Heberley Tobón Maya awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Heberley Tobón Maya** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Tobón Maya is a PhD student at the Universitat Jaume I in Spain, who holds BSc and MSc degrees in engineering physics from the Universidad Nacional de Colombia. His current research aims to develop a modular optical system designed for single-pixel, multiphoton microscopy, which incorporates structured illumination and computational adaptive compressive strategies to enhance designed system-imaging capabilities. His previous research experience sparked a special interest in microscopy, holography, QPI, and structured illumination

techniques. “This has also brought me closer to exciting research paradigms, such as open-science research and open-hardware designs,” said Tobón Maya. “Since 2017, I have led outreach, professional development, and diversity and inclusion activities through his involvement with various SPIE Student Chapters.”

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
