Soumyabrata Banik awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — Soumyabrata Banik has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Banik is a doctoral student in the School of Physics and Astronomy at the University of St. Andrews (United Kingdom). He is part of Paolo Annibale’s group and works on the development of biophotonics tools to study drug-target interactions in sub-cellular domains. He is also actively involved with the St. Andrews Optics Society, carrying out outreach activities and raising awareness about photonics education. "By assisting me in advancing the study of optics and photonics at St. Andrews, this scholarship will play an important role in my intellectual and professional development, for which I remain very grateful." said Banik.

This month, the Society is awarding $303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member Brian Primeau.

Since this program began in 1978, SPIE has distributed more than $7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

To view other 2024 scholarship press releases as they become available, please visit the 2024 Scholarship Recipients page or learn more about SPIE scholarships on spie.org.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than $24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
