Jurim Jeon awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Jurim Jeon** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Jeon is in an integrated MS and PhD program in mechanical engineering at Pusan National University (Republic of Korea). Her research focuses on the development of optical metrology techniques based on interferometry to improve measurement accuracy in various applications, from manufacturing to scientific research. “Since I have always enjoyed attending SPIE conferences, I am more than thrilled and honored to receive this scholarship,” said Jeon. “This will significantly support and enhance my research. SPIE’s encouragement and resources are invaluable as I strive to make significant contributions to the field of optics.”

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society’s commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
