Felipe Maia Prado awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Felipe Maia Prado** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Maia Prado is a doctoral student studying at the Nuclear and Energy Research Institute (IPEN) and the University of São Paulo (Brazil). Under the supervision of **Dr. Niklaus Ursus Wetter**, Maia Prado has primarily focused on diode-pumped Nd:YLF lasers. His research interests are also centered on optical neural networks, particularly in exploring optical nonlinearities for all-optical computing and optical recurrent networks. He is the president of the SPIE Student Chapter at the university and serves as a student representative at IPEN.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

To view other 2024 scholarship press releases as they become available, please visit the [2024 Scholarship Recipients page](#) or learn more about [SPIE scholarships](#) on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
