Ana Elizabeth Espinosa-Momox awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Ana E. Espinosa-Momox** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Espinosa-Momox is a PhD candidate in the Optical Science and Engineering program at the University of North Carolina at Charlotte (USA). Her research interests include bioimaging, particularly quantitative-phase microscopy. Her current work focuses on leveraging the optical properties of liquid crystal materials to obtain accurate 3D information from phase objects commonly found in biological contexts. “I have a keen interest in applying my research to interdisciplinary initiatives, and my work holds potential for future applications in cell monitoring and disease detection,” said

Espinosa-Momox.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
