russian Federation)

15.50: **Holographic data storage with a planar-integrated optical write-read head**, Matthias Gruber, Matthias Soellner, Univ. of Hagen (Germany)[7358-34]

16.10: **Rainbow digital holography: modeling and experiment**, Malgorzata Kujawinska, Grzegorz F. Finke, Warsaw Univ. of Technology (Poland)[7358-35]

16.30: **Deformation and shape measurement by compensation in digital holography**, Janos Kornis, Richard Sefel, Budapest Univ. of Technology and Economics (Hungary)[7358-37]

16.50: **Compression of digital holographic sequences using MPEG-4**, Emmanouil Darakis, National Univ. of Ireland, Maynooth (Ireland) and Nanyang Technological Univ. (Singapore); Thomas J. Naughton, National Univ. of Ireland, Maynooth (Ireland) and Univ. of Oulu (Finland)[7358-38]

Harnessing Relativistic Plasma Waves as Novel Radiation Sources from Terahertz to X-rays and Beyond

Conference Chairs: **Dino A. Jaroszynski**, Univ. of Strathclyde (United Kingdom); **Antoine Rousse**, Ecole Nationale Supérieure de Techniques Avancées (France)

Programme Committee: **Robert Bingham**, Science and Technology Facilities Council (United Kingdom); **Chris E. Clayton**, Univ. of California/Los Angeles (USA); **N. Piovella**, Univ. di Milano (Italy); **Alexander Pukhov**, Heinrich-Heine-Univ. Düsseldorf (Germany); **Luca Serafini**, Univ. degli Studi di Milano (Italy); **Gennady Shvets**, The Univ. of Texas at Austin (USA); **Luis Silva**, Instituto Superior Técnico (Portugal); **Mark Wiggins**, Univ. of Strathclyde (United Kingdom); **Matt Zepf**, Queen's Univ. Belfast (United Kingdom)

Tuesday 21 April

Room: Club A Tues. 17.45 to 19.15

Posters--Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Plasma diagnostics of a capillary plasma using pulse power (*Invited Paper*), Takeshi Higashiguchi, Utsunomiya Univ. (Japan) [7359-42]

Compression of an ultrashort laser pulse via self-modulation in argon gas (*Invited Paper*), Takeshi Higashiguchi, Utsunomiya Univ. (Japan) [7359-43]

Femtosecond, ultrashort laser wakefield electron beam bunch-duration measurements: a prism-based dispersion visible-to-IR spectrometer, Jaeku Lim, Jerome Faure, C. Rechatin, Victor Malka, Guilhem Gallot, Ecole Nationale Supérieure de Techniques Avancées (France) [7359-45]

Wednesday 22 April

Room: Wed. 8:25 to 8.30

Opening Remarks

Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom); **Antoine Rousse**, Ecole Nationale Supérieure de Techniques Avancées (France)

SESSION 1

Room: Club A Wed. 8.30 to 10.00

Towards a Compact X-FEL I

Session Chair: **Luis O. Silva**, Instituto Superior Técnico (Portugal)

8.30: **Towards a compact 0.1-10 MeV broadband betatron photon source** (*Invited Paper*), Christopher E. Clayton, Univ. of California, Los Angeles (United States) [7359-01]

9.00: **Towards table-top free-electron-lasers** (*Invited Paper*), Florian J. Gruener, Andreas R. Maier, Ludwig-Maximilians-Univ. München (Germany); Carl B. Schroeder, Wim P. Leemans, Lawrence Berkeley National Lab. (United States); Ferenc Krausz, Max-Planck-Institut für Quantenoptik (Germany) [7359-02]

9.20: **An experimental proposal for attosecond slicing of an LWFA produced electron beam** (*Invited Paper*), Christopher M. S. Sears, Max-Planck-Institut für Quantenoptik (Germany) [7359-03]

9.40: **Coherent Thomson scattering at laser compressed and accelerated electron bunches** (*Invited Paper*), Daniel R. an der Bruegge, Heinrich-Heine-Univ. Düsseldorf (Germany). [7359-04]

Coffee Break 10.00 to 10.30

SESSION 2

Room: Club A Wed. 10.30 to 1 13.30

Towards a Compact X-FEL II

Session Chair: **Christopher E. Clayton**, Univ. of California, Los Angeles (USA)

10.30: **Nonlinear dynamics of electrons in plasma cavitations** (*Invited Paper*), Sijia Chen, Univ. of Strathclyde (United Kingdom) [7359-05]

10.50: **A compact synchrotron radiation source driven by a laser-plasma wakefield accelerator** (*Invited Paper*), Richard P. Shanks, Maria P. Anania, Enrico Brunetti, Silvia Cipiccia, Riju C. Issac, Univ. of Strathclyde (United Kingdom); Hans-Peter Schlenvoigt, Heinrich Schwoerer, Friedrich-Schiller-Univ. Jena (Germany); Gregory Vieux, Gregor H. Welsh, Mark S. Wiggins, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-06]

11.10: **Prospects of laser driven radiation sources at the FZD** (*Invited Paper*), Ulrich Schramm, Thomas Cowan, Stephan Kraft, Michael Bussmann, Alexander Debus, Axel Jochmann, Roland A. Sauerbrey, Forschungszentrum Dresden-Rossendorf (Germany) [7359-07]

SESSION 3

Room: Club A Wed. 11.30 to 12.10

Frequency Shifting and Photon Acceleration I

Session Chair: **Christopher E. Clayton**, Univ. of California, Los Angeles (USA)

11.30: **The flying mirror: future brightest X-ray source** (*Invited Paper*), Timur Z. Esirkepov, Sergei V. Bulanov, Masaki Kando, Alexander S. Pirozhkov, Japan Atomic Energy Agency (Japan) [7359-08]

11.50: **Photon Landau damping of relativistic plasma waves** (*Invited Paper*), Tito Mendonca, Instituto Superior Técnico (Portugal) [7359-09]

Lunch/Exhibition Break 12.10 to 13.30

SESSION 4

Room: Club A Wed. 13.30 to 15.20

High-Harmonic Generation I

Session Chair: **Mark S. Wiggins**, Univ. of Strathclyde (United Kingdom)

13.30: **New mechanism of harmonic generation in relativistic plasma** (*Invited Paper*), Alexander S. Pirozhkov, Masaki Kando, Timur Z. Esirkepov, Jinglong Ma, Yuji Fukuda, Liming Chen, Izuru Daito, Koichi Ogura, Takayuki Homma, Yukio Hayashi, Hideyuki Kotaki, Akito Sagisaka, Michiaki Mori, James Koga, Tetsuya Kawachi, Hiromitsu Kiriya, Hajime Okada, Keigo Kawase, Takashi Kameshima, Nobuyuki Nishimori, Japan Atomic Energy Agency (Japan); Eugene N. Ragozin, P.N. Lebedev Physical Institute (Russian Federation); Anatoly Y. Faenov, Tatiana A. Pikuz, Hiroyuki Daido, Sergei V. Bulanov, Toyooki Kimura, Yoshiaki Kato, Toshiaki Tajima, Japan Atomic Energy Agency (Japan) [7359-10]

14.00: **Coherent X-rays and energy transport into relativistic overdense laser-plasmas** (*Invited Paper*), Teodora Baeva, Heinrich-Heine-Univ. Düsseldorf (Germany) [7359-11]

14.20: **Harmonic emission from high intensity laser-solid interactions as a coherent XUV source with attosecond resolution** (*Invited Paper*), Rainer Hoerlein, Yutaka Nomura, Max-Planck-Institut für Quantenoptik (Germany); Paraskevas Tzallas, Foundation for Research and Technology-Hellas (Greece); Brendan H. Dromey, Queen's Univ. Belfast (United Kingdom); Sergey G. Rykovanov, Zsuzsanna Major, Jens Osterhoff, Stefan Karsch, Laszlo Veisz, Max-Planck-Institut für Quantenoptik (Germany); Matthew Zepf, Queen's Univ. Belfast (United Kingdom); Dimitris Charalambidis, Foundation for Research and Technology-Hellas (Greece); Ferenc Krausz, George D. Tsakiris, Max-Planck-Institut für Quantenoptik (Germany) [7359-12]

14.40: **High-order harmonic generation on plasma mirrors** (*Invited Paper*), Fabien Quere, Hervé George, Commissariat à l'Energie Atomique (France); Cédric Thauray, Jean-Paul Geindre, Ecole Polytechnique (France); Pascal Monot, Philippe Martin, Commissariat à l'Energie Atomique (France). [7359-13]

15.00: **High harmonics and attosecond pulses in relativistic regime** (*Invited Paper*), Alexander Pukhov, Heinrich-Heine-Univ. Düsseldorf (Germany) [7359-14]

Coffee Break 15.20 to 15.50

SESSION 5

Room: Club A Wed. 15.50 to 16.50

High-Harmonic Generation II

Session Chair: Tito Mendonca, Instituto Superior Técnico (Portugal)

15.50: **Bright Attosecond pulses from relativistic plasma surfaces** (*Invited Paper*), Matthew Zepf, Queen's Univ. Belfast (United Kingdom) [7359-15]

16.10: **Electron acceleration, lateral transport and X-ray emission for large incidence angles of femtosecond laser pulses on a foil** (*Invited Paper*), Jan Psikal, Jiri Limpouch, Ondrej Klimo, Czech Technical Univ. in Prague (Czech Republic) [7359-16]

16.30: **High harmonic generation from relativistic plasmas - diffraction limited performance and attosecond phaselocking** (*Invited Paper*), Brendan H. Dromey, Queen's Univ. Belfast (United Kingdom) [7359-17]

SESSION 6

Room: Club A Wed. 16.50 to 17.50

Frequency Shifting and Photon Acceleration II

Session Chair: Tito Mendonca, Instituto Superior Técnico (Portugal)

16.50: **Short-wavelength magnetic structures from the plasma magnetic mode and their applications** (*Invited Paper*), Frederico Fiuza, Samuel Martins, Ricardo Fonseca, Luis O. Silva, Instituto Superior Técnico (Portugal) [7359-18]

17.10: **XUV and IR electromagnetic radiation from nonlinear laser-plasma interaction** (*Invited Paper*), Masaki Kando, Japan Atomic Energy Agency (Japan) [7359-19]

17.30: **Photon acceleration by amplified wakefield generated by two copropagating laser pulses in plasma** (*Invited Paper*), Gaurav Raj, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-20]

Thursday 23 April

SESSION 7

Room: Club A Thurs. 8.20 to 10.20

Raman and Brillouin Amplification

Session Chair: Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom)

8.20: **A high intensity desktop laser source based on Raman amplification in plasma** (*Invited Paper*), John P. Farmer, Bernhard Ersfeld, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-21]

8.40: **Experimental investigation of short pulse amplification using SBS** (*Invited Paper*), Livia Lancia, Jean-Raphael Marques, Julien Fuchs, Motoaki Nakatsutsumi, Patrizio Antici, Caterina Riconda, Ecole Polytechnique (France) [7359-22]

9.00: **Nonlinear temporal evolution of the backward stimulated Raman scattering instability in a density rippled plasma** (*Invited Paper*), G. Raj, Bernhard Ersfeld, John P. Farmer, M. R. Islam, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-23]

9.20: **Effects of energy absorption on Raman amplification in plasma** (*Invited Paper*), Bernhard Ersfeld, John P. Farmer, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-24]

9.40: **Chirped pulse amplification based on Raman backscattering in plasma** (*Invited Paper*), Xue Yang, Gregory Vieux, Enrico Brunetti, Bernhard Ersfeld, John P. Farmer, Riju C. Issac, Mark S. Wiggins, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-25]

10.00: **Raman amplification in a plasma channel: high gain and thermal effects** (*Invited Paper*), Gregory Vieux, Xue Yang, Enrico Brunetti, Bernhard Ersfeld, John P. Farmer, Riju C. Issac, Mark S. Wiggins, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-26]

Coffee Break 10.20 to 10.45

SESSION 8

Room: Club A Thurs. 10.45 to 12.15

Betatron Radiation I

Session Chair: Antoine Rousse, Ecole Nationale Supérieure de Techniques Avancées (France)

10.45: **Study of betatron radiation produced by laser plasma accelerator** (*Invited Paper*), Silvia Cipiccia, Riju C. Issac, Ranaul Islam, Gregory Vieux, Mark S. Wiggins, Richard P. Shanks, Albert A. J. W. Reitsma, Univ. of Strathclyde (United Kingdom); Dima Maneuski, Val O'Shea, Univ. of Glasgow (United Kingdom); Nuno Lemos, Rodolfo Bendoyro, Joana L. Martins, Frederico Fiuza, Michael Marti, Luis O. Silva, Instituto Superior Técnico (Portugal); Rajeev P. Pattathil, Peta Foster, Science and Technology Facilities Council (United Kingdom); Nicolas Bourgeois, Tom Ibbotson, Univ. of Oxford (United Kingdom); Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom); Jo, o Mendanha Dias, Instituto Superior Técnico (Portugal) [7359-27]

11.15: **Betatron radiation from laser-wakefield accelerated bunches Of quasi-monoenergetic electrons** (*Invited Paper*), Stefan Kneip, Imperial College London (United Kingdom) [7359-28]

11.35: **Visualization of the electron-acceleration process in a table-top laser-plasma accelerator (stand-by oral presentation)** (*Invited Paper*), Malte C. Kaluza, Hans-Peter Schlenvoigt, Friedrich-Schiller-Univ. Jena (Germany); Stuart P. D. Mangles, Imperial College London (United Kingdom); Alexander G. R. Thomas, Univ. of Michigan (United States); Aboobaker E. Dangor, Imperial College London (United Kingdom); Heinrich Schwoerer, Stellenbosch Univ. (South Africa); Warren B. Mori, Univ. of California, Los Angeles (United States); Zufikar Najmudin, Imperial College London (United Kingdom); Karl M. Krushelnick, Univ. of Michigan (United States) [7359-44]

11.55: **Radiation post-processing in PIC codes** (*Invited Paper*), Joana L. Martins, Samuel F. Martins, Ricardo A. Fonseca, Luis O. Silva, Instituto Superior Técnico (Portugal) [7359-30]

Lunch Break 12.15 to 13.30

SESSION 9

Room: Club A Thurs. 13.30 to 15.00

Betatron Radiation II

Session Chair: Alexander Pukhov, Heinrich-Heine-Univ. Düsseldorf (Germany)

13.30: **Harnessing novel radiation sources from THz to X-rays and beyond with relativistic engineering** (*Invited Paper*), Toshi Tajima, Univ. Munich and Max Planck Inst. Quantum Optics (Germany) and Japan Atomic Energy Agency and KEK (Japan); Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-31]

14.00: **Temporal characterization and flux improvement of the X-ray betatron source** (*Invited Paper*), Romuald Fitour, Kim Ta Phuoc, Sebastien Corde, Antoine Rousse, Ecole Nationale Supérieure de Techniques Avancées (France) [7359-32]

14.20: **Electron trapping, acceleration and betatron emission in a laser-plasma accelerator** (*Invited Paper*), Ranaul Islam, Silvia Cipiccia, Bernhard Ersfeld, Riju C. Issac, Univ. of Strathclyde (United Kingdom); Luis O. Silva, Instituto Superior Técnico (Portugal); Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom) [7359-33]

14.40: **Radiation from self-injected beam in the blow-out regime with multi-PW lasers** (*Invited Paper*), Luis O. Silva, Instituto Superior Técnico (Portugal) [7359-34]

Coffee Break 15.00 to 15.30

SESSION 10

Room: Club A Thurs. 15.30 to 16.30

Terahertz Sources

Session Chair: Matthew Zepf, Queen's Univ. Belfast (United Kingdom)

15.30: **Novel THz radiation sources from relativistic laser-plasmas** (*Invited Paper*), Zheng-Ming Sheng, Shanghai Jiao Tong Univ. (China) [7359-35]

15.50: **Possibility of high power THz radiation via electromagnetically-induced transparency at ion acoustic frequency region in laser-produced dense plasmas** (*Invited Paper*), Noboru Yugami, Takeshi Higashiguchi, Utsunomiya Univ. (Japan) [7359-36]

16.10: **Strong Terahertz radiation from the interaction of laser air interaction** (*Invited Paper*), Min Chen, Alexander Pukhov, Heinrich-Heine-Univ. Düsseldorf (Germany) [7359-37]

Conference 7359

SESSION 11

Room: Club A Thurs. 16.30 to 17.30

Beams, Plasma Channels, and Diagnostics

Session Chair: **Matthew Zepf**, Queen's Univ. Belfast (United Kingdom)

16.30: **Non-linear oscillations in relativistic thermal plasmas** (*Invited Paper*), David A. Burton, Lancaster Univ. (United Kingdom) and The Cockcroft Institute (United Kingdom).[7359-38]

16.50: **Narrow energy spread electron beams from the ALPHA-X laser wakefield accelerator** (*Invited Paper*), Mark S. Wiggins, Maria P. Anania, Enrico Brunetti, Silvia Cipiccia, Ranaul Islam, Riju C. Issac, Richard P. Shanks, Gregory Vieux, Gregor H. Welsh, Univ. of Strathclyde (United Kingdom); W. Allan Gillespie, Univ. of Dundee (United Kingdom); Allan MacLeod, Univ. of Abertay Dundee (United Kingdom); Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom).[7359-39]

17.10: **Electron beam pointing on a laser wakefield accelerator** (*Invited Paper*), Riju C. Issac, Gregor H. Welsh, Richard P. Shanks, Gregory Vieux, Ranaul Islam, Mark S. Wiggins, Enrico Brunetti, Silvia Cipiccia, Maria P. Anania, Xue Yang, Bernhard Ersfeld, John P. Farmer, Sijia Chen, David Clark, Tom McCanny, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom)[7359-40]

SESSION 12

Room: Club A Thurs. 17.30 to 17.50

Towards a Compact X-FEL III

Session Chair: **Matthew Zepf**, Queen's Univ. Belfast (United Kingdom)

17.30: **Transport of ultra-short electron bunches in a free-electron laser driven by a laser-plasma wakefield accelerator** (*Invited Paper*), Maria P. Anania, Univ. of Strathclyde (United Kingdom); Bas S. B. van der Geer, Marieke M. J. de Loos, Technische Univ. Eindhoven (Netherlands); Albert A. J. W. Reitsma, Riju C. Issac, Mark S. Wiggins, Dino A. Jaroszynski, Univ. of Strathclyde (United Kingdom).[7359-41]

EUV and X-ray Optics: Synergy between Laboratory and Space

Conference Chairs: **René Hudec**, Astronomical Institute of the Academy of Sciences of the Czech Republic (Czech Republic); **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic)

Programme Committee: **Webster C. Cash, Jr.**, Univ. of Colorado at Boulder (USA); **George W. Fraser**, Univ. of Leicester (United Kingdom); **Ali M. Khounsary**, Argonne National Lab. (USA); **Milos Klima**, Czech Technical Univ. in Prague (Czech Republic); **Alan G. Michette**, King's College London (United Kingdom); **Giovanni Pareschi**, Osservatorio Astronomico di Brera (Italy); **Yuriy Ya Platonov**, Rigaku Innovative Technologies, Inc. (USA); **Paul B. Reid**, Harvard-Smithsonian Ctr. for Astrophysics (USA); **Bedrich Rus**, Institute of Physics (Czech Republic); **Peter Z. Takacs**, Brookhaven National Lab. (USA); **Melville P. Ulmer**, Northwestern Univ. (USA); **William W. Zhang**, NASA Goddard Space Flight Ctr. (USA); **Josef Zicha**, Czech Technical Univ. in Prague (Czech Republic)

Monday 20 April

Room: Club E. Mon. 13.25

Opening Remarks

René Hudec, Astronomical Institute of the Academy of Sciences of the Czech Republic (Czech Republic); **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic)

SESSION 1

Room: Club E. Mon. 13.30 to 15.10

EUV and X-Ray Optics I

Session Chair: **René Hudec**, Astronomical Institute (Czech Republic)

13.30: **Focusing EUV radiation from a laser plasma source using grazing incidence and multilayer optics**, Henryk Fiedorowicz, Andrzej S. Bartnik, Roman Jarocki, Jerzy Kostecki, Rafal Rakowski, Magdalena Sawicka, Anna Szczurek, Mirosław Szczurek, Wojskowa Akademia Techniczna (Poland); **Ladislav Pina**, Libor Sveda, Czech Technical Univ. in Prague (Czech Republic); **Torsten Feigl**, Fraunhofer-Institut für Angewandte Optik und Feinmechanik (Germany); **Pawel Puchalski**, Wojskowa Akademia Techniczna (Poland) [7360-01]

13.50: **EUV off-axis focusing using a high harmonic source**, Ben Mills, Edward Rogers, Sarah Stebbings, James Grant-Jacob, Richard Chapman, Tom Butcher, William Brocklesby, Jeremy Frey, Univ. of Southampton (United Kingdom) [7360-02]

14.10: **Material analysis with EUV/XUV radiation using a broadband laser plasma source and optics system**, Armin Bayer, Frank Barkusky, Stefan Döring, Bernhard Flöter, Christian Peth, Klaus Mann, Laser-Lab. Göttingen e.V. (Germany) [7360-03]

14.30: **Two magnification steps EUV microscopy with a Schwarzschild-objective and an adapted zone plate lens**, Larissa Juschkina, AIXUV GmbH (Germany); **Ralf Freiberger**, RWTH Aachen (Germany) [7360-04]

14.50: **Imaging properties of a spherical compound refractive x-ray lens**, Chengchao Huang, Baozhong Mu, Zhanshan Wang, Lingyan Chen, Tongji Univ. (China); **Yury I. Dudchik**, Belarusian State Univ. (Belarus) [7360-05]

Coffee Break 15.10 to 15.40

SESSION 2

Room: Club E. Mon. 15.40 to 17.40

EUV and X-Ray Optics II

Session Chair: **Henryk Fiedorowicz**, Wojskowa Akademia Techniczna (Poland)

15.40: **Active microstructured X-ray optical arrays**, Alan G. Michette, Slawka J. Pfäuntz, Shahin Sahraei, Matthew Shand, Graeme R. Morrison, David Hart, King's College London (United Kingdom); **Boris Vojnovic**, Univ. of Oxford (United Kingdom) and King's College London (United Kingdom); **Tom Stevenson**, William Parkes, Camelia Dunare, The Univ. of Edinburgh (United Kingdom); **Richard Willingale**, Charlotte H. Feldman, Univ. of Leicester (United Kingdom); **Tim W. Button**, Dou Zhang, Daniel Rodriguez-Sanmartin, The Univ. of Birmingham (United Kingdom); **Hongchang Wang**, Univ. College London (United Kingdom); **Andy D. Smith**, Science and Technology Facilities Council (United Kingdom) [7360-06]

16.00: **Active X-ray optics for the next generation of X-ray telescopes**, Hongchang Wang, Carolyn Atkins, Peter Deol, Samantha J. Thompson, David Brook, Univ. College London (United Kingdom); **Charlotte H. Feldman**, Richard Willingale, Univ. of Leicester (United Kingdom); **Tim W. Button**, Dou Zhang, Daniel Rodriguez-Sanmartin, The Univ. of Birmingham (United Kingdom); **Ady James**, **Craig Theobald**, Univ. College London (United Kingdom) [7360-07]

16.20: **Active X-ray optics**, René Hudec, Astronomical Institute (Czech Republic); **Martin Hromčík**, Czech Technical Univ. in Prague (Czech Republic) [7360-08]

16.40: **Alignment system for full-shell replicated X-ray mirrors**, Mikhail V. Gubarev, Brian D. Ramsey, NASA Marshall Space Flight Ctr. (United States) [7360-09]

17.00: **Development of high-resolution and light-weight x-ray optics with deformed silicon wafers**, Yuichiro Ezoe, Takayuki Shirata, Takaya Ohashi, Tokyo Metropolitan Univ. (Japan); **Manabu Ishida**, Kazuhisa Mitsuda, Japan Aerospace Exploration Agency (Japan); **Kozo Fujiwara**, Kohei Morishita, Kazuo Nakajima, Tohoku Univ. (Japan) [7360-39]

17.20: **Novel ultra-lightweight and high-resolution MEMS X-ray optics**, Ikuyuki Mitsuishi, Japan Aerospace Exploration Agency (Japan); **Yuichiro Ezoe**, **Utako Takagi**, Tokyo Metropolitan Univ. (Japan); **Raul E. Riveros**, Hitomi Yamaguchi, Univ. of Florida (United States); **Fumiki Kato**, **Susumu Sugiyama**, Ritsumeikan Univ. (Japan); **Kouzou Fujiwara**, **Kohei Morishita**, **Kazuo Nakajima**, **Shinya Fujihira**, **Yoshiaki Kanamori**, Tohoku Univ. (Japan); **Noriko Y. Yamasaki**, **Kazuhisa Mitsuda**, Japan Aerospace Exploration Agency (Japan); **Ryutaro Maeda**, National Institute of Advanced Industrial Science and Technology (Japan) [7360-40]

Tuesday 21 April

SESSION 3

Room: Club E. Tues. 8.30 to 10.00

X-ray Optics I

Session Chair: **Alan G. Michette**, King's College London (United Kingdom)

8.30: **Development of grazing incidence X-ray optics in the Czech Republic: past, present, future (Invited Paper)**, René Hudec, Astronomical Institute (Czech Republic) [7360-10]

9.00: **Requirements on grazing incidence optics for hard X-ray European XFEL beamlines: analysis and simulation of wavefront transformation**, **Liubov Samoylova**, **Harald Sinn**, European XFEL (Germany) [7360-11]

9.20: **Lobster eye: technology and imaging properties**, **Libor Sveda**, Czech Technical Univ. in Prague (Czech Republic); **René Hudec**, Astronomical Institute (Czech Republic); **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic); **Veronika Semencova**, **Adolf J. Inneman**, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-12]

9.40: **Replicated grazing incidence microscopic mirrors and micromirrors**, **René Hudec**, Astronomical Institute (Czech Republic); **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic); **Adolf J. Inneman**, **Veronika Semencova**, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-13]

Coffee Break 10.00 to 10.30

SESSION 4

Room: Club E Tues. 10.30 to 12.10

IXO

Session Chair: **William W. Zhang**, NASA Goddard Space Flight Ctr. (USA)

10.30: **Off-plane grating spectrometer for the International X-ray Observatory**, Randall L. McEntaffer, Univ. of Iowa (United States); Webster C. Cash, Jr., Phillip H. Oakley, Univ. of Colorado at Boulder (United States); Charles F. Lillie, Suzanne Casement, Dean R. Dailey, Tim Johnson, Northrop Grumman Space Technology (United States); Ted Schultz, The Univ. of Iowa (United States) [7360-14]

10.50: **Glass foils thermal forming for X-ray space telescopes**, Martin Mika, Martina Landova, Institute of Chemical Technology (Czech Republic); Veronika Semencova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic); René Hudec, Astronomical Institute (Czech Republic); Adolf J. Inneman, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic); Libor Svěda, Ladislav Pina, Czech Technical Univ. in Prague (Czech Republic); Michaela Skulinova, Astronomical Institute (Czech Republic); Vlastimil Brozek, Institute of Plasma Physics (Czech Republic); Jan Sik, ON Semiconductor Czech Republic (Czech Republic) [7360-15]

11.10: **Mirror technology development for the International X-ray Observatory Mission**, William Zhang, NASA Goddard Space Flight Center [7360-46]

11.30: **Development of silicon pore optics for IXO**, Max Collon, Ramses Gunther, Rakesh Partapsing, Marcelo Ackermann, Marco W. Beijersbergen, cosine Science & Computing B.V. (Netherlands); Marcos Bavdaz, Kotska Wallace, European Space Agency (Netherlands); Marko Blom, Mark Olde Riekerink, Micronit Microfluidics BV (Netherlands); Coen van Baren, SRON Nationaal Instituut voor Ruimteonderzoek (Netherlands); Carsten P. Jensen, Danish National Space Ctr. (Denmark); Markus Erhard, Kayser-Threde GmbH (Germany); Michael Freyberg, Max-Planck-Institut für Extraterrestrische Physik (Germany); Michael K. Krümmey, Physikalisch-Technische Bundesanstalt (Germany) [7360-17]

11.50: **Back-up technologies for IXO**, René Hudec, Astronomical Institute (Czech Republic); Ladislav Pina, Czech Technical Univ. in Prague (Czech Republic); Adolf J. Inneman, Veronika Semencova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic); Libor Svěda, Czech Technical Univ. in Prague (Czech Republic); Michaela Skulinova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-18]

Lunch/Exhibition Break 12.10 to 13.30

SESSION 5

Room: Club E Tues. 13.30 to 15.30

Multilayers

Session Chair: **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic)

13.30: **Angle alignment method for soft X-ray using double-periodic multilayer**, Baozhong Mu, Jingtao Zhu, Jiang Li, Shengzhen Yi, Jing Xu, Wang Xin, Moyan Tan, Qiushi Huang, Liang Bai, Shengling Huang, Xiaoqiang Wang, Zhanshan Wang, Lingyan Chen, Tongji Univ. (China) [7360-19]

13.50: **Spectroscopic characterization of novel multilayer mirrors intended for astronomical and laboratory applications**, Eugene N. Ragozin, Konstantin N. Mednikov, Andrei A. Pertsov, P.N. Lebedev Physical Institute (Russian Federation); Alexander S. Pirozhkov, Japan Atomic Energy Agency (Japan) and P.N. Lebedev Physical Institute (Russian Federation); Anton A. Reva, Sergei V. Shestov, Artem S. Ul'yanov, Evgenii A. Vishnyakov, P.N. Lebedev Physical Institute (Russian Federation) [7360-20]

14.10: **Optical and chemical characterization of Al/SiC periodic multilayers**, Philippe Jonnard, Karine Le Guen, Minhui Hu, Jean-Michel André, Univ. Pierre et Marie Curie (France); Evgueni Meltchakov, Christophe Hecquet, Franck Delmotte, Institut d'Optique (France) [7360-21]

14.30: **Formation of silicides in annealed periodic multilayers**, Hélène Maury, Univ. Pierre et Marie Curie (France) and CEA (France); Philippe Jonnard, Karine Le Guen, Jean-Michel André, Univ. Pierre et Marie Curie (France) [7360-22]

14.50: **Innovative methods for optimization and characterization of multilayer coatings**, Maria G. Pelizzo, Michele Suman, Univ. degli Studi di Padova (Italy) and CNR-INFN Lab. for Ultraviolet and X-Ray Optical Research (Italy); David L. Windt, Reflective X-Ray Optics LLC (United States); Gianni G. Monaco, Sara Zuccon, Piergiorgio Nicolosi, Univ. degli Studi di Padova (Italy) and CNR-INFN Lab. for Ultraviolet and X-Ray Optical Research (Italy) [7360-23]

15.10: **Metrology of advanced ML mirrors**, Ladislav Pina, Libor Svěda, Czech Technical Univ. in Prague (Czech Republic); Adolf J. Inneman, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic); René Hudec, Astronomical Institute (Czech Republic); Veronika Semencova, Michaela Skulinova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-24]

Coffee Break 15.30 to 16.00

SESSION 6

Room: Club E Tues. 16.00 to 17.40

Depositions and Coatings

Session Chair: **Marcos Bavdaz**, European Space Agency (Netherlands)

16.00: **Magnetron sputtering deposition of multi-layered reflective coatings, with atomic scale smoothness, on electro-formed metallic substrates**, Guido Salmaso, Valentina Mattarello, Robert Banham, Jacques Kools, Media Lario Technologies (Italy) [7360-25]

16.20: **Design of innovative multilayer coatings for solar imaging and spectroscopy**, Michele Suman, Maria G. Pelizzo, Univ. degli Studi di Padova (Italy); David L. Windt, Reflective X-Ray Optics LLC (United States); Gianni G. Monaco, Sara Zuccon, Piergiorgio Nicolosi, Univ. degli Studi di Padova (Italy) [7360-26]

16.40: **Deposition of hard X-ray reflective coatings as an industrial manufacturing process**, Enrico Boscolo Marchi, Denis Garoli, Valentina Mattarello, Juri Bertoli, Jacques Kools, Media Lario Technologies (Italy); Daniele Spiga, Giampiero Tagliaferri, Giovanni Pareschi, Osservatorio Astronomico di Brera (Italy) [7360-27]

17.00: **Characteristics of X-ray Kirkpatrick-Baez imaging with different coatings**, Baozhong Mu, Shengzhen Yi, Jingtao Zhu, Jing Xu, Wang Xin, Shengling Huang, Jiang Li, Qiushi Huang, Liang Bai, Xiaoqiang Wang, Zhanshan Wang, Lingyan Chen, Tongji Univ. (China) [7360-28]

17.20: **Optical constants of silicon carbide thin films deposited with emerging PVD techniques**, Gianni G. Monaco, Piergiorgio Nicolosi, Michele Suman, Maria G. Pelizzo, Monica Gastaldi, Univ. degli Studi di Padova (Italy) and CNR-INFN Laboratory for Ultraviolet and X-Ray Optical Research (Italy) [7360-29]

Room: Club E Tues. 17.45 to 19.15

Posters—Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded. SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Microstructured optical arrays for smart X-ray optics, Camelia Dunare, The Univ. of Edinburgh (United Kingdom) [7360-36]

New lightweight X-ray optics: alternative materials, Michaela Skulinova, René Hudec, Astronomical Institute (Czech Republic); Ladislav Pina, Czech Technical Univ. in Prague (Czech Republic); Jan Sik, Michal Lorenc, ON Semiconductor Czech Republic (Czech Republic); Veronika Semencova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-37]

Development and spectrometric performance study of semi-insulating GaAs detectors for application in soft X-ray region, Frantisek Dubecky, Bohumir Zatko, Institute of Electrical Engineering (Slovakia); Leszek Ryc, Institute of Plasma Physics and Laser Microfusion (Poland); Pavol Bohacek, Jozef Huran, Institute of Electrical Engineering (Slovakia); Vladimír Necas, Slovenska Technicka Univ. (Slovakia) [7360-38]

New developments in the on-axis and off-axis HEW simulation for the optical module of the SIMBOL-X hard X-ray telescope, Daniele Spiga, Marta Civitani, Vincenzo Cotroneo, Osservatorio Astronomico di Brera (Italy) [7360-41]

Crystal characterization for a Gamma-ray Laue concentrator, Michaela Skulinova, Univ. College Dublin (Ireland); Carlo Pellicciari, Osservatorio Astronomico di Palermo Giuseppe S. Vaiana (Italy); Lorraine Hanlon, Brian McBrean, Univ. College Dublin (Ireland) [7360-44]

First set of X-ray imaging diagnostics for the LMJ, Rudolf Rosch, Commissariat à l'Energie Atomique (France); Charles Reverdin, Commissariat à l'Energie Atomique (France); G. Soullie, Jean-Luc Bourgade, Jean-Yves Boutin, Jean-Paul P. Jadaud, Remy Marmoret, Hélène Maury, Andre L. Richard, Philippe Troussel, Commissariat à l'Energie Atomique (France) [7360-45]

Wednesday 22 April

SESSION 7

Room: Club EWed. 8.30 to 11.50

X-ray Optics II

Session Chair: **Webster C. Cash, Jr.**, Univ. of Colorado at Boulder
(USA)

- 8.30: **Invited Presentation--TBA** (*Invited Paper*), , [7360-30]
- 9.00: **Fourier transform imaging spectrometer in soft X-ray region**, Jaroslava Z. Wilcox, Victor White, Kirill Shcheglov, Yekta Gursel, Jet Propulsion Lab. (United States) [7360-31]
- 9.20: **A generic X-ray tracing toolbox in Geant4**, Giuseppe Vacanti, Ernst-Jan Buis, Max Collon, cosine Science & Computing B.V. (Netherlands) . . [7360-32]
- 9.40: **Wavefront sensing of XUV beams**, Pavel Homer, Bedrich Rus, Institute of Physics (Czech Republic) [7360-33]
- Coffee Break 10.00 to 10.20
- 10.20: **Study of small x-ray telescope based on lobster eye x-ray optics and pixel detector**, Vladimir Tichy, Martin Hromcik, Czech Technical Univ. in Prague (Czech Republic); René Hudec, Astronomical Institute (Czech Republic); Libor Sveda, Ladislav Pina, Jan Jakubek, Czech Technical Univ. in Prague (Czech Republic); Veronika Semencova, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic); Jiri Marsik, REFLEX s.r.o. (Czech Republic); Adolf J. Inneman, Rigaku Innovative Technologies Europe s.r.o. (Czech Republic) [7360-34]
- 10.40: **Transition radiation in VUV and soft X-ray range from moderately relativistic particles (electrons)**, Alexander P. Potylitsyn, Dan A. Verigin, Tomsk Polytechnic Univ. (Russian Federation) [7360-35]
- 11.00: **Magnetic field assisted finishing of ultra-lightweight and high-resolution MEMS X-ray micro-pore optics**, Raul E. Riveros, Hitomi Yamaguchi, Univ. of Florida (United States); Ikuyuki Mitsuishi, Japan Aerospace Exploration Agency (Japan); Utako Takagi, Yuichiro Ezoe, Tokyo Metropolitan Univ. (Japan); Fumiki Kato, Susumu Sugiyama, Ritsumeikan Univ. (Japan); Noriko Y. Yamasaki, Kazuhisa Mitsuda, Japan Aerospace Exploration Agency (Japan) [7360-42]
- 11.20: **High-resolution X-ray spectrometer utilizing Kirkpatrick-Baez optics and off-plane gratings** (*Invited Paper*), Randall L. McEntaffer, Univ. of Iowa (United States) [7360-43]

SPIE *Europe* Optics+Optoelectronics
proceedings are published at
the speed of light.

SPIE 
Digital Library

Research driving technological
innovation

Damage to VUV, EUV, and X-ray Optics II (XDam2)

Conference Chairs: **Libor Juha**, Institute of Physics (Czech Republic); **Saša Bajt**, Deutsches Elektronen-Synchrotron (Germany); **Ryszard Sobierajski**, Institute of Physics (Poland) and FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands)

Programme Committee: **Fred Bijkerk**, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands); **Henryk Fiedorowicz**, Institute of Electrooptics, WAT (Poland); **J. Gaudin**, European XFEL (Germany); **Jacek Krzywinski**, Stanford Linear Accelerator Center (USA); **Richard London**, Lawrence Livermore National Lab. (USA); **Klaus Mann**, Laser-Lab. Göttingen e.V. (Germany); **Tomas Mocek**, Institute of Physics (Czech Republic); **Ladislav Pina**, Czech Technical Univ. in Prague (Czech Republic); **Jorge J. Rocca**, Colorado State Univ. (USA); **Michael Störmer**, GKSS-Forschungszentrum Geeshacht, GmbH (Germany); **Philippe Zeitoun**, Ecole Nationale Supérieure de Techniques Avancées (France); **Beata Ziaja-Motyka**, Deutsches Elektronen-Synchrotron (Germany)

Tuesday 21 April

Room: Club E. Tues. 17.45 to 19.15

Posters—Tuesday

All symposium attendees are invited to attend Tuesday poster session provided as an opportunity to enjoy networking and refreshments while reviewing poster papers. The interactive poster sessions are designed to promote opportunities for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs on Tuesday in the Conference Area Hallway. Any papers left on the boards following the end time of the poster session will be considered unwanted and will be discarded. SPIE Europe assumes no responsibility for posters left up after the end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs to answer questions from attendees. Attendees are requested to wear their conference registration badges to the poster sessions.

Degradation of thin-film filters irradiated by debris emission of a laser induced plasma, David Schäfer, RheinAhrCampus Remagen (Germany); Urs Wiesemann, ACCEL Instruments GmbH (Germany); Thomas Nisius, Thomas Wilhein, RheinAhrCampus Remagen (Germany) [7361-31]

Risk analysis of laser elements for complex characterization of damages by space radiation, Anatoliy M. Negriyko, Mykhailo S. Brodyn, Institute of Physics (Ukraine); Vitaliy A. Yatsenko III, Institute of Space Research (Ukraine) [7361-32]

Characterization of tin vapor from CO₂ laser produced EUV light source, Yoshifumi Ueno, Tatsuya Yanagida, Takashi Sugauma, Hiroshi Komori, Akira Endo, Akira Sumitani, EUVA (Japan) [7361-33]

Applicability of transmissive diffractive optics to high flux FEL radiation, Thomas Nisius, David Schäfer, RheinAhrCampus Remagen (Germany); Marek Wieland, Univ. Hamburg (Germany); Thomas Wilhein, RheinAhrCampus Remagen (Germany) [7361-34]

Liquid metal collector optics for EUV lithography, Kenneth M. Fahy, Paul Sheridan, Padraig A. Dunne, Patrick B. Hayden, Gerard D. O'Sullivan, Fergal O'Reilly, Dublin City Univ. (Ireland) [7361-35]

Towards a best understanding of multi-wavelength effects on KDP crystals, Stéphane Reyné, Commissariat à l'Energie Atomique (France) and Institut Fresnel (France); Marc Loiseau, Guillaume Duchateau, Commissariat à l'Energie Atomique (France); Jean-Yves Natoli, Institut Fresnel (France); Laurent Lamoignon, Commissariat à l'Energie Atomique (France) [7361-36]

Damage thresholds of various materials irradiated by 100-ps pulses of 21.2-nm laser radiation, Vera Hajkova, Jaromir Chalupsky, Institute of Physics (Czech Republic); Hubertus Wabnitz, Josef Feldhaus, Deutsches Elektronen-Synchrotron (Germany); Tomas Mocek, Michaela Kozlova, Jiri Polan, Pavel Homer, Bedrich Rus, Libor Juha, Institute of Physics (Czech Republic) [7361-37]

Response of carbonaceous materials to intense XUV/x-ray radiation, Martina Toufarova, Vera Hajkova, Jaromir Chalupsky, Tomas Burian, Ludek Vysin, Institute of Physics (Czech Republic); Jacek Krzywinski, Ryszard Sobierajski, Dorota Klinger, Jerzy B. Pelka, Institute of Physics (Poland); Frank Barkusky, Klaus Mann, Laser-Lab Göttingen e.V. (Germany); Hamed Merdji, Marco V. De Grazia, Stéphane Guizard, Commissariat à l'Energie Atomique (France); Constance Valentin, Julien Gautier, Ecole Nationale Supérieure de Techniques Avancées (France); Janos Hajdu, Uppsala Univ. (Sweden); Hubertus Wabnitz, Kai I. Tiedtke, Jerome Gaudin, Sven Toleikis, Thomas Tschentscher, Deutsches Elektronen-Synchrotron (Germany); Michael Störmer, GKSSForschungszentrum Geeshacht, GmbH (Germany); Libor Juha, Institute of Physics (Czech Republic) [7361-38]

Applications of compact laser-driven EUV/XUV plasma sources, Frank Barkusky, Armin Bayer, Stefan Döring, Bernhard Flöter, Peter Großmann, Christian Peth, Michael Reese, Klaus Mann, Laser-Lab. Göttingen e.V. (Germany) [7361-39]

XUV Nano-Metrology: Surface Analysis with Extreme Ultraviolet Radiation, L. Juschkina, M. Banyay, T. Bückner, P. Loosen, RWTH-TOS (Germany); A. Bayer, F. Barkusky, S. Döring, C. Peth, and K. Mann, Laser-Lab. Goettingen e.V. (Germany); H. Blaschke, I. Balasa, D. Ristau, Laser-Zentrum Hannover e.V. (Germany) [7361-40]

Wednesday 22 April

Room: Club E. Wed. 13.00 to 13.05

Opening Remarks

Libor Juha, Institute of Physics (Czech Republic); **Saša Bajt**, Deutsches Elektronen-Synchrotron (Germany); **Ryszard Sobierajski**, Institute of Physics (Poland) and FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands)

SESSION 1

Room: Club E. Wed. 13.05 to 15.10

Facilities and their Optics

Session Chair: **Libor Juha**, Institute of Physics (Czech Republic)

13.05: **LCLS facilities, beamlines, optics, and detectors** (*Invited Paper*), Stefan P. Hau-Riege, Lawrence Livermore National Lab. (United States) [7361-01]

13.30: **The FLASH Facility** (*Invited Paper*), Kai I. Tiedtke, Elke Ploenjes, Deutsches Elektronen-Synchrotron (Germany) [7361-02]

1:55: **Current status of Japanese XFEL project and beamlines** (*Invited Paper*), Makina Yabashi, Atsushi Higashiya, Tadashi Togashi, Mitsuru Nagasono, Takaki Hatsuji, Kenji Tamasaku, Yoshihito Tanaka, The Institute of Physical and Chemical Research (RIKEN) (Japan); Hiroaki Kimura, Togo Kudo, Hiromitsu Tomizawa, Sunao Takahashi, Kunikazu Takeshita, Haruhiko Ohashi, Shunji Goto, Japan Synchrotron Radiation Research Institute (Japan); Tetsuya Ishikawa, The Institute of Physical and Chemical Research (RIKEN) (Japan) [7361-03]

14.20: **Damage studies for the design of the European XFEL beamline optics** (*Invited Paper*), Jérôme Gaudin, European XFEL (Germany) and Service des Accélérateurs, de Cryogénie et de Magnétisme (France); Antje Trapp, Fan Yang, Harald Sinn, Thomas Tschentscher, European XFEL (Germany) [7361-04]

14.45: **The FERMI@Elettra FEL photon transport system** (*Invited Paper*), Daniele Cocco, Marco Zangrando, Alessandro Abrami, Anna Bianco, Ivan Cudin, Claudio Fava, Dario Giurelli, Roberto Godnig, Fulvio Parmigiani, Barbara Ressel, Luca Rumiz, Rudi Sergio, Alberto Simoncig, Cristian Svetina, Goran Zgrablic, Sincrotrone Trieste S.C.p.A. (Italy) [7361-05]

Coffee Break 15.10 to 15.35

SESSION 2

Room: Club E. Wed. 15.35 to 16.55

Damage by Ultra-short XUV/X-ray Pulses

Session Chair: **Eric Louis**, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands)

15.35: **Interaction of intense ultrashort XUV pulses with silicon**, Ryszard Sobierajski, Institute of Physics (Poland) and FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands); Marek Jurek, Dorota Klinger, Jerzy B. Pelka, Institute of Physics (Poland); Libor Juha, Jaromir Chalupsky, Vera Hajkova, Institute of Physics (Czech Republic); Ulf Jastrow, Kai I. Tiedtke, Hubertus Wabnitz, Sven Toleikis, European XFEL (Germany); Ali R. Khorsand, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands); Jacek Krzywinski, Stanford Linear Accelerator Ctr. (United States); Stefan P. Hau-Reige, Lawrence Livermore National Lab. (United States); Jérôme Gaudin, Deutsches Elektronen-Synchrotron (Germany) (Germany) [7361-06]

SESSION 5

Room: Club E. Thurs. 10.20 to 11.50

Damage to Multilayers

Session Chair: **Ryszard Sobierajski**, Institute of Physics (Poland) and FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands)

10.20: **Damage studies of multilayer optics for XUV FELs** (*Invited Paper*), Eric Louis, Ali R. Khorsand, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands); Ryszard Sobierajski, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands) and Institute of Physics (Poland); Eddie D. van Hattum, Tim Tsarfaty, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands); Marek Jurek, Dorota Klinger, Jerzy B. Pelka, Institute of Physics (Poland); Libor Juha, Jaromír Chalupsky, J. Cihelka, Vera Hajkova, Institute of Physics (Czech Republic); Ulf Jastrow, Sven Toleikis, Hubertus Wabnitz, Kai I. Tiedtke, Deutsches Elektronen-Synchrotron (Germany); Jérôme Gaudin, European XFEL (Germany); Fred Bijkerk, FOM-Instituut voor Plasmafysica Rijnhuizen (Netherlands) . . . [7361-17]

10.45: **Sub-micron focusing of soft X-ray free electron laser beam**, Saša Bajt, Deutsches Elektronen-Synchrotron (Germany); Henry N. Chapman, Univ. Hamburg (Germany); Art J. Nelson, Richard W. Lee, Paul B. Mirkarimi, Jennifer B. Alameda, Sherry L. Baker, Hubert J. Vollmer, Eric M. Gullikson, Andrew L. Aquila, Julia Meyer-Ilse, Lawrence Berkeley National Lab. (United States); Eberhard A. Spiller, Spiller X-ray Optics (United States); Jacek Krzywinski, Stanford Linear Accelerator Ctr. (United States); Libor Juha, Institute of Physics (Czech Republic); Sven Toleikis, Deutsches Elektronen-Synchrotron (Germany); Janos Hajdu, Uppsala Univ. (Sweden); Thomas Tschentscher, Deutsches Elektronen-Synchrotron (Germany) . . . [7361-18]

11.05: **Design considerations for high damage threshold VUV mirrors**, Volodymyr Pervak, Ludwig-Maximilians-Univ. München (Germany); Eleftherios Goulielmakis, Max-Planck-Institut für Quantenoptik (Germany) . . . [7361-19]

11.25: **Competitive reactions of carbon deposition and oxidation on the surface of Mo/Si multilayer mirrors by EUV irradiation** (*Invited Paper*), Masahito Niibe, Univ. of Hyogo (Japan) . . . [7361-20]

Lunch Break 11.50 to 1:10

SESSION 6

Room: Club E. Thurs. 13.10 to 14.10

Laser-induced Damage

Session Chair: **Jaromír Chalupsky**, Institute of Physics (Czech Republic)

13.10: **Laser damage densities measurements on fused silica optics: round-robin test at 351-355 nm.**, Laurent Lamaignère, Marc Loiseau, Thierry Donval, Roger Courchinoux, Stéphane Bouillet, Jean-Christophe Poncetta, Bertrand Bertussi, Hervé Bercegol, Commissariat à l'Énergie Atomique (France) [7361-21]

13.30: **Laser-induced damage studies in optical elements using X-ray laser interferometric microscopy**, Michaela Kozlova, Institute of Physics (Czech Republic) . . . [7361-22]

13.50: **Characterization of focused beam of desktop 10-Hz capillary-discharge 46.9-nm laser**, Ludek Vysin, Tomas Burian, Institute of Physics (Czech Republic) and Czech Technical Univ. in Prague (Czech Republic); Jaromír Chalupsky, Institute of Physics (Czech Republic); Michael Grisham, Colorado State Univ. (United States); Vera Hajkova, Institute of Physics (Czech Republic); Scott C. Heinbuch, Colorado State Univ. (United States); Krzysztof Jakubczak, Libor Juha, Tomas Mocek, Institute of Physics (Czech Republic); Peter Pira, Charles Univ. in Prague (Czech Republic); Jiri Polan, Institute of Physics (Czech Republic); Jorge J. Rocca, Colorado State Univ. (United States); Bedrich Rus, Institute of Physics (Czech Republic); Jaroslav Sobota, Institute of Scientific Instruments (Czech Republic) . . . [7361-23]

SESSION 7

Room: Club E. Thurs. 14.10 to 15.10

Laser Plasmas

Session Chair: **Beata Ziaja-Motyka**, Deutsches Elektronen-Synchrotron (Germany)

14.10: **Optical emission spectroscopy of various materials irradiated by soft x-ray free-electron laser**, Jaroslav Cihelka, Institute of Physics of the AS CR, v.v.i. (Czech Republic) and J. Heyrovsky Institute of Physical Chemistry, ASCR, v.v.i. (Czech Republic) . . . [7361-24]

14.30: **Bright EUV emission from highly charged Xenon ions**, Vasily S. Zakharov, M. V. Keldysh Institute of Applied Mathematics (Russian Federation) . . . [7361-25]

14.50: **Nonlinear 6-fold enhancement of laser drilling efficiency by double pulse mode: prospective in medicine application**, Nathalia Pershina, Sergei M. Pershin, A. M. Prokhorov General Physics Institute (Russian Federation); Helena Jellinkova, Ivan Prochazka, Josef Blazek, Czech Technical Univ. in Prague (Czech Republic) . . . [7361-26]

Coffee Break 15.10 to 15.40

15.55: **Response of molecular solids to ultra-intense femtosecond soft x-ray pulses**, Jaromír Chalupsky, Institute of Physics (Czech Republic) and Czech Technical Univ. (Czech Republic); Libor Juha, Vera Hajkova, Jaroslav Cihelka, Ludek Vysin, Institute of Physics (Czech Republic); Julien Gautier, Ecole Nationale Supérieure de Techniques Avancées (France); Janos Hajdu, Uppsala Univ. (Sweden); Stefan P. Hau-Riege, Lawrence Livermore National Lab. (United States); Marek Jurek, Jacek Krzywinski, Institute of Physics (Poland); Richard A. London, Lawrence Livermore National Lab. (United States); Evangelos Papalazarou, Ecole Nationale Supérieure de Techniques Avancées (France); Jerzy B. Pelka, Institute of Physics (Poland); Gilles Rey, Stephane Sebban, Ecole Nationale Supérieure de Techniques Avancées (France); Ryszard Sobierajski, Institute of Physics (Poland); Nikola Stojanovic, Kai I. Tiedtke, Sven Toleikis, Thomas Tschentscher, Deutsches Elektronen-Synchrotron (Germany); Constance Valentin, Ecole Nationale Supérieure de Techniques Avancées (France); Hubertus Wabnitz, Deutsches Elektronen-Synchrotron (Germany); Philippe Zeitoun, Ecole Nationale Supérieure de Techniques Avancées (France) . . . [7361-07]

16.15: **Laser-induced periodic surface structures (LIPSS) on surfaces irradiated by XUV/x-ray lasers**, Libor Juha, Institute of Physics (Czech Republic) . . . [7361-08]

16.35: **Efficient materials processing by dual action of XUV/Vis-NIR ultrashort laser pulses**, Krzysztof Jakubczak, Tomas Mocek, Jiri Polan, Pavel Homer, Bedrich Rus, Institute of Physics (Czech Republic); I Jong Kim, Chul Min Kim, Seung Beom Park, Tae Keun Kim, Gye Hwang Lee, Chang Hee Nam, Korea Advanced Institute of Science and Technology (Korea, Republic of); Jaromír Chalupsky, Vera Hajkova, Libor Juha, Institute of Physics (Czech Republic) . . . [7361-09]

SESSION 3

Room: Club E. Wed. 16.55 to 18:10

Damage by Short XUV/X-ray Pulses

Session Chair: **Jérôme Gaudin**, European XFEL (Germany)

16.55: **Silica nano-ablation using laser plasma soft X-rays** (*Invited Paper*), Tetsuya Makimura, Shuichi Torii, Univ. of Tsukuba (Japan); Hiroyuki Niino, National Institute of Advanced Industrial Science and Technology (Japan); Kouichi Murakami, Univ. of Tsukuba (Japan) . . . [7361-10]

17.20: **Surface changes of solids under intense EUV irradiation using a laser-plasma source** (*Invited Paper*), Andrzej S. Bartnik, Henryk Fiedorowicz, Roman Jaroocki, Jerzy Kostecki, Rafał Rakowski, Mirosław Szczurek, Wojskowa Akademia Techniczna (Poland) . . . [7361-11]

17.45: **Photo-etching of solids by EUV radiation from table-top laser-produced plasma sources** (*Invited Paper*), Frank Barkusky, Armin Bayer, Christian Peth, Klaus Mann, Laser-Lab. Göttingen e.V. (Germany) . . . [7361-12]

Thursday 23 April

SESSION 4

Room: Club E. Thurs. 8.30 to 9.50

Theory and Computer Simulation

Session Chair: **Saša Bajt**, Deutsches Elektronen-Synchrotron (Germany)

8.30: **Dynamic of electronic subsystem of semiconductors with an ultrashort VUV laser pulse irradiation**, Nikita A. Medvedev, Baerbel Rethfeld, Technische Univ. Kaiserslautern (Germany) . . . [7361-13]

8.50: **Radiation damage within atomic clusters irradiated with intense VUV and soft X-ray radiation**, Beata Ziaja-Motyka, Deutsches Elektronen-Synchrotron (Germany) . . . [7361-14]

9.10: **Modelling of Damage Processes of the Optical-Cryogenic Sensor at Microscopic and Macroscopic Levels**, Vitaliy A. Yatsenko III, Institute of Space Research (Ukraine); Leonid Yatsenko, Anatoliy Negriyko, Janna Potemkina, Elena Udovitskaya, Institute of Physics (Ukraine) . . . [7361-15]

9.30: TBA

Coffee Break 9.50 to 10.20

Conference 7361

SESSION 8

Room: Club E..... Thurs. 15.40 to 17.00

Damage to Phosphors, Filters, Detectors and Coatings

Session Chairs: **Kai I. Tiedtke**, Deutsches Elektronen-Synchrotron (Germany); **Elke Ploenjes**, Deutsches Elektronen-Synchrotron (Germany)

15.40: **Phosphor materials under high-density XUV FEL excitation: mechanisms of luminescence quenching**, Sebastian Vielhauer, Marco Kirm, Vladimir Babin, Vitali Nagirnyi, Univ. of Tartu (Estonia); Marco V. De Grazia, Commissariat a l'Energie Atomique (France); Andrej N. Vasil'ev, Lomonosov Moscow State Univ. (Russian Federation)[7361-27]

16.00: **The factors affecting the transmission course and stability in complex fluorides in VUV spectral region**, Martin Nikl, Karel Polak, Jiri Martincik, Institute of Physics of the AS CR, v.v.i. (Czech Republic); Akira Yoshikawa, Jan Pejchal, Tohoku Univ. (Japan); Sumito Ishizu, Kentaro Fukuda, Toshihisa Suyama, Naoriaki Kawaguchi, Tokuyama Corp. (Japan) . . .[7361-28]

16.20: **Radiation hardness of AlxGa1-xN photodetectors exposed to Extreme UltraViolet (EUV) light beam**, Pawel E. Malinowski, IMEC (Belgium) and Katholieke Univ. Leuven (Belgium); Joachim John, Anne Lorenz, Kai Cheng, Joff Derluyn, Marianne Germain, Piet De Moor, Kyriaki Minoglou, IMEC (Belgium); Frank Barkusky, Armin Bayer, Klaus Mann, Laser-Lab. Göttingen e.V. (Germany); Jean-Yves Duboz, Fabrice Semond, Ctr. National de la Recherche Scientifique (France); Jean-Francois Hochedez, Boris Giordanengo, Royal Observatory of Belgium (Belgium); Gustaaf Borghs, Robert P. Mertens, IMEC (Belgium)[7361-29]

16.40: **Morphology, microstructure, stress and damage properties of thin film coatings for the LCLS x-ray mirrors**, Regina Soufli, Sherry L. Baker, Jeffrey C. Robinson, Lawrence Livermore National Lab. (United States); Eric M. Gullikson, Lawrence Berkeley National Lab. (United States); Michael J. Pivovarov, Stefan Hau-Riege, Richard M. Bionta, Lawrence Livermore National Lab. (United States)[7361-30]

General Information

Venue

Prague Congress Centre
5, Kvetna 65
Prague 4, 140 21
Czech Republic
Tel: +420 239 071 111

Registration

Full symposium registration includes: Admittance to the conferences, the exhibition, welcome reception, poster receptions, coffee breaks, and Proceedings of SPIE as applicable under the specific registration plans (see registration form for details).

Proceedings of SPIE and CD-ROMs purchased as part of your registration plan include shipping charges. Student author registration plans do not include Proceedings of SPIE.

Registration Hours

Congress Hall Foyer A - 1st Floor

Sunday 19 April 15.00 to 18.00 hrs.
Monday 20 April 07.30 to 18.30 hrs.
Tuesday 21 April 08.00 to 17.00 hrs.
Wednesday 22 April 08.00 to 17.00 hrs.
Thursday 23 April 08.00 to 16.00 hrs.

Exhibition Hours

Congress Hall Foyer B - 1st Floor

Tuesday 21 April 10.00 to 17.00 hrs.
Wednesday 22 April 10.00 to 16.00 hrs.

Onsite Services

Cashier Services

The Conference Partner cashier can assist with registration payments, receipts, and badge corrections.

Registration Payments

If you have paid by cash or cheque as part of your onsite registration, wish to add a publication or a guest ticket requiring payment, or have questions regarding your registration please see the onsite cashier at the Cashier station at the registration desk.

Receipts

Preregistered attendees who did not receive a receipt prior to the meeting may obtain a new copy of their registration receipt onsite at the Cashier's desk.

Badge Corrections

Attendees who need a correction to their badge information onsite may do so at the Cashier's desk. Please have your badge removed from the badge holder, marked with your changes, and ready to hand to the attendant upon approaching the counter.

Message Centre

Messages for attendees can be left by calling the Prague Congress Centre and asking for the Conference Partners CZ - Conference and registration Desk. Messages will be taken during registration hours Monday - Thursday. It is the attendee's responsibility to check the message boards on a daily basis.

Internet Access/WiFi

Internet Access via WiFi will be available; speeds may vary depending on the number of users.

Luggage Storage and Coat Check

A cloakroom is located near the Forum Hall Foyer 1 on the first floor of the Congress Centre. Opening times are from Monday to Friday from 8.00 to 17.00 hrs.

SPIE Marketplace

The SPIE Marketplace is your source for the latest SPIE Press books, Proceedings, and Education and Professional Development materials. A display will be available for you to browse in the exhibition area.

SPIEWorks

SPIEWorks, the SPIE job site, was developed to serve the career needs of optics and photonics professionals. Whether you are actively seeking a new position or just want to keep track of the scientific job market, you can search by region, technology, and keywords, set up email alerts or RSS feeds, and research companies of interest.

Speaker Services

Speaker Check In Desk

All Conference rooms will have a computer workstation, LCD projector, screen, lapel microphone, and laser pointer.

All presenters are requested to use the rooms of their conference in the breaks or in the mornings to test their presentation.

Interactive Poster Sessions Setup Instructions

Meeting Room Corridor

Tuesday 21 April 17.45 to 19.15 hrs.

All symposium attendees are invited to attend the Tuesday poster session provided as an opportunity to enjoy snacks while reviewing poster papers. The interactive poster sessions are designed to promote an opportunity for networking with colleagues in your field. Attendees are encouraged to review the high-quality papers that are presented in this alternate format and to interact with the poster authors.

Poster presenters may post their poster papers starting at 10.00 hrs. on Tuesday in the Corridor in front of the meeting rooms. Any papers left on the boards following the end time will be considered unwanted and will be discarded.

SPIE Europe assumes no responsibility for posters left up after the designated end of the poster session. Poster authors should be at their papers from 17.45 to 19.15 hrs during their respective session on Monday or Wednesday to answer questions from attendees.

Attendees are requested to wear their conference registration badges to the poster sessions. Supplies for posting papers will be available in those areas. Note that poster presenters are not supplied with any audio visual equipment, authors requiring such equipment should refrain from requesting the poster presentation format.

Catering

Coffee Breaks

Exhibition Hall Foyer B, 1st Floor

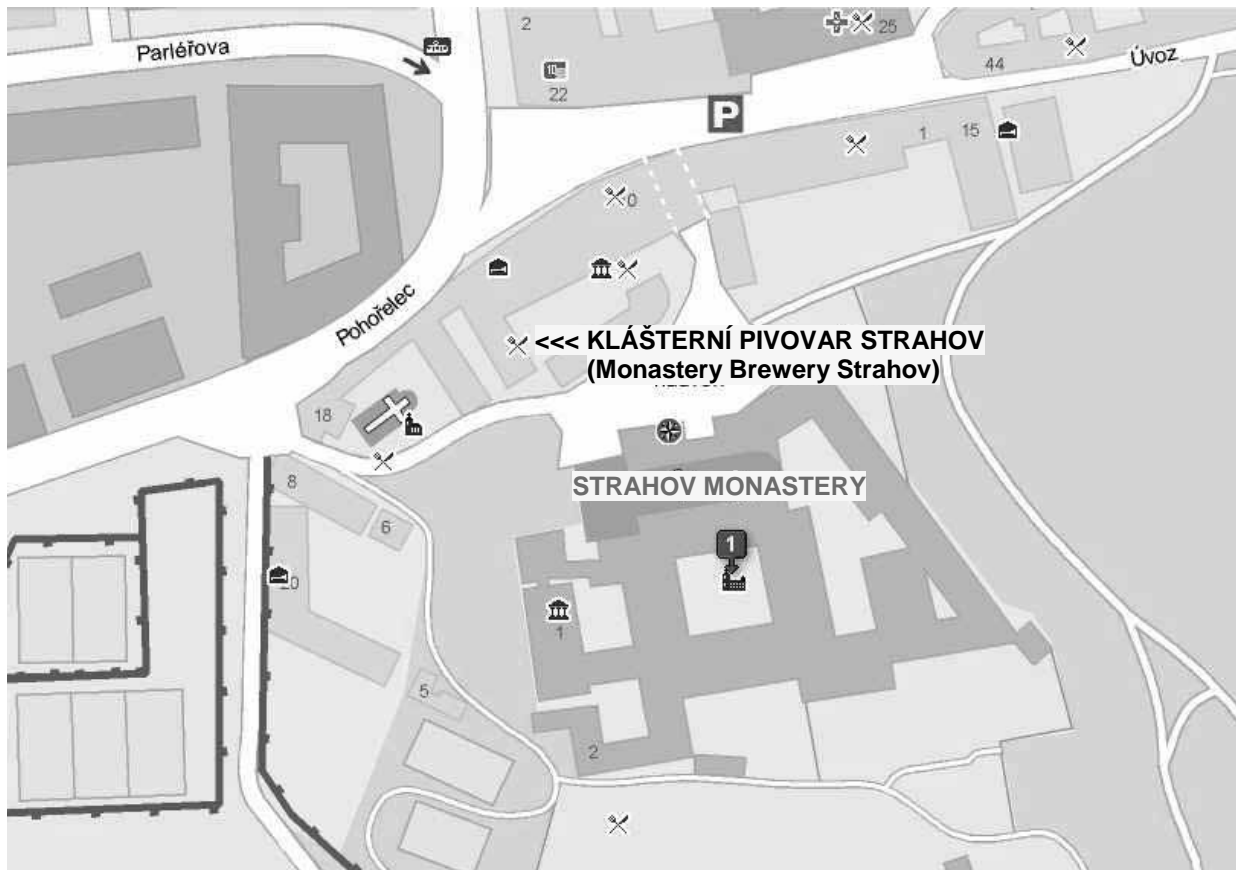

Coffee will be served during the appropriate breaks. For exact times and locations please check the programme.

Welcome Reception

Strahov Monastery Brewery

Monday 20 April 18.30 to 20.30 hrs.

All attendees are invited to attend the Welcome Reception which will be held at the Strahov Monastery Brewery near the Prague castle. Relax, socialize, and enjoy light refreshments. Please remember to wear your conference registration badge. Dress is casual. For details on how to get to the venue, please check with the registration desk.

Policies

Audio/Video/Digital Recording Policy

Because of copyright restrictions, video or digital recording of any conference session or poster is strictly prohibited without written prior consent from each specific presenter to be recorded. Individuals not complying with this policy will be asked to leave a given session and to surrender their film or disc. It is the responsibility of the presenter to notify SPIE Europe if consent is given.

Laser Safety Policy

SPIE Europe uses tested and safety-approved laser pointers for all conference and course rooms. For safety reasons, SPIE Europe requests that presenters use our provided laser pointers. Use of a personal laser pointer at an SPIE Europe event represents user's acceptance of liability for use of a non-SPIE Europe-supplied laser pointer device. Misuse of any laser pointer could lead to eye damage.

No Suitcasing Policy

Suitcasing is the act of soliciting business in the aisles during the exhibition or in other public spaces associated with the exhibition. Please note that while all meeting attendees are invited to the exhibition, any attendee who is observed to be soliciting business in violation of any portion of SPIE Exhibition Policy will be asked to leave immediately. Additional penalties may be applied. Please report any violations you observe to show management.

Unsecured Items

Personal belongings such as briefcases, backpacks, coats, book bags, etc., should not be left unattended in meeting rooms or public areas. These items will be subject to removal by security upon discovery.

Travel to the Conference Venue

Public Transport

Prague has a network of public transport routes including bus, tram and metro links.

http://www.pragueexperience.com/travel_flights/public_transportation.asp

By Bus

The majority of travel links in the city terminate at the Florence station, which is about 10 minutes away by metro. Get off at the Vysehrad stop. (It is the fourth stop from Florence). The Congress Centre is located right next to the stop.

By Train

Having once arrived at the Prague Main Station (Hlavní Nádraží), take metro from the Hlavní Nádraží stop running in the direction of Háje. Get off at the Vysehrad stop (it is the third stop from Hlavní nádraží). The Congress Centre is located right next to the stop.

<http://jizdnirady.idnes.cz/vlaky/spojeni>

Public Transport to and from the airport

Shuttle bus links the airport and the end station of the A metro line named Dejvická. It runs every 30 minutes. From Dejvická take the Skalka-bound service to the Muzeum stop, there change to line C, running in the direction of Háje. Get off at the Vysehrad metro stop (it is the second stop after Muzeum).

The Congress Centre is located right next to the metro stop. A combined bus-metro service will take you to the Congress Centre from the airport in about 45 minutes.

Parking

The venue has car parking facilities. Please follow the link <http://www.kcp.cz/parking.php?lng=AN> for directions and more details.

General Information

Hertz Car Rental

Optics & Optoelectronics
April 20-23, 2009
Prague, Czech Republic

Meet with success the Hertz way

Hertz Car Rental Checklist:

1. Call the Hertz International Reservation Center at 1-800-654-3001 in the USA or your local Hertz Reservation Center to receive a special discount for the Optics & Optoelectronics Meeting. Reservations may also be placed online at www.hertz.com. You will receive 15% off qualifying retail rates with Unlimited Mileage at participating locations in Czech Republic.

Be sure to identify yourself as a Optics & Optoelectronics Meeting attendee. The PC# below must be on your advance reservation to receive this special offer. You must present this coupon at time of rental in order to receive this discount.

2. This special offer is available for rentals from April 1-30, 2009.

European Symposium on Optics and Optoelectronics (EEO)
Prague Congress Center, 20 - 23 April 2009
Prague, Czech Republic

Optics & Optoelectronics

ATTENDEE DISCOUNT

15% OFF

Qualifying Retail Rates

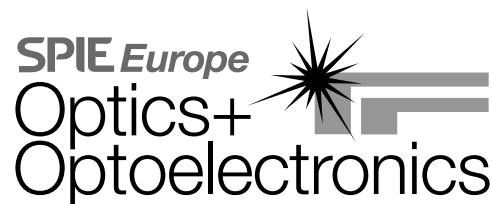

PC# 127326

Important Rental Information

1. The Optics & Optoelectronics Meeting discount is available at participating locations in Czech Republic.
2. The 15% Discount applies to rentals on Affordable Rates from April 1-30, 2009.
3. Reservations must be made at least 24 hours prior to vehicle pickup, using the PC# on the coupon.
4. Minimum rental period is 3 days.
5. Offer includes Compact and above (manuals and automatics)
6. Discount does not apply to taxes, intercity drop charges, insurance or optional services.
7. Certificate has no cash value and may not be combined with any other offer, discount or promotion. Certificate must be presented and surrendered at time of rental.
8. Normal intercity rules and rate restrictions apply.
9. Minimum rental age is 25 (exceptions apply). Hertz standard driver and credit qualifications for the rental location apply. Blackout periods may apply.

Visit the Exhibition

Network with industry leaders, talk with your suppliers, and see the latest technologies that are changing the way we live and work.

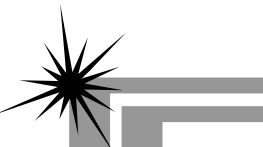

Exhibitors are showcasing technologies in the following areas:

- Metamaterials
- Nonlinear Optics and its Applications
- Photon Counting Applications
- Quantum Optics and Quantum Information Transfer and Processing
- Optical Sensors
- Photonic Crystal Fibres

Exhibition Dates and Hours:

Tuesday 21 April 10.00 to 17.00
Wednesday 22 April 10.00 to 16.00

SPIE Europe
Optics+
Optoelectronics

Order Proceedings volumes with your registration and receive low prepublication prices.

Vol#	Title (Editor)	Prepublication Price
7353	Metamaterials IV (V. Kuzmiak/P. Markos/ T. Szoplik)	€ 55
7354	Nonlinear Optics and Applications III (M. Bertolotti)	€ 65
7355	Photon Counting Applications, Quantum Optics, and Quantum Information Transfer and Processing II (I. Prochazka/R. Sobolewski/ M. Dusek)	€ 50
7356	Optical Sensors 2009 (F. Baldini/J. Homola/ R. A. Lieberman)	€ 95
7357	Photonic Crystal Fibers III (K. Kalli)	€ 50
7358	Holography: Advances and Modern Trends (M. Miller/M. Hrabovsky)	€ 65
7359	Harnessing Relativistic Plasma Waves as Novel Radiation Sources from Terahertz to X-Rays and Beyond (D. A. Jaroszynski/A. Rouse)	€ 55
7360	EUV and X-Ray Optics: Synergy between Laboratory and Space (R. Hudec/L. Pina)	€ 55
7361	Damage to VUV, EUV, and X-Ray Optics II (L. Juha/S. Bajt/R. Sobierajski)	€ 50

Searchable CD-ROM with Multiple Conferences
 CD-ROMs are now available within 8 weeks of the meeting.

Full-text papers from all 9 Proceedings volumes.
 PC, Macintosh, and Unix compatible.

SPIE Europe: Optics and Optoelectronics 2009
 (Includes Vols. 7353-7361)
 Order No. CDS 349 • Est. pub. June 2009
 Meeting attendee: € 125
 Nonattendee member price: € 365
 Nonattendee nonmember price: € 480

A service of SPIE

SPIE Europe Photonics Europe

New Location

12-16 April 2010

The Square Conference Centre
Brussels, Belgium

The premier photonics event in Europe has moved to Brussels!

Photonics Europe is the essential European photonics event that bridges the gap between academia and industry. Participation in Photonics Europe ensures you access to network with the leaders who are developing technologies rife with economic opportunity for the future.

Featuring Top Quality conferences, Plenary "Hot Topics in Photonics" presentations, an extensive industry programme, student and early career professionals information and networking and the well-known Photonics Innovation Village, the 2010 programme will give you access to developers from universities and institutes and you will meet others interested in developing prototypes and commercializing technology.

Conference Chairs:

Francis Berghmans, Vrije Universiteit, Brussels, Belgium
Ronan Burgess, European Commission, Brussels, Belgium
Jürgen Popp, IPHT, FR Germany

Emphasis is given to topics in

★ **Micro/Nano Technologies**

Metamaterials, Nanophotonics, Photonic Crystal Materials and Devices, Photonic Crystal Fibres, MEMS-MOEMS, Micro-Optics, Optical Micro- and Nanometrology

★ **Disruptive Organic and Bio-Photonics**

Photonic Solutions for Better Health Care, Organic Optoelectronics

★ **Highly Integrated and Functional Photonic Components**

Silicon Photonics, Photonic Integrated Circuits, Photonic Sensors

★ **Advances in Laser and Amplifier Technologies**

Semiconductor Lasers, Laser Dynamics, Solid State Lasers and Amplifiers

★ **Photonics in Industrial Applications**

Photonics for Energy Production Systems, Photonics in Multimedia, Optical and Digital Image Processing, Industrial Perspectives in Photonics

**Conferences • Hot Topics in Photonics • Industry Programme
• Courses • Student and Early Career Workshops • Exhibition**
