Dixit awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Kirtankumar Pravin Dixit has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Dixit is a PhD candidate in the Physics Department at the University of Alabama in Huntsville (USA). His current focus lies in the development of lithography-free, dynamically tunable Fabry-Perot nanocavities based on epsilon-near-zero semiconductors, with promising applications in solid-state display elements. Alongside his research, Kirtan works as a teaching assistant, mentors senior-year optics students and actively engages in science outreach. As president of the university’s SPIE Student Chapter, he contributes to advancing future optics researchers and ignites a passion for exploration in others.

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.
