Yang awarded SPIE Optics and Photonics Education Scholarship

BELLINGHAM, Washington, USA — Younghwan Yang has been awarded a 2023 Optics and Photonics Education Scholarship by SPIE, the international society for optics and photonics, for potential contributions to the field of optics, photonics, or related field.

Yang is a PhD candidate in Optics and Photonics at Pohang University of Science and Technology (Republic of Korea). His research focuses on advancing optical materials and fabrication methods to enable practical photonic applications accessible to a wider audience. “I am grateful to Professor Junsuk Rho and my research colleagues for their guidance and inspiration,” said Yang. “I also appreciate the interactions with fellow researchers from conferences, gatherings, and visiting –their insights have greatly contributed to my growth as a photonic researcher. With SPIE's support, I am excited to continue pushing the boundaries of optical science and making a meaningful impact in optics and photonics.”

In 2023, the Society is awarding $293,000 in education scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Award-winning applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since the program began, SPIE has distributed more than $7 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education and to the next generation of optical scientists and engineers around the world.

To view other 2023 scholarship press releases as they become available, please visit the 2023 Scholarship Winners page or learn more about SPIE scholarships on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $22 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
