Hsieh awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Huai-Ching Hsieh has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Hsieh is a Bachelor of Science candidate in Life Sciences and Electrical Engineering at National Taiwan University (Taiwan), with research interests in bioimaging and biophotonics. Under the supervision of Professor Kung-Bin Sung, Hsieh developed a method for characterizing cell death based on quantitative phase imaging and investigated the long-term effects of photobiomodulation on mitochondria, co-supervised by Professors An-Chi Wei and Kung-Bin Sung. In September, Hsieh will begin her PhD in Bioengineering at the University of Washington under Professor Jonathan T.C. Liu, researching both in vivo and light-sheet microscopy. "I appreciate SPIE's support of my studies," she said.

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

To view other 2023 scholarship press releases as they become available, please visit the 2023 Scholarship Winners page or learn more about SPIE scholarships on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
