## Daniel Nwatu awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Daniel Nwatu** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Nwatu is a PhD student in the Faculty of Electrical Engineering at the Helmut Schmidt University/University of the Bundeswehr Hamburg (Germany) under the supervision of **Professor Detlef Kip**. Nwatu's research focuses on the fabrication of microfluidic and optical elements in a monolithic Lithium Niobate chip for micro-optofluidics and lab-on-chip applications. "Receiving this SPIE scholarship gives me a renewed sense of responsibility," he said. "I aim to give back to the community with my research, as well as to inspire other students –especially students from Africa – to pursue careers in optics and photonics."

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
