Fathi awarded SPIE Optics and Photonics Education Scholarship

BELINGHAM, Washington, USA — **Faraneh Fathi** has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Fathi is a PhD candidate in the Department of Biomedical Engineering at the University of Kentucky (USA). Fathi works in the Bio-photonic Laboratory, mentored by Dr. Guoqiang Yu, on the development of noninvasive depth-sensitive optical technologies for high-density imaging of deep tissue blood flow and oxygenation. “I feel privileged to be awarded the esteemed SPIE Optics and Photonics Education Scholarship which will support my success in bio-photonics,” said Fathi. “My short-term goal is to create an SPIE Student Chapter at the university to inspire other students working in this field. My long-term goal is to establish a startup company to commercialize innovative optical imaging technologies for healthcare.”

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
