Chuan Luo awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Chuan Luo** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Luo is a PhD student at the University of Arizona's Wyant College of Optical Sciences (USA), and is working in the areas of SLM-based AR display and lidar under the mentorship of **Dr. Yuzuru Takashima**. Luo holds bachelor's and master's degrees in Optical Sciences from the University of Arizona. Prior to his PhD program, he was an optical engineer with a focus on incubating advanced display technologies. "I sincerely appreciate SPIE's recognition of my efforts in optics and photonics," said Luo. "Being acknowledged by such a leading optical society is an incredible honor. This award inspires me to continue my research and contribute to the advancement of optics and photonics."

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
