Fangyu Liu awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Fangyu Liu** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

“I am an undergraduate student at Tsinghua University in China, and I am deeply grateful to SPIE for supporting my academic exploration through this award,” said Liu. “It is inspiring to be recognized by such a prestigious organization. I conduct research on computational optical imaging under the guidance of **Professor Liangcai Cao** in the Department of Precision Instruments. I am committed to developing imaging methods that have wide applicability and achieve high resolution and multi-dimensionality. Applying new theories in practice has been my pursuit, and I will continue to dedicate myself to innovative research.”

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
