## Qi Wu awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Qi Wu** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Wu is a PhD candidate at Shanghai Jiao Tong University (China) and the University of L'Aquila (Italy), under the joint supervision of **Professors Weisheng Hu, Yixiao Zhu, Cristian Antonelli, and Antonio Mecozzi**. His research focuses on developing multi-dimensional, high-speed, direct detection systems for short-reach optical networks. Currently, he is working on the coexistence of quantum key distribution and high-speed classical communications in field-deployed, space-division-multiplexing fiber. As the first author, he has contributed to 22 publications in reputable journals and conferences. "I am sincerely pleased to receive this scholarship, which serves as a catalyst for me to further propel innovation within the optics and photonics community," said Wu.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
