## Yewon Kim awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Yewon Kim** has been awarded a 2024 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Kim is a computational optical engineering student at Yonsei University, studying under the guidance of **Professor Chulmin Joo**. Her research primarily focuses on lens-less ptychographic microscopy, integrating deep learning techniques. She aims to build leaner optical devices with efficient computational algorithms to visualize the inner structure of various previously invisible materials with high resolution. Additionally, she dedicates her time to teaching undergraduates from developing countries, providing them with opportunities to learn the latest technologies and optical knowledge, particularly those who lack educational infrastructure.

This month, the Society is awarding \$303,000 in scholarships to 72 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by **SPIE Senior Member Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, SPIE has contributed more than \$24 million to the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
