Contreras awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Wilmer Contreras Sepulveda has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Contreras is a master's student at the National Institute of Astrophysics, Optics, and Electronics (Mexico), specializing in optics. His research is dedicated to the intricate domain of quantum computing under the supervision of Doctors José Javier Sanchez Mondragon and Braulio M. Villegas Martinez. His current investigation centers around the interplay of a two-level atom within a cross-cavity configuration, aiming to propel the field of quantum computing forward. "I am honored to receive the SPIE Optics and Photonics Education Scholarship," said Contreras. "I am confident that it will support my continued studies in optics."

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

To view other 2023 scholarship press releases as they become available, please visit the 2023 Scholarship Winners page or learn more about SPIE scholarships on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
