Turner awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Rachel Turner has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Turner recently graduated with a Bachelor of Science in Optical Sciences and Engineering from the University of Arizona. She is now pursuing her Master of Science in Optical Sciences at the university’s Wyant College of Optical Sciences. She has been working in the Adaptive Optics Research Lab under Dr. Michael Hart, conducting research on adaptive optics systems which are used to correct wavefront aberrations induced by turbulence in the atmosphere. "Aside from my ongoing research, I have a strong interest in optics outreach and am passionate about sparking an interest in optics among younger generations of students," said Turner.

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
