Sahoo awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — **Swetapadma Sahoo** has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Sahoo is a PhD student working in quantum photonics at the University of Illinois Urbana-Champaign (USA). Her research, supervised by Professor Simeon Bogdanov, focuses on the scalable characterization and engineering of quantum emitters in solid-state materials. In her recent work, Sahoo developed a new method to optically size deeply sub-wavelength nanoparticles, aiming to improve the scalability of pre-selecting quantum emitters for quantum devices. "In addition to my research, I take an active leadership role in promoting the fascinating and enjoyable aspects of optics and photonics research," Sahoo said. "I am humbled and grateful for the recognition bestowed upon me by SPIE."

In 2023, the Society is awarding \$293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than \$7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
