Giulia Guarda awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Giulia Guarda** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Guarda is a PhD student at the European Laboratory for Non-Linear Spectroscopy (Italy) and a quantum photonics consultant at Quantum Telecommunications Italy (QTI). Her current research activities include the generation of high-dimensional entangled states in an integrated photonic device; the theoretical study of protocol for high-dimensional quantum key distribution (QKD); and the development of an integrated photonic transmitter for QKD applications. “It is an honor to receive this scholarship,” said Guarda.

“I believe that quantum infrastructure will expand significantly in the future, and encouraging young researchers to pursue this path is crucial to advancing research.”

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
