Davidova awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — **Gloria Davidova** has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Davidova is an Applied and Engineering Physics student at Cornell University (USA), under the supervision of Professor Andrew Musser. Her interdisciplinary research and coursework centers on applied electromagnetics and quantum and classical nanophotonics, with a particular focus on collective strong coupling regimes in exciton polaritons. Related areas of interest include metamaterials, cavity QED, polaritonics, devices for energy storage, plasmonics, and resonators. She anticipates furthering her research experience by focusing on the physics of light-matter interaction at its most fundamental level, as well as on possible related applications.

In 2023, the Society is awarding \$293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than \$7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
