Wihan Adi awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Wihan Adi** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Adi is a fourth-year graduate student in the Department of Biomedical Engineering at the University of Wisconsin-Madison (USA), working under the supervision of **Assistant Professor Filiz Yesilkoy**. Adi's interdisciplinary research is focused on developing nanophotonic and optical tools in the visible and mid-infrared range for label-free and advanced sensing of various biomolecules. The tools he is developing can be used for clinical diagnostics and fundamental biomedical studies of various types of biological samples such as blood serum, tissues, and many others. "I am honored and excited to be awarded this SPIE scholarship and will use this as further encouragement to keep pushing my research forward," said Adi.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
