Manchen Hu awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Manchen Hu** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Hu is a PhD candidate in electrical engineering at Stanford University (USA), mentored by **Professor Dan Congreve**. “My journey into optics and photonics began with a passion for photography, evolving into advanced research on UV-light sources and near-infrared sensors for night vision,” said Hu. His work bridges theoretical knowledge and practical applications, aiming to revolutionize healthcare and environmental conservation through innovative LED and sensor technologies. Hu’s numerous publications and patents reflect his commitment to advancing the field. Beyond research, he is dedicated to mentoring others and active in community service, fostering future talents and enhancing academic collaboration in optoelectronics.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
