Rowe awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Connor Rowe has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Rowe is currently a master’s student under the supervision of Professor José Azaña at the Institut National de la Recherche Scientifique (Canada). His research focuses on using photonics devices to implement time frequency processing directly in the analogue domain, which will allow for real-time analysis of telecommunications, astrophysics, and medical signals. Rowe has already contributed to 17 conference and journal publications. “I am honoured to receive this scholarship from the SPIE” noted Rowe. “I am thrilled that there is such an amazing community working to support students who are beginning their journeys in optics and photonics.”

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

To view other 2023 scholarship press releases as they become available, please visit the 2023 Scholarship Winners page or learn more about SPIE scholarships on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
